FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by the poison control center or doctor. DO NOT give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing and wash skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

FOR EMERGENCY MEDICAL INFORMATION IN USA OR CANADA, CALL: 1-800-283-5253 (TDD/TTY).

CALL 911 IN THE EVENT OF A TOXIC EXPOSURE:

For telephone numbers in your area, call the American Association of Poison Control Centers at 1-800-222-1222.

For additional emergency information, call 1-800-792-7662 (COSA-ON-X)

PHYSICAL AND CHEMICAL HAZARDS

This pesticide is toxic to birds, fish, aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems, septic tanks, cesspools, lagoons or other treatment systems without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

VIRUCIDAL: 0.04% to 0.1% (5 g/4 gal) to 0.2% to 0.4% (8 g/4 gal) of water) COSA Active is effective against influenza (H3N2) and (H1N1) influenza viruses and H2N2 influenza virus. When used at 20 deg C with a 10 minute contact time in the presence of 500 ppm hard water and organic soil. Apply as directed under disinfection.

DISINFECTION OF PHARMACOICAL AND COSMETIC PROCESSING FACILITIES: COSA Active is recommended for use on hard, non-porous, environmental surfaces such as floors, walls and processing equipment in pharmaceutical and cosmetic processing facilities. This product is effective against Staphylococci aureus and S. epidermidis at 0.04% to 0.1% (5 g/4 gal) to 0.2% to 0.4% (8 g/4 gal) of water in hard water (500 ppm as CaCO3). 5 mL blood and dried 0.5 mL blood and dried soap film residue. For heavily soiled areas, a pre-soak step is required. Rinse all surfaces thoroughly with the disinfecting solution and maintain a contact time of at least 10 minutes. Product contact surfaces must be rinsed with sterile water.
