BOARD DEFENSE®
TERMITICIDE, INSECTICIDE and FUNGICIDE CONCENTRATE

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or the toilet.

PERSONAL PROTECTION EQUIPMENT STATEMENT
Applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Chemical-resistant gloves (such as waterproof gloves)
- Shoe covers
- NIOSH/MSHA Certified Respirator

FIRST AID
If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
If On Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for further treatment advice.
If in Eyes: Hold eye open and rinse slowly with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsates.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in a dry place. Do not store where children or animals may gain access.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

FOR PROTECTION AND TREATMENT OF WOOD AND WOOD-FOAM COMPOSITE STRUCTURAL COMPONENTS, AGAINST DECAY FUNGI AND WOOD-DESTROYING INSECTS, AND CELLULOSE INSULATION (PAPER-BASED) AGAINST DECAY FUNGI. ALSO CONTROLS SUCH PESTS IN INFESTED WOOD.

ACTIVE INGREDIENT
Disodium Octaborate Tetrahydrate \( \text{Na}_2\text{B}_4\text{O}_7\cdot 4\text{H}_2\text{O} \) \( \text{98\%} \)

INERT INGREDIENT
\( \text{2\%} \)

TOTAL \( \text{100\%} \)

KEEP OUT OF REACH OF CHILDREN

CAUTION
See Side Panel for Additional Precautionary Statements and Practical Treatment

NOTICE
Because of many varying conditions affecting use and application, the manufacturer warns buyer that these material and instructions are only intended to guide you and are not intended to be a complete guide to the use of this product. The manufacturer recommends that the buyer reads and understands these instructions before using the product.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

BOARD DEFENSE® is water-soluble organo-borate salt for the protection and treatment of lumber and wood-foam composite structural components, against decay fungi and wood boring beetles including Powder Post Beetles (Lyctus), Furniture Beetles and Old House Boring Beetles (Anobidella), and Longhorn Beetles (Cerambycidae), and cellulose insulation (paper-based) against decay fungi. It is not effective against wood staining fungi and fungi that require mixing with compatible products. BOARD DEFENSE® also controls Subterranean Termites (Reticulitermes, Coptotermes, Termopsidae), Dampwood Termites (Coptotermes, Dampwood Termites (Coptotermes), Kalotermes, Isotermes, and Carpenter Ants (Camponotus).

BOARD DEFENSE® is recommended for all interior and exterior wood, wood-foam composite structural components, and cellulose insulation, which will be protected from rain and not in direct contact with soil. The treatment of lumber and cellulose insulation is permanent even after cutting and finishing, allowing the wood or insulation to be exposed to moisture. The product is toxic to wood-destroying insects but surface staining of treated wood, wood-foam composite structural components may occur.

REMEDIAL TREATMENT
For remedial control of organisms attacking wood, apply a 10% aqueous solution of BOARD DEFENSE® (1 lb/gallon solution). Solution may be applied by brush or spray until surface is thoroughly wetted (approximately 7-10 gallons per 1000 sq. ft.). For timbers 2 inches in thickness or greater, apply a second application 6 to 24 hours after the initial treatment. Application may also be made by drilling and then injecting the solution directly into the infested area. Inject a sufficient amount of solution to cause runoff from exit holes drilled into the infested member.
Alternatively, apply BOARD DEFENSE® dust to infested members by drill and injection directly into galleries or dust wood surfaces and wall voids at a rate of 2 to 3 pounds per 100 sq. ft.

PREPARATION OF SOLUTION: To prepare solution described above, water should be added to the tank to about 80% of the total volume solution required. While agitating, 1.0 pound of BOARD DEFENSE® is then gradually added for each gallon of treatment solution that is required. The remaining water is then added and the solution is agitated until the product has dissolved.

PRE-TREATMENT
Wood, wood-foam composite structural components may be treated to prevent infestation of attacking organisms using the spray application method described above. For timbers 2 inches in thickness or greater apply a second application 6 to 24 hours after the first. Cellulose insulation may be treated to prevent infestation of attacking decay fungi by applying a 10% aqueous solution of BOARD DEFENSE® (1 lb/gallon solution) by spraying surfaces uniformly during production or application (approximately one gallon per 500 pounds of cellulose insulation). Current Incide Technologies, Inc. specifications and test methods should be followed to ensure adequate chemical loading. Preventive treatment for new construction excluded in the State of Florida.
