BAIT BLOCK
Rodenticide
Contains BITREX®
for Indoor and Outdoor Rodent Control

Kills Norway Rats,
Roof Rats & House Mice.

House Mice, Norway Rats and Roof Rats usually consume a lethal dose in a single
night's feeding, but it may take two or more
days from time of bait consumption for these
rodents to die. Rodents cease feeding after
consuming a toxic dose. This product is
effective against anticoagulant-resistant mice
and rats.

ACTIVE INGREDIENT:
Bromethalin CAS[63333-35-7]... 0.01%
OTHER INGREDIENTS, ............. 99.99%
TOTAL: 100.00%

EPA REG. NO. 67517-66-56
EPA EST. NO. 56-OH-1
1/2 OZ. BAIT BLOCK

KEEP OUT OF REACH OF CHILDREN
CAUTION
SEE SIDE/BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS
MAY BE HARMFUL IF EATEN BY CHILDREN OR PETS

Manufactured By: J.T. Eaton & Co., Inc.,

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with
its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and
use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To
help prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget
wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction
by dogs and by children under six years of age, and must be used in a manner that prevents
such children from reaching into bait compartments and obtaining bait. If bait can be stolen
from stations before they are filled, units must be secured or otherwise immobilized. Even
stronger bait stations are needed in areas open to roofed livestock, raccoons, bears, other
potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, and un consumable bait as specified on
this label.

USE RESTRICTIONS: This product may be used to control Norway rats, roof rats, and house
mice in sewers and for use inside and outside walls of homes, industrial and
agricultural buildings and similar man-made structures. This product may also be used in
alleys located in urban areas, inside transport vehicles (ships, trains, aircraft), and in
storage and against outside walls of related port or terminal buildings. For use in
non-food/non-feed areas. Do not contaminate human or pet food preparation items or areas. Do not place near
or inside ventilation duct openings. Do not broadcast bait.

IN CASE OF EMERGENCY CALL: CHEMTREC (POISON
CONTROL CENTER) at 1-800-424-8300

ENVI RO NMENTAL HAZARDS
This product is toxic to mammals and birds. Do not apply directly to water, or to areas
where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

[Household Use]
STORAGE: Store only in original container, in a cool, dry place inaccessible to children
and pets.
DISPOSAL: If Empty: Do not reuse this container. Place in trash or offer for recycling if
available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for
disposal instructions. Never place any unused product down any indoor or outdoor drain.

[Non-household Use]
Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store only in original container, in a cool, dry place inaccessible to children
and pets. Keep container closed and away from other chemicals.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of
at an approved waste disposal facility.
CONTAINER DISPOSAL: Dispose of empty container in a sanitary landfill, or by
incineration, or, if allowed by state and local authorities, by burning. If burned stay out of
smoke.

NOTE TO PHYSICIAN:
This product is not an anticoagulant type of rodenticide. If ingested, limit absorption by either
emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral
edema and should be treated accordingly through administration of an amnestic diuretic and
corticosteroid.

APPLICATION DIRECTIONS:
The active ingredient in this product is different from anticoagulant rodenticides. Individual
rodents cease feeding after consuming a toxic dose.

Rats: Apply 2 to 12 baits per placement. Space placements at intervals of 20 to 30 feet.
Mice: Apply 1 or 2 baits per placement. Space placements at intervals of 8 to 10 feet.

FOLLOW-UP: Adjust the amount of bait applied to the level of rodent feeding expected at
each bait placement location. Highest bait consumption is expected to occur on the first day
or two after treatment. After several days, inspect bait placements and replenish bait at sites
where there is heavy feeding or where there is continuing evidence of rodent activity.
Maintain bait for at least one week and continue baiting until all signs of rodent activity have
ceased or it becomes clear that the remaining rodents are not attracted to the bait.
Collected and properly dispose of all dead rodents and leftover bait. To discourage
reinfestation, limit sources of rodent food, water, and harborage as much as possible.
If reinfection does occur, repeat treatment. Where a continuous source of infestation is
present, establish permanent bait stations and replenish as needed.
