Precautionary Statements:
Hazards to Humans and Domestic Animals
DANGER
CAUSES IRREVOCABLE EYE DAMAGE. HARMFUL IF ABSORBED THROUGH SKIN. HARMFUL IF SWALLOWED. DO NOT GET IN EYES OR ON CLOTHING. AVOID CONTACT WITH SKIN. PROLONGED OR FREQUENTLY REPEATED SKIN CONTACT MAY CAUSE ALLERGIC REACTION IN SOME INDIVIDUALS. REMOVE CONTAMINATED CLOTHINGS AND WASH BEFORE REUSE.
Mixers, blenders, and other exposed to product must wear the following Personal Protective Equipment (PPE):
- Long-sleeved shirt and long pants
- Rubber gloves and apron
- Shoes with socks
- Protective eyewear

Follow manufacturer’s instructions for selecting the proper PPE.

USER SAFETY RECOMMENDATIONS:
- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should wash any exposure immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly.
- Discard clothing or other absorbent materials that have been drenched or lightly contaminated with this product.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to aquatic plants, fish, and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Industrial microbiocide for use in metal working fluids, adhesives, lacquers, hydraulic fluids, dispersed pigments, metal cleaning fluids, building materials, polymer latexes, paints and coatings, "ephemeral" compositions, and in Household Consumer, Industrial, Janitorial Products.

READ AND FOLLOW THE DIRECTIONS FOR USE ON THE ACCOMPANYING INFORMATION SHEET.

ACTICIDE® CT

ACTIVE INGREDIENTS:
5-Chloro-2-methyl-4-isothiazolin-3-one: 1.11%
2-Methyl-4-isothiazolin-3-one: 0.37%
OTHER INGREDIENTS: 98.52%
TOTAL: 100.00%

KEEP OUT OF REACH OF CHILDREN DANGER - PELIGRO

FIRST AID

If in Eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison center or doctor for treatment advice.

If Swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If on Skin:
- Wash exposed clothing. Rinse clothes immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

GENERAL

For Transportation / Spill Emergency:
Call Chemtrec at 1-800-528-0002

PHYSICAL AND CHEMICAL HAZARD
This product is corrosive to mild steel.

STORAGE AND DISPOSAL
This product is corrosive to mild steel.

PESTICIDE STORAGE:
Do not store or transport in unlined metal containers. Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment.

PESTICIDE DISPOSAL:
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or residue is a violation of Federal Law. It is unlawful to dispose of by gas according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL
Non-refillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinse as follows: [For containers ≤ 5 gallons in size]: Empty the remaining contents into application equipment or a mix tank and then for 10 seconds after the flow begins to drip, fill the container ≤ ½ full with water and recirculate for 10 seconds. Pour into application equipment or a mix tank or store the container for later use or disposal. Clean for 10 seconds after the flow begins to drip. Repeat this procedure two more times. [For containers > 5 gallons in size]: Empty the remaining contents into application equipment or a mix tank. Fill the container ≤ ½ full with water. Recirculate and lighten mixture. Tip container on its side and roll it back and forth, thoroughly agitating for a complete revolution, for 20 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over until its end and tip it back and forth several times. Empty the residual liquid into application equipment or a mix tank or store residue for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or pourout and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

GENERAL
CONSULT FEDERAL, STATE OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES.

CONDITIONS OF SALE AND WARRANTY

THOR GmbH warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. THOR GmbH MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES, EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Handling, storing, and use of the product by Buyer or User are beyond the control of THOR GmbH and Seller. THOR GmbH is not responsible for any losses or other unanticipated consequences resulting from, but not limited to, failure to follow label directions will be assumed by the Buyer or User. IN NO CASE WILL THOR GMBH OR SELLER BE HELD LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE HANDLING, STORAGE, USE OF THIS PRODUCT.

<table>
<thead>
<tr>
<th>WATER-BASED HYDRAULIC FLUID PRESERVATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTICIDE® CT microbicidal is recommended as a preservative for use in the manufacture and use of high water-based hydraulic fluids and invert emulsion hydraulic fluids typically prepared by emulsifying 40% by volume water in 60% by volume of mineral oil using an oil soluble emulsifying agent.</td>
</tr>
<tr>
<td>For a noticeably fouled system use an initial dose of 150 to 250 fluid ounces (10 to 17 lb) per 1000 gallons fluid to be followed by subsequent maintenance dosage. A higher dosage range and/or increased frequency of treatment may be required depending upon rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.</td>
</tr>
<tr>
<td>120 to 150 FL OZ (8 to 10 LB) per 1000 GAL of fluids every 8 weeks</td>
</tr>
</tbody>
</table>
METAL CLEANING FLUID PRESERVATION
ACTICIDE® CT microbicide is recommended as a preservative for use in the manufacture and use of alkaline, acid and emulsion based metal cleaning fluids typically used in electroplating, phosphatizing, galvanizing and general metal cleaning operations.
The preservative should be dispensed into the use-dilution metal cleaning fluid using a metering pump and uniformly dispersed throughout the system.
For addition to a metal cleaning concentrate, add ACTICIDE® CT microbicide at a level to ensure that the final use-dilution fluid will contain 560 to 2250 ppm product. A higher dosage rate and/or increased frequency of treatment may be required depending upon the rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

For direct addition to a fouled system:
72 to 290 FL OZ (5 to 20 LB) per 1000 GAL of use-dilution metal cleaning fluid every 3 to 4 weeks
(560 to 2250 ppm ACTICIDE® CT)

PRESERVATIVE FOR ADHESIVES AND TACKIFIERS
ACTICIDE® CT microbicide is recommended as an in-container preservative for the control of bacteria and fungi in water soluble and water dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene-butadiene and acrylic latices.
ACTICIDE® CT microbicide is recommended as a preservative for tackifiers derived from rosin and hydrocarbon resins.
For storage at high temperatures and humidity, or for highly susceptible systems, use up to 0.3% (3.0 LB per 1000 LBS formulation).

0.05 – 0.165%
0.5 – 1.65 LB per 1000 LBS formulation

DISPERSED PIGMENT PRESERVATION
ACTICIDE® CT microbicide is recommended for the control of bacteria and fungi in the manufacture and storage of dispersed pigments such as kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, magnesium silicate, dispersed colorants and kieselguhr used in paint and paper production.

0.06 – 0.225%
0.6 – 2.25 LB per 1000 LB fluid
250 – 1020 grams per 453 KG of fluid

PRESERVATIVE FOR BUILDING MATERIALS
ACTICIDE® CT microbicide is recommended as an in-container preservative for the control of bacteria and fungi in building materials such as mastics, caulks, joint cements, spackling, grouting, and concrete admixtures.

0.05 – 0.165%
0.5 – 1.65 LB per 1000 LB of fluid
ACTICIDE® CT
INFORMATION SHEET

THIS ACTICIDE® CT INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PRESERVATIVE FOR LATICIES, POLYMER EMULSIONS OR
SOLUTIONS

ACTICIDE® CT microbiocide is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latices including: acrylics, styrene/butadiene, carboxylated styrene/butadiene, ethylene/vinyl acetate and biopolymers intended for industrial use such as xanthan gum, gum arabic, guar gum, protein derived polymers, starches and casein derived polymers.

Note: To insure uniform mixing, add ACTICIDE® CT microbiocide to latex or solutions slowly with agitation. The actual concentrations required will depend upon such factors as the specific substance to be treated, frequency of repeated microbial contamination expected and level of protection required.

</tbody>
</table>

*PRESERVATIVE FOR AQUEOUS COMPOSITIONS

ACTICIDE® CT microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in aqueous products such as:

* fiber glass sizing solutions
* aqueous emulsions and dispersions including
  * surfactants
  * stabilized oil/water emulsions
  * surface preparation compounds
  * foam control products
  * nutrient solutions
  * pesticide formulations.

CONCENTRATES:

ACTICIDE® CT microbiocide should be added to concentrates at a level to ensure that the final use dilution of the product will contain 0.05 to 0.33% ACTICIDE® CT.

*Not approved for this use in the State of California

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

---

*Specifically for a wood coating, ACTICIDE® CT is recommended for the protection of wood and wood products such as landscape timbers, fences, posts, pilings, cross ties, decks and similar exterior structures, from mold and mildew. As a pressure treatment for mold and mildew control for southern yellow pine, hemlock, ponderosa pine and other soft woods. Thoroughly wet and allow to dry. A single application will afford protection for 12 weeks. Under extreme mildew conditions. Thoroughly wet and allow to dry. A single application will afford protection for 12 weeks.*

*Not approved for this use in the State of California*

---

**Special purpose coating uses**

Use as a preservative for:

- Electrodeposition paints or solutions
- Photo/photoling solutions or coatings
- Fount (or fountain) solutions used in the printing process as a maintenance fluid/coating and as a special coating for printing plates
- Spin finish coatings for fibers.

The application/addition directions for these special purpose coating uses are:

---

**PHOTO/PHOTOPLATE PROCESSING, FOUNTAIN SOLUTIONS, AND INK/INK COMPONENTS**

ACTICIDE® CT microbiocide is recommended for the control of bacteria, fungi, and biofilms in photo/photoplate processing chemicals, stabilizing solutions, fountain solutions, printing inks and ink components. ACTICIDE® CT is recommended for water-based printing inks such as flexographic, gravure, screen and ink jet types. ACTICIDE® CT is recommended for the control of bacteria and fungi in printing ink components such as resins, plasticizers, water soluble dyes, pigments, gelling agents, waves, surfactants, and thickeners.

**CONCENTRATES:**

ACTICIDE® CT should be added to concentrates at a level to ensure that the final use dilution of the product will contain 0.1 to 0.33% ACTICIDE® CT.

To ensure uniform mixing add ACTICIDE® CT microbiocide to the product slowly with agitation. The actual concentration required will depend upon the specific substance to be treated, frequency of repeated contamination expected and level of protection required.

*Not approved for this use in the State of California*

---

**ELECTRODEPOSITION**

ACTICIDE® CT microbiocide is recommended as a tankside additive for the control of bacteria, fungi, and algae in re-circulating electrodeposition systems and associated rinse systems. Alternately, ACTICIDE® CT microbiocide may be added through the components of the electrodeposition paint prior to their addition to the electrodeposition system.
**ACTICIDE® CT**

<tr>
<th>Tankside Addition to Electrodeposition Systems:</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTICIDE® CT microbiocide should be dispensed into the recirculating rinse system, ultrafilter permeate, or final distilled rinse system at a point to insure uniform mixing.</td>
</tr>
<tr>
<td>When the system is noticeably fouled, add 650 to 2245 ppm ACTICIDE® CT microbiocide (6.5 to 22.5 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved.</td>
</tr>
<tr>
<td>When microbial control is evident, add 320 to 1000 ppm ACTICIDE® CT microbiocide (3.2 to 10 gallons per 10,000 gallons of fluid in the system) weekly or as needed to maintain the system.</td>
</tr>
<tr>
<td>A change of frequency of treatment may be required depending on the rate of dilution of the preservative with the makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.</td>
</tr>
<tr>
<td><em>Not approved for this use in the State of California</em></td>
</tr>
</tbody>
</table>

**TREATMENT OF ELECTRODEPOSITION PAINT COMPONENTS**

Initial Dose of Paint Components:

ACTICIDE® CT microbiocide should be added to the resin, pigment, or other component of the electrodeposition paint at a level to ensure that the final use-dilution fluid will contain 320 to 2245 ppm product.

Supplemental Tanked Dosing of Electrodeposition System:

If additional microbial control is necessary, ACTICIDE® CT microbiocide may be added to the electrodeposition system tankside to supplement the microbiocide incorporated through paint components.

If the system becomes noticeably fouled, add 650 to 2245 ppm ACTICIDE® CT microbiocide (6.5 to 22.5 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved. When microbial control is evident, the system can be maintained by addition of 320 to 1000 ppm ACTICIDE® CT microbiocide (3.2 to 10 gallons per 10,000 gallons of fluid in the system) weekly or as needed.

*Not approved for this use in the State of California*

**NOTE:** Regardless of the manner of incorporation, the total level in the system should never exceed 2245 ppm ACTICIDE® CT or 22.5 gallons per 10,000 gallons of system fluid.
