S-Sul Sprayable
Ammonium Sulfate 21-0-0
• WATER CONDITIONING AGENT

PRINCIPAL FUNCTIONING AGENT:
AMMONIUM SULFATE ........................................................................................... 99.5%
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANTS .................................. 0.50%
TOTAL .................................................................................................................. 100.0%

All ingredients in this product are exempt from 40 CFR 180.910

WARNING
KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS:
Eye and skin irritant. Avoid breathing dust. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

RECOMMENDATIONS FOR USE AND MIXING RATES:
Research has shown that adding ammonium sulfate to tank mix with many herbicides increases the efficacy of the herbicides.
Only a small amount of ammonium sulfate is added to the herbicide – 8 to 20 pounds per 100 gallons of water. Agitate the tank water while slowly adding the ammonium sulfate. Allow enough time for complete dissolution before adding additional adjuvants or herbicides.
Use only sprayable grade ammonium sulfate with herbicides. Perform a jar test to check the quality of the ammonium sulfate. Add 1/3 cup of ammonium sulfate to 1 gallon of water and agitate for 1 minute. If you observe undissolved sediment, you will need to predissolve the ammonium sulfate in water and filter it before adding it to the spray tank.

FOLLOW DIRECTIONS ON HERBICIDE LABEL. THOROUGHLY RINSE EQUIPMENT AFTER USE. NOT FOR AQUATIC USE.

STORAGE AND DISPOSAL:
Store in a cool dry space away from oxidizing agents. Completely empty contents of bag into spray application equipment. Dispose of contents/bag according to local, state and federal regulations.

Manufactured by:
American Plant Food Corporation
P.O. Box 584
Galena park, TX 77547
