PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. EXTREMELY HAZARDOUS LIQUID AND VAPOR UNDER PRESSURE. FATAL IF SWALLOWED OR INHALED; CORROSIVE; CAUSES SKIN BURNS AND IRREVERSIBLE EYE DAMAGE, WHICH MAY HAVE A DELAYED ONSET. DO NOT BREATHE VAPOR OR DUST. INHALATION MAY CAUSE SEVERE ACUTE ILLNESS OR DELAYED LUNG, NERVE, OR BRAIN INJURY. DO NOT GET IN EYES, ON SKIN OR CLOTHING.
NOTE: CHLOROPHENIRAMINE MAY BE IRITATING TO THE UPPER RESPIRATORY TRACT, AND EVEN AT LOW LEVELS CAN CAUSE PAINFUL IRRITATION TO THE EYES. PRODUCING TEARING. IF THESE SYMPTOMS OCCUR, LEAVE THE FUMIGATION AREA IMMEDIATELY.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Some materials that are chemical-resistant to this product are listed below. For more options, follow the instructions for Category H on the chemical-resistant category selection chart. PPE constructed of Teflon, neoprene, and chlorinated polyethylene provides short-term contact or splash protection against liquid in this product. Long-term protection is provided by PPE constructed of Viton, Teflon, and EVA, barrier laminates (for example, resins coated with DuPont(TM) Teflon(R) or Teflon(TM)/silicone gloves manufactured by North). Where chemical-resistant materials are required, leather, canvas, or cotton materials offer no protection from this product and must not be worn as the sole article of protection when contact with this product is possible. When performing tasks with NO potential for contact with liquid fumigant, all handlers (including applicators) must:
- Wear long-sleeved shirt, long pants, shoes, and socks.
- Not wear jewelry, gogles, light clothing, chemical-resistant gloves, rubber protective clothing, or rubber boots when handling. Membrane-treated clothing may be trapped inside clothing and cause skin irritation.

Handers with no potential for contact with liquid fumigant (e.g., observers) may wear cotton, leather, or other proven, non-chemical-resistant gloves. If such gloves are exposed to liquid fumigant, they must immediately be removed and discarded.

When performing tasks with potential for contact with liquid fumigant, all handlers (including applicators) must wear:
- Long-sleeved shirt and long pants,
- Chemically-resistant gloves,
- Chemical-resistant apron,
- Protective eyewear (DO NOT wear goggles), and
- Chemical-resistant boot-wear manufactured by North.

In addition, when an air-purifying respirator is required under this label's Directions for Use: Protection for Handlers. Respiratory Protection and Shake-Way Tiggeraw suction, handlers (including applicators) must wear:
- A NIOSH-certified half-facepiece respirator with cartridges certified by the manufacturer for protection from exposure to methyl bromide at concentrations up to 5 ppm, e.g., a 3M Advantage respirator equipped with 3M Particulate Filter 5KN100 or Organic Vapor 500 Cartridge.

IMPORTANT: A self-contained breathing apparatus (SCBA) is NOT permitted for routine handler/lower. If responding to an emergency when corrective action is needed to reduce air concentrations to acceptable levels, wear an SCBA. Exempt-only SCBA respirators must not be used by handlers responding to emergencies. In addition wear PPE required for potential contact with liquid fumigant.

See label booklet for additional Precautionary Statements.

NOTICE: Contains methyl bromide, a substance which harms public health and the environment by destroying ozone in the upper atmosphere.

RESTRICTED USE PESTICIDE DUE TO ACUTE TOXICITY
For resale only to and used by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator’s certification.

Tri-Con 45-55
Pre-Plant Soil Fumigant

ACTIVE INGREDIENTS:
Chloropicrin........................................... 64.7%
Methyl Bromide.................................... 45.0%

TOTAL:.................................................. 100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER
POISON

If swallowed or inhaled, bring the exposed person to the nearest emergency medical facility. If the exposed person is unconscious, induce vomiting only if instructed by the nearest emergency medical facility. Use self-contained breathing apparatus (SCBA) in a properly ventilated area. Do not attempt to treat or give water by mouth to an unconscious person. Do not induce vomiting unless directed by a physician or other qualified individual experienced in handling chemical overdose.

IF INHALED
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

IF SWALLOWED:
- Call a poison control center or doctor immediately for treatment advice.
- Do not give anything by mouth to an unconscious person.
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Remove contaminated clothing and clothing exposed to this product.
- Call a poison control center or doctor for further treatment advice.

IF IN EYES:
- Hold eyes open and rinse slowly with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, unless they are trapped in the eye.
- Call a poison control center or doctor for further treatment advice.

Note: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

EMERGENCY PHONE NUMBER: Chemtrec 1-800-424-6300

TRICHLOROETHYLENE

NOTE TO PHYSICIAN
Early symptoms of overexposure to methyl bromide are dizziness, headache, nausea and vomiting, weakness, and collapse. Long exposure may develop in 2 to 48 hours after exposure, accompanied by cardiovascular changes, headache, and dizziness. Respiratory overexposure may result in blurred vision, staggering gait, and mental irritability, with probable recovery after a period of no exposure. Blood ketone levels suggest the occurrence, but not the degree, of exposure. Treatment is symptomatic.

DIRECTIONS FOR USE
Restricted Use Pesticide
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only handlers may apply the product. Do not apply the product immediately after the start of the application and the entry restricted period ends, and in the buffer zone during the buffer zone period. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements
Use this product only in accordance with label and with the Worker Protection Standard, 40 CFR 190. Refer to label booklet under "Agricultural Use Requirements" in the Directions for Use section for information about this standard.

Storage and Disposal
DO NOT CONTAMINATE WATER, FOOD, OR EARTH
BY STORAGE OR DISPOSAL
Pesticide Storage: Store in a dry, cool, well-ventilated area under lock and key. Place as a pesticide storage area.
Pesticide Disposal: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. County or local regulations may have further requirements for the disposal of pesticide residues and other wastes resulting from the use of this pesticide. Disposal of empty containers: This container is not in use. Return of containers: Containers are the property of the registrant or distributor and must be returned promptly after use. Do not ship containers without safety caps or value protection barriers.

Refillable Container: Only the registrant or distributor is allowed to refill this container. This container can be refilled with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before first disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.
Container Disposal: To clean the container before final disposal, remove any remaining liquid from the container, using dry or pressure if necessary. Allow container to sterile for at least 5 days. After sterilization, wash container using hot water, then offer container to qualified reclaimers or dispose of as directed by State or local regulations.

See label booklet for complete Directions for Use.
