Nortron® SC Herbicide

For Control of Weeds in Spinach Grown for Seed

EPA Reg. No. 264-613

SLN. No. WA-010001

FIFRA 24(c) Special Local Need

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. All applicable directions, restrictions and precautions on the EPA registered label are to be followed. This label must be in the position of the user at the time of application.

This label for Nortron SC Herbicide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2019.

DIRECTIONS FOR USE

Failure to follow the Directions for Use and Precautions on this label may result in poor product performance, crop injury, or illegal residues.

Apply Nortron® SC Herbicide as a preemergence or preplant incorporated treatment using ground application equipment in 10 to 40 gallons of water at the rates recommended below. (See complete Nortron® SC Herbicide label for recommendations on soil preparation, spray equipment, incorporation equipment, and cultural practices).

RESTRICTIONS:

For use under this SLN label, do not apply this product through any type of irrigation system.

Do not apply more than one application of Nortron® SC Herbicide per acre per year.

All spinach seed screenings shall be disposed of in such a way that they cannot be distributed or used for food or feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the WSDA forthwith upon request. Disposal records shall consist of documentation from a controlled dumpsite, incinerator, or other equivalent disposal site and shall show the lot numbers, amount of material disposed of, its grower(s), and the date of disposal.

No portion of the spinach seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes. Spinach seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.

Spinach seed may not be distributed for human consumption or animal feed.

WSDA Container Disposal Guidance: Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling
cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

**PRECAUTIONS:** Crop injury may result under unfavorable environmental conditions.

Producers of spinach seed who use this product are required to inform, in writing, conditioners receiving seed produced on fields treated with this product. A copy of this labeling is required to be provided to the conditioners by the producer. At the processing plant, processed seed must be labeled “Not for human or animal consumption”. The processor must dispose of all seed screenings in such a way that they cannot be distributed or used for food or feed.

**Bayer CropScience Special Conditions and Disclaimer for Use of Nortron SC Herbicide on spinach grown for seed.**

Bayer CropScience intends that this Section 24(c) label be distributed only by the Puget Sound Seed Growers Association only to end users and/or growers who agree in writing to the terms and conditions required by the Puget Sound Seed Growers Association including a waiver and release from all liability and indemnification by the user and/or grower of Bayer CropScience, Puget Sound Seed Growers Association, and others for failure to perform and crop damage from the use of Nortron® SC Herbicide on spinach grown for seed. If such terms and conditions are unacceptable, return Nortron® SC Herbicide at once unopened.

This product when used on spinach grown for seed may lead to crop injury, loss or damage. Bayer CropScience recommends that the user and/or grower test this product in order to determine its suitability for such intended use. The Puget Sound Seed Growers Association and Bayer CropScience make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated with the use of this product. The decision to use or not to use this Nortron® SC Herbicide must be made by each individual Nortron® SC Herbicide user and/or grower on the basis of possible crop injury from Nortron® SC Herbicide, the severity of weed infestation, the cost of alternative (pest) controls, and other factors. Bayer CropScience intends that because of the risk of failure to perform or crop damage that all such use is at the user’s and/or grower’s risk, to the extent consistent with applicable law.

This Special Conditions and Disclaimer statement is required by Bayer CropScience and is not required or enforced by the USEPA or the WSDA.
