PRAMITOL® 25E
HERBICIDE

FOR TOTAL VEGETATION CONTROL OF WEEDS IN NONCROP AREAS

Bare ground weed control around buildings, storage areas, fences, pumps, machinery, fuel tanks, recreational areas, roadways, guard rails, airports, military installations, highway medians, pipelines, railroads, lumberyards, industrial sites, rights-of-way, and similar areas.

1 gallon treats up to 10,000 sq. ft.

ACTIVE INGREDIENT: Prometon: 2,4 bis (isopropylamino)-6-methoxy-s-triazine ........................................... 25%
INERT INGREDIENTS ........................................................................... 75%
TOTAL .................................................................................. 100%

KEEP OUT OF REACH OF CHILDREN
WARNING

FIRST AID

IF SWALLOWED:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes; then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF INHALED:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.
NOTE TO PHYSICIAN: Contains petroleum distillate; vomiting may cause aspiration pneumonia. Probable mucosal damage may contraindicate the use of gastric lavage. Treat for circulatory shock, respiratory depression, and convulsions, if needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes substantial but temporary eye injury. Do not get in eyes, on skin, or on clothing. Wear protective eyewear goggles, face shield, or safety glasses. Harmful if swallowed, absorbed through skin, or inhaled. Avoid breathing vapor or spray mist. Remove contaminated clothing and wash clothing before reuse. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water used for irrigation or domestic purposes. Do not contaminate water when disposing of equipment wash waters. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill, or store near heat or open flame. Store at temperatures above 30°F.

DIRECTIIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

Pramitol® 2SE is a nonselective herbicide that can be applied in water or oil before or after plant growth begins. Although Pramitol® 2SE has considerable activity through foliar contact, much of its activity is through roots. Therefore, its effectiveness is dependent on rainfall to move it into the root zone. Very dry soil conditions and lack of sufficient rainfall may result in poor weed control.

Important: Use only in areas where complete control of all vegetation is desired such as industrial sites, rights-of-way, lumberryards, petrolatum tank farms, around farm buildings, along fence lines, etc. When applied to the soil, this product usually inhibits plant growth for a year or more. Following many years of continuous use of this product and chemically related products, byproducts of some of the weeds listed on this label have been reported which cannot be effectively controlled by this or related herbicides. Where this is known or suspected, we recommend the use of this product in combination with other registered herbicides which are not translocators. Consult with your State Agricultural Extension Service for specific recommendations.

Pramitol® 2SE is generally noncompostable to equipment but may cause swelling or uncontrolled deterioration of hoses and fittings containing natural rubber.

INDUSTRIAL SITES AND NONCROP AREAS

Pramitol® 2SE can be applied before or up to 3 months after weed emergence. Application rates vary from 5-10 gals. of Pramitol® 2SE per acre depending on climatic conditions, root type, the weeds present, and the stage of growth of the weeds. In the following rate recommendations, the higher rates are intended for use on hard soils where weed growth is heavy and where rainfall is expected to be relatively high. The higher rates should also be used where longer residual control is desired in regions with a long growing season.

Although Pramitol® 2SE has considerable activity through foliar contact, much of its activity is through roots, therefore, its effectiveness is dependent on rainfall to move it into the root zone. Very dry soil conditions and lack of sufficient rainfall may result in poor weed control.

For best results, apply Pramitol® 2SE before weeds emerge or when weeds are young and actively growing. For control of annual and susceptible perennial weeds and grasses such as daisy fleabane, cornsog, groundsel, quickgrass, puncturevine, goldenrod, and plantain: Broadcast 4.0-6.25 gals. Pramitol® 2SE in 50-100 gals. of water per acre.

For control of hard-to-kill perennial weeds and grasses such as johnsongrass, bedded, and wild carrots: Broadcast 7.5-10 gals. of Pramitol® 2SE in 50-100 gals. of water per acre.

For faster top-killing of existing vegetation, apply Pramitol® 2SE in diesel oil, fuel oil, or weed oil. Use oils at rates of 100-200 gals. per acre. Tall, dense vegetation such as johnsongrass will generally require 150 or more gals. of oil per acre for thorough coverage. When applying Pramitol® 2SE to a small area with backpump sprayer or pump-up sprayer with capacities of 1-3 gals., calibrate the sprayer so that 1 gal. of water covers 500 sq. ft. Then mix 1/2- 1/8 pt. Pramitol® 2SE with water to obtain a total volume of 1 gal. and apply uniformly over a 500 sq. ft. area. For hard-to-kill perennial weeds and grasses, use the higher rate. If green foliage is present, part or all of the water can be substituted with oil to provide burndown.

PRECAUTIONS WHEN USED ON INDUSTRIAL SITES AND NONCROP AREAS:

1. Do not apply the product or drain or flush application equipment in locations where the chemical may come into contact with root zones of desirable trees, shrubs, or plants or injury may occur. (c) Do not use on land to be cropped. (b) Do not use for weed control in greenhouses.

ASPHALT PAVEMENT

Pramitol® 2SE may be used to extend the useful life of asphalt pavement by preventing weeds from emerging through it. Pramitol® 2SE may be applied to the ground before laying asphalt or it may be mixed with cutback asphalts.

Pramitol® 2SE should be used only where the area to be treated has been prepared according to good construction practices. If Hanford, tubers, or other vegetative parts are present in the site, they should be removed by scalping with a garden blade. The placement of the site following scalping or plowing will allow good penetration of Pramitol® 2SE, and will help to ensure proper asphalt curing and good weed control.

Pramitol® 2SE will not control woody vegetation such as small trees, brush, or woody vines. Roots of such species should be grubbed and removed from the site before application.

Under Asphalts: Pramitol® 2SE may be applied to the ground before laying rapid, medium, or slow curing asphalt cements such as those used on parking lots, highway shoulders and median strips, roadways, and other industrial sites. Pramitol® 2SE should be applied just before laying of the asphalt coating to prevent possible lateral movement of the herbicide to root or other mechanical means. Sprays should be equipped to prevent continuous spattering of the spray mixture during application to assure application of a uniform spray emulsion.

Apply Pramitol® 2SE virulently at the rate of 7.5-10 gals. per acre (22.5-29.4 fl. oz./1,000 sq. ft.) in a minimum of 100 gals. of water. Use the lower rate to control annual and susceptible perennial weeds such as daisy fleabane, cornsog, groundsel, puncturevine, goldenrod, and plantain. Use the higher rate to control hard-to-kill perennial weeds and grasses such as johnsongrass, bedded, and wild carrots.

Do not use Pramitol® 2SE under asphalt coatings less than 2 inches thick.

Mixed with Cutback Asphalt: Pramitol® 2SE may be mixed with special and standard cutback asphalts (as RC, MC, and SC) for weed control in areas being stabilized, such as highway shoulders, highway median strips, under highway fences and guard rails, along airport runways and lights, and soil and stone aggregate on shoulders, and cracked asphalt surfaces being resurfaced.

Pramitol® 2SE should be simultaneously mixed with the cutback asphalt as it is being pumped into the applicator or transport truck to ensure a homogeneous mix. Temperatures in the applicator or transport truck should not exceed 170°F.

Pramitol® 2SE should be used at the rate of 22.5-29.4 fl. oz./1,000 sq. ft. equivalent to 7.5-10 gals. per acre of Pramitol® 2SE. Use the lower rate on ordinary weed and grass complexes such as daisy fleabane, Kings Ranch fescue, knotweed broomgrass, and the higher rate where johnsongrass, bermudagrass, or other deep-rooted perennialities are present.

In areas where deep-rooted perennialities are present, a better results can be obtained by mixing the application from midsummer through late fall or prior to the early season.

PRECAUTIONS WHEN USED UNDER ASPHALT OR MIXED WITH CUTBACK ASPHALTS:

1. Do not apply cutback asphalt mixtures containing Pramitol® 2SE to soil saturated with water. The condition of the soil should be favorable for penetration or proper asphalt curing may be affected. (b) Do not apply Pramitol® 2SE with asphalt emulsion such as SS. (c) Field trials of desiccated plants often extend far beyond the drip line of the branches. Do not apply the product or drain or flush application equipment in locations where the chemical may come into contact with root zones of desirable trees, shrubs, or plants or injury may occur. (b) Do not use on land to be cropped. (b) Do not use for weed control in greenhouses.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store at temperatures above 32°F.

PESTICIDE DISPOSAL: Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or by burial, if allowed by state and local authorities. If burned, stay out of smoke.

For more spills, leaks, etc., follow all precautions indicated on this label and clean-up immediately. Take special care to avoid contamination of equipment and facilities during cleanup procedures and disposal of wastes. In the event of a major spill, fire, or other emergency, call 1-800-412-9830, day or night.
WARRANTY STATEMENT

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. Buyer ensures all risks of use, storage, or handling of this material in strict accordance with directions given here-with.

PRAMITOL® 25E
HERBICIDE
FOR TOTAL VEGETATION CONTROL OF WEEDS IN NONCROP AREAS
Bare ground weed control around buildings, storage areas, hoaxes, pumps, machinery, fuel lines, recreational areas, roadbeds, guard rails, airports, military installations, highway medians, pipelines, railroads, lumberyards, industrial sites, rights-of-way, and similar areas.
1 gallon treats up to 10,000 sq. ft.

ACTIVE INGREDIENT:
Prometon: 2,4-bis(isoproplamino)-6-methoxy-s-triazine.............................. 25%
INERT INGREDIENTS ........................................................................... 75%
TOTAL .............................................................................................. 100%

KEEP OUT OF REACH OF CHILDREN
WARNING

FIRST AID
IF SWALLOWED: • Call a poison control center or doctor immediately for treatment advice.
               • See Safety Data Sheet for additional emergency information.
               • Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to unconscious persons.

IF IN EYES: • Rinsed eyes open and rinse slowly and gently with water for 15-20 minutes.
             • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
             • Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: • Take off contaminated clothing.
                            • Wash hands after handling. Use antidotes if available. See Safety Data Sheet.

IF INHALED: • Remove victim to fresh air. If the person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably mouth-to-mouth if possible.
              • Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.
NOTE TO PHYSICIAN: Contains petroleum distillates: Xylene may cause aspiration pneumonia. Probable exposure damage may contraindicate the use of positive pressure. Treat for circulatory shock, respiratory depression, and convulsions, if needed.
