TRI AG, INC.

REGISTRATION FOR SPECIAL LOCAL NEED
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

TRI AG INTENDS THAT THIS PRODUCT WILL ONLY BE DISTRIBUTED BY THE WALLA WALLA SWEET ONION GROWERS ASSOCIATION TO CONTRACTED GROWERS

RO-NEET® 6-E
EPA Reg. No. 73637-5
EPA SLN No. WA-010021

DIRECTIONS FOR USE

• It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
• This labeling must be in the possession of the user at the time of application.
• Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

SPINACH: Apply 1/3 to 1/2 gallon of RO-NEET 6-E (2 to 3 lbs. ai) in a minimum of 10 gallons of water per acre. Use on sandy mineral soils only. Apply as a surface broadcast application with ground application equipment prior to planting. Immediately (within minutes) after application thoroughly mix RO-NEET 6-E into the soil to a depth of 2 to 3 inches using a finishing disk, harrow, rolling cultivator or similar implement capable of providing uniform incorporation. For a list of weeds controlled refer to the EPA-registered RO-NEET 6-E label.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval (REI). The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Entry (including early entry that would otherwise be permitted under the WPS) by any person—other than a correctly trained and equipped handler who is performing a handling task permitted by the WPS—is PROHIBITED for 48 hours following applications. Do not allow entry by unprotected persons into the treated area until 48-hour period is expired and the warning signs are removed.

NOTIFICATION: Before the start of the application, notify workers of the application by warning them orally and by posting warning signs at entrances to the treated area. The signs must bear the skull and crossbones symbol and state: (1) “DANGER/PELIGRO”, (2) “DO NOT ENTER/NO ENTRÉ”, (3) the date and time of treatment, (4) RO-NEET 6-E in use”, and (5) name, address, and telephone number of the applicator. Post the warning sign instead of the WPS sign for this application, but follow all WPS requirements pertaining to location, legibility, size, and timing of posting and removal.

Special Early Entry Exception: Workers may enter the treated area during the first 48 hours following application to plant...
crops, provided all of the following conditions are met:

(1) The special early entry workers must use motorized ground equipment that is equipped with an enclosed cab that meets the definition in the Worker Protection Standard for Agricultural Pesticides [40 CFR 170.240(d)(5)] for dermal protection. In addition, these workers must:

- Wear the personal protective equipment required in the PPE section of this labeling for applicators,
- *Either* wear the type of respirator specified in the PPE section of this labeling or use an enclosed cab with a properly functioning ventilation system that is used and maintained according to the manufacturer’s written operating instructions and that is declared in writing by the manufacturer or by a government agency to provide at least as much respiratory protection as the type of respirator specified in the PPE section of this labeling,
- Be provided and have immediately available for use in an emergency when they must exit the cab in the treated area: chemical-resistant gloves, and, if using an enclosed cab that provides respiratory protection, a respirator of the type specified in the PPE section of this labeling,
- Take off any PPE that was worn in the treated area before reentering the cab, and
- Store all such PPE in a chemical-resistant container, such as a plastic bag, to prevent contamination of the inside of the cab.

(2) Employers of the special early entry workers must make sure that these workers:

- Have received training equivalent to WPS pesticide handler training before entering the treated area,
- Are provided with the specified type of respirator, and the respirator fits them correctly and is maintained as required in the WPS for handlers,
- Are provided all of the WPS protections for early entry workers, including PPE instructions, labeling information and instructions, decontamination sites, and duties related to providing, cleaning, and maintaining the PPE for early-entry workers.

### RESTRICTIONS / PRECAUTIONS:

- Make only one (1) application per growing season.
- For use under this SLN label do not apply this product through any type of irrigation system.

### WSDA CONTAINER DISPOSAL GUIDANCE:

Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program website at [http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm](http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm). Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

This label for RO-NEET 6-E expires and must not be distributed or used in accordance with this SLN registration after December 31, 2013.

### TRI AG’s Special Conditions and Disclaimer for use of RO-NEET 6-E on Spinach.

All growers planning to apply RO-NEET 6-E to spinach grown for canning should attend the orientation meeting regarding this special use of RO-NEET 6-E hosted by Walla Walla Sweet Onion Growers Association.

TRI AG intends that this Section 24(c) label be distributed by the Walla Walla Sweet Onion Growers Association only to end users and/or growers who agree in writing to the terms and conditions required by the Walla Walla Sweet Onion Growers Association including a waiver and release from all liability and indemnification by the user and/or grower of TRI AG, Walla Walla Sweet Onion Growers Association, and others for failure to perform and crop damage from the use of RO-NEET 6-E on spinach grown for canning. If such terms and conditions are unacceptable, return RO-NEET 6-E at once unopened.

This product when used on spinach grown for canning may lead to crop injury, loss, or damage. TRI AG recommends that the user and/or grower test this product in order to determine its suitability for such intended use. The Walla Walla Sweet Onion Growers Association and TRI AG make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated
with the use of this product. TRI AG intends that because of the risk of failure to perform or crop damage that all such use is at the user’s and/or grower’s risk, to the extent consistent with applicable law.

This Special Conditions and Disclaimer statement is required by TRI AG and is not required or enforced by the USEPA or the WSDA.
