General Information

Organic BioLink Acidifier & Penetrant is an organic acidifying agent for lowering the pH of spray solutions and increasing penetration of tank-mixed materials. It does not use corrosive mineral acids and is safe to use in spray equipment. It does not contain heavy metals that may inactivate companion products. Use of Organic BioLink Acidifier and Penetrant reduces pesticide and fertilizer degradation caused by alkaline hydrolysis. This product should always be added to the spray tank under agitation, and before the addition of any other products.

Directions for Use

Read and follow the precautions, restrictions and recommendation of product labels used with Organic BioLink Acidifier and Penetrant.

Recommended Use Rate:
Use Organic BioLink Acidifier and Penetrant at a rate of 1 to 3 teaspoons (5 to 15 mL) per gallon of water OR 1 to 3 pints per 100 gallons of finished spray solution depending upon desired final pH. Specific use rates will vary due to water quality variability (pH, alkalinity, hardness, etc.). In general, well water typically requires more acidifier due to naturally occurring mineral content. Whereas, surface waters require less acidifier. For precise pH adjustments, test spray solution with a pH meter or indicator strips.

Mixing Instructions:
1. A standard jar compatibility test should be conducted before using any new mixes.
2. Shake well before using.
3. Fill spray apparatus ½ full of water.
4. Add products in the following sequence:
   (1) Organic BioLink Acidifier and Penetrant
   (2) Dry flowables or water dispersing granules
   (3) Wettable powders
   (4) Flowables
   (5) Liquid solutions
   (6) Emulsifiable concentrates
   (7) Surfactants.
5. Fill spray apparatus with other half of desired water amount.
6. Shake or agitate vigorously. If spray solution has been allowed to stand, thoroughly agitate and remix before application. Apply spray solution within 12 hours of mixing.

WARNING: Keep Out Of Reach of Children. Liquid causes eye injury. Avoid contact with skin, eyes or clothing. Wear eye protection and gloves. Wear long sleeved shirt, long pants, shoes plus socks. Avoid breathing spray mist. Wash thoroughly with soap and water after handling.

Storage and Disposal: Store out of direct sunlight and at temperatures above freezing (0ºC). Rinse and offer empty container for recycling or reconditioning or dispose of in a sanitary landfill.

Notice of Warranty - Westbridge warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of Westbridge. In no case shall Westbridge be liable for consequential, special or indirect damages resulting from the use or handling of this product. Westbridge makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.
