NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

This product is a phosphate-free, pH neutral formulation designed to provide effective cleaning, deodorizing, and disinfection for hospitals, nursing homes, schools, transportation terminals, office buildings, lodging establishments, retail business, athletic/recreation facilities, sports stadiums, and convention centers where housekeeping is of prime importance in controlling cross-contamination.

This product, when used as directed, is formulated to disinfekt hard, non-porous, inanimate, environmental surfaces: floors, walls, glazed porcelain, glazed ceramic tile, plastic surfaces, vanity tops, shower stalls, bathtubs, and cabinets.

This product deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls, and other areas which are prone to odors caused by microorganisms.

This product is formulated to a neutral pH and will not dull high-gloss floor finishes with repeated use.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is not for use on critical and semi-critical medical device surfaces.

DISINFECTION: To disinfect inanimate, hard non-porous surfaces add 1/2 ounce of this product per gallon of water. Apply solution with a mop, cloth, sponge, hand pump trigger sprayer or low pressure hose spray so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes, then remove excess liquid. For sprayer applications, spray 6-8 inches from surface, rub with brush, sponge or cloth. Do not breathe spray mist. For heavily soiled areas, a pre-cleaning step is required.

BACTERICIDAL STABILITY OF USE-SOLUTION: Tests confirm that this product when diluted at 1/2 ounce per gallon in hard water up to 400 ppm (as CaCO3) remains effective against Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica for up to 1 month when stored in a sealed container such as a spray bottle at room temperature. If the product becomes visibly dirty or contaminated, the use-solution must be discarded and fresh use-solution prepared. Always use clean, properly labeled containers when diluting this product. Bactericidal stability of the use-solution does not apply to open containers such as buckets or pails.

Non-Acid Toilet Bowl Disinfection/Cleaner Directions: Remove grossfilm prior to disinfection. From use-solution: Empty toilet bowl or urinal and apply 1/2 ounce per gallon use-solution to exposed surfaces, brush or scrub thoroughly under the rim with a cloth, mop, sponge or sprayer, allow to stand for 10 minutes and flush.
