RESTRICTED USE PESTICIDE
TOXIC TO FISH, MAMMALS, AND AQUATIC ORGANISMS
FOR RETAIL SALE TO AND USE ONLY BY CERTIFIED APPLICATORS OR PERSONS UNDER THEIR DIRECT SUPERVISION, AND ONLY FOR THOSE USES COVERED BY THE CERTIFIED APPLICATOR'S CERTIFICATION.

GROUP 6 INSECTICIDE

Agri-Mek 0.15EC

Miticide/Insecticide
Active Ingredient:
Abamectin 2.0%
Other ingredients:
98.0%
Total:
100.0%

1 CAS No. 65195-56-4 and No. 65195-55-3
*1 gal. contains 0.15 lb. abamectin

KEEP OUT OF REACH OF CHILDREN.
WARNING AVISO
Si usted no entiende la etiqueta, busque a alguien para que le explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)
See additional precautionary statements and directions for use in booklet.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

WARNING/AVISO

May be fatal if swallowed. Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Harmful if inhaled or absorbed through the skin. Avoid breathing spray mist or contact with skin. Prolonged or frequently repeated exposure may cause allergic skin reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category B on an EPA chemical-resistance category selection chart.

Applicators and other handlers must wear:
- Coveralls worn over short-sleeved shirt and short pants
- Chemical-resistant gloves – EPA chemical-resistance category B (e.g., barrier laminate or butyl rubber ≥14 mils)
- Chemical-resistant footwear plus socks
- Protective eyewear
- Chemical-resistant headgear for overhead exposure
- Chemical-resistant apron when cleaning equipment, mixing, or loading

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.
The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of SYNGENTA CROP PROTECTION, Inc. or Seller. To the extent permitted by applicable law, Buyer and User agree to hold SYNGENTA and Seller harmless for any claims relating to such factors.

SYNGENTA warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. To the extent permitted by applicable law: (1) this warranty does not extend to the use of the product contrary to label instructions, or under conditions not reasonably foreseeable to or beyond the control of Seller or SYNGENTA, and (2) Buyer and User assume the risk of any such use. TO THE EXTENT PERMITTED BY APPLICABLE LAW, SYNGENTA MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS WARRANTED BY THIS LABEL.

To the extent permitted by applicable law, in no event shall SYNGENTA be liable for any incidental, consequential or special damages resulting from the use or handling of this product. TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF SYNGENTA AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF SYNGENTA OR SELLER, THE REPLACEMENT OF THE PRODUCT.

SYNGENTA and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitation of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of SYNGENTA.

**DIRECTIONS FOR USE**

**RESTRICTED USE PESTICIDE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.
SPRAY DRIFT

Responsibility
Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment and weather related factors determine the potential for spray drift. The applicator is responsible for considering all of these factors when making application decisions.

NOTE: When states have more stringent regulations, they must be observed.

Spray Drift Precautions for Application with Aircraft or Ground Application Equipment
• Apply Agri-Mek 0.15 EC only when wind velocity favors on target product deposition (approximately 3 to 10 mph).
• Do not apply with ground application equipment within 25 ft. of or with aircraft within 150 ft. of lakes, reservoirs, rivers, permanent streams, marshes, pot holes, natural ponds, estuaries, or commercial fish farm ponds.
• Do not cultivate within 25 ft. of the aquatic area to allow growth of a vegetative filter strip.
• Do not allow this product to drift onto non-target areas. Drift may result in illegal residues or injury to nontarget species. Risk of exposure to sensitive areas can be reduced by applying this product when the wind direction is away from the sensitive area.
• Do not apply when the weather conditions may cause drift.
• Avoid application when the temperature is high and/or the humidity is low. These conditions increase the evaporation of spray droplets and the likelihood of drift to aquatic areas.
• Do not apply when wind speed or wind gusts are greater than 15 mph.
• Do not apply when wind speed is below 2 mph because wind direction will vary and there is a high potential for inversion.
• Observe the following precautions when using ground application to spray tree crops or hops in the vicinity of aquatic areas such as lakes, reservoirs, permanent streams, marshes, potholes, natural ponds, estuaries, or commercial fish ponds:
  ◦ Do not apply Agri-Mek 0.15 EC when weather conditions favor drift to aquatic areas
  ◦ Do not apply within 110 ft. upwind of aquatic areas or when wind speed is above 8 mph.
  ◦ Spray last 3 rows windward of aquatic areas using nozzles on one side only, with spray directed away from the aquatic areas.
  ◦ Avoid spray going over tops of trees by adjusting or turning off top nozzles. Shut off nozzles on the side away from the grove/orchard when spraying the outside row. Shut off nozzles when turning at ends of row and passing tree gaps in rows.
• **Boom Length**
  For some use patterns, reducing the effective boom length to less than 3/4 of the wing-span or rotor length may further reduce drift without reducing swath width.

• **Application Height**
  Applications should not be made at a height greater than 10 ft. above the top of the target plants unless a greater height is required for aircraft safety. Making applications at the lowest height that is safe reduces exposure of droplets to evaporation and wind.

• **Swath Adjustment**
  When applications are made with a cross wind, the swath will be displaced downwind. Therefore, on the up and downwind edges of the field, the applicator must compensate for this displacement by adjusting the path of the aircraft upwind.

• **Wind**
  Drift potential is lowest between wind speeds of 2-10 mph. However, many factors, including droplet size and equipment type determine drift potential at any given speed. Application must be avoided below 2 mph due to variable wind direction and high inversion potential.

  NOTE: Local terrain can influence wind patterns. Every applicator should be familiar with local wind patterns and how they affect spray drift.

• **Temperature and Humidity**
  To compensate for evaporation when applying Agri-Mek 0.15 EC in low relative humidity, set up equipment to produce larger droplets. Evaporation of droplets is most severe when conditions are both hot and dry.

• **Temperature Inversions**
  Agri-Mek 0.15 EC must not be applied during a temperature inversion because the potential for drift is high. Temperature inversions restrict vertical air mixing, and this causes small, suspended droplets to remain in a concentrated cloud. This cloud can move in unpredictable directions due to the light variable winds that are common during inversions. Temperature inversions are characterized by temperatures that increase with altitude and are common on nights with limited cloud cover and light to no wind. Inversions begin to form as the sun sets and often continue into the morning. Their presence can be indicated by ground fog; however, if fog is not present, the movement of smoke from a ground source or an aircraft smoke generator can also identify inversions. Smoke that layers and moves laterally in a concentrated cloud (under low wind conditions) indicates an inversion, while smoke that moves upward and rapidly dissipates, indicates good vertical air mixing.

**Resistance Management**
  Agri-Mek 0.15 EC is a Group 6 insecticide (contains the active ingredient abamectin). Because of the inherent risks of pests developing resistance to any product, it is strongly advised that Agri-Mek 0.15 EC be used in a sound resistance management program. Treatment may not be effective against labeled pests if insect or mite-tolerant strains develop. When applying Agri-Mek 0.15 EC to plants that are hosts of labeled pests with multiple generations per crop per year, use resistance management practices.
## Apples

<tbody>
<tr>
<td>European red mite</td>
<td>2.5-5.0</td>
<td>10-20</td>
<td>- Apply Agri-Mek 0.15 EC when spider mite or insect thresholds are reached.</td>
</tr>
<tr>
<td>McDaniell spider mite</td>
<td></td>
<td></td>
<td>- A second application may be made if needed to maintain control. (See Use Restrictions.)</td>
</tr>
<tr>
<td>Tentiform leafminer</td>
<td></td>
<td></td>
<td>- Spider Mites: For best results, apply before a threshold of 5 spider mites per leaf is reached. Residual spider mite control with Agri-Mek 0.15 EC in combination with horticultural spray oil (not a dormant oil) is greater from spray deposits on newer leaves compared to older. Applications of Agri-Mek 0.15 EC for spider mite control should be limited to a period extending from petal fall through 6 weeks following petal fall.</td>
</tr>
<tr>
<td>Twospotted spider mite</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>White apple leafhopper</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Horticultural Spray Oil</td>
<td>0.25% or 1 gal./A</td>
<td>Minimum of 1 gal./A</td>
<td>- Tentiform Leafminer: For best results, apply against egg (to control new hatch) and early sap feeder stages of first and second-generation tentiform leafminers when locally established thresholds have been reached. Do not apply during bloom.</td>
</tr>
<tr>
<td>(not a dormant oil)</td>
<td></td>
<td></td>
<td>- White Apple Leafhopper (Not for use west of the Rocky Mountains): Application of Agri-Mek 0.15 EC is limited only to first generation white apple leafhoppers. Apply soon after petal fall in combination with horticultural spray oil (not a dormant oil).</td>
</tr>
</tbody>
</table>

<sup>a</sup>The rate of Agri-Mek 0.15 EC per 100 gals. is based on a volume of 400 gals./A dilute spray.

<sup>b</sup>To determine the amount of product per acre for concentrate sprays, first determine the amount that would be required in a full cover dilute spray. Use the same amount of product/A in concentrate sprays as would be required for the dilute sprays to the same orchard/grove. This may result in use of less than 10 fl. oz./A on small trees.
## Avocados

**Use Restrictions - Avocados**

- **PHI**: Do not apply within 14 days of harvest.
- **Application Method**: Ground and aerial application permitted.
- **Amount of Water**: Do not apply in less than 100 gals. of water with ground application equipment or 50 gals. of water with aircraft.
- **Maximum Amount per Application**: Do not apply more than 20 fl. oz./A (or 0.023 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per application.
- **Application Interval**: Wait at least 30 days before repeating application.
- **Number of Applications**: Do not make more than 2 applications Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per season.
- **Maximum Amount per Season**: Do not apply more than 40 fl. oz./A (or 0.047 lb. ai./A) Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per season.
- **Grazing**: Do not allow livestock to graze in treated orchards.
Aerial Application

Aerial application is permitted only for control of citrus leafminer. Aerial application to citrus is not approved in California.

</tbody>
</table>

**Instructions**

- Apply Agri-Mek 0.15 EC with a minimum of 0.20% horticultural spray oil (not a dormant oil) in the spray mixture or not less than 1.0 gal. of oil/A (except when specified differently below).
- **Asian Citrus Psyllid:** Apply Agri-Mek 0.15 EC to protect newly expanding foliage flush during the spring, summer or fall. Agri-Mek 0.15 EC will only control adults and nymphs present at the time of application.
- **Mites:** Apply when mites first appear during spring, summer, and/or fall.
- **Citrus Bud Mite:** For best results, time the spray at “bud swell.”
- **Citrus Leafminer:** Apply to protect new growth during spring, summer, or fall.
- **Citrus Thrips:** Application targeted for citrus thrips will only control the current generation and must be correctly timed. Apply when economic thresholds have been reached (after egg hatch has begun – preferably early to mid-hatch).

<sup>a</sup>The rate of Agri-Mek 0.15 EC per 100 gals. is based on a volume of 1,000 gals./A dilute spray.
<sup>b</sup>For concentrate sprays, adjust the dosage to apply an amount/A equal to that used in full cover dilute spray.
<sup>c</sup>Ground application: For best results, use 150-300 gals./A of spray mix with a minimum of 3 gal./A of horticultural oil (not a dormant oil) and apply at a ground speed of 1 to 1.5 MPH.
<sup>d</sup>For best results, use a minimum of 500 gals./A of spray mix with a minimum of 0.5% horticultural spray oil (not a dormant oil).
<sup>e</sup>For best results, use 100-250 gals./A of spray mix applied to achieve outside coverage.

### Use Restrictions – Citrus Fruit Crop Group

- **PHI:** Do not apply within 7 days of harvest.
• Minimum Amount of Water: Do not apply in fewer than 5 gallons of water per acre. Use sufficient volume to insure thorough coverage.
• Maximum Amount per Application: Do not apply more than 16 fl. oz./A (or 0.019 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarily applied abamectin containing product per application.
• Application interval: Wait at least 21 days before repeating application.
• Maximum Amount per Season: Do not apply more than 32 fl. oz./A (or 0.038 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarily applied abamectin containing product per season.
• Grazing Restriction: Do not feed or allow livestock to graze treated cotton.

Cucurbit Vegetables Crop Group (Crop Group 9)

Crops in this group are: Chayote, Chinese waxgourd, Citron Melon, Cucumber, Gherkin, Edible Gourd, (includes hyotan, cucuzza, hechima, Chinese okra); Momordica spp., (includes balsam apple, balsam pear, bittlermelon, Chinese cucumber); Muskmelon (hybrids and/or cultivars of Cucumis melo) includes true cantaloupe, cantaloupe, casaba, Crenshaw melon, golden pershaw melon, honeydew melon, honey balls, mango melon, Persian melon, pineapple melon, Santa Claus melon, and snake melon), Pumpkin, Summer Squash (includes crookneck squash, scallop squash, straightneck squash, vegetable marrow, zucchini), Winter Squash (includes butternut squash, calabaza, hubbard squash, acorn squash, spaghetti squash), Watermelon (includes hybrids and/or varieties of Citrullus lanatus).

For Control of Leafminers and Spider Mites

Mix with water as indicated below. Thorough coverage of the crop canopy is essential for optimum results. Inadequate coverage may result in reduced control.

Note:
• Agri-Mek 0.15 EC may be applied with ground application equipment or aircraft.
• For best control of mites, apply Agri-Mek 0.15 EC with ground application equipment. With aerial application, spray coverage and the resulting control of mites is less than with ground application. For this reason, the user accepts all liability for the level and duration of control of mites when Agri-Mek 0.15 EC is aerially applied.

## Use Restrictions – Fruiting Vegetables Crop Group

- **PHI**: Do not apply within 7 days of harvest.
- **Application Method**: Ground or aerial application permitted; however do not apply with aircraft in New York State.
- **Prohibited Use**: For resistance management, do not use on fruiting vegetables grown for transplanting.
- **Amount of Water**: Do not apply in less than 20 gals. of water/A with ground application equipment. Do not apply in less than 5 gals. of water/A with aircraft. Under conditions such as high pest populations, dense foliage, or adverse application conditions (such as high temperatures) use a greater volume of water to insure adequate coverage.
- **Maximum Amount per Application**: Do not apply more than 16 fl. oz./A (or 0.019 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per application.
- **Application Interval**: Wait at least 7 days before repeating application.
- **Number of Applications**: Do not make more than 2 sequential applications of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product.
- **Maximum Amount per Season**: Do not apply more than 48 fl. oz./A (or 0.056 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product in a growing season.
- **Maximum Amount per Application:** Do not apply more than 16 fl. oz./A (or 0.019 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per application.
- **Application Interval:** If a second application is necessary, wait at least 21 days before repeating application.
- **Number of Applications:** Do not make more than 2 applications of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per growing season.
- **Maximum Amount per Season:** Do not apply more than 32 fl. oz./A (0.038 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product in a growing season.
- **Grazing:** Do not allow livestock to graze in treated vineyards.

**Herb Crop Subgroup (Crop Subgroup 19A) (Except Chives)**

Crops in this subgroup are: Angelica, Balm, Basil, Borage, Burnet, Camomile, Catnip, Chervil (dried), Clary, Coriander (leaf), Cilantro (leaf), Costmary, Culantro (leaf), Curry (leaf), Dill weed, Horehound, Hyssop, Lavender, Lemongrass, Lovage (leaf), Marigold, Marjoram (*Origanum* species), Nasturtium, Parsley (dried), Pennyroyal, Rosemary, Rue, Sage, Summer and Winter savory, Sweet bay, Tansy, Tarragon, Thyme, Wintergreen, Woodruff, and Wormwood.

For control of *Liriomyza* leafminers

Mix with water as indicated below. Apply thoroughly with ground application equipment as a foliar spray and ensure good upper and lower leaf coverage.

**Herb Crop Subgroup (Except Chives)**

<table>
<thead>
<tr>

<th>fl. oz./A.</th>
<th>Instructions</th>
</tr>
</thead>
</table>
| *Liriomyza* leafminers| 8.0-16.0   | • Use 8 fl. oz./A for low to moderate infestations and 16 fl. oz./A for severe infestations.  
• Apply when adult flies are first observed and repeat application, as necessary to maintain control. (See Use Restrictions.)  
• Agri-Mek 0.15 EC may be used without a wetting agent. When necessary to improve the wetting of foliage and to smooth out spray deposits, a nonionic surfactant is recommended.  
• **Note:** Although Agri-Mek 0.15 EC has been tested in combination with a nonionic surfactant for safety to herbs, it is impossible to test on all herb types and varieties under the variety of conditions that may cause crop injury. Therefore, when using Agri-Mek 0.15 EC in combination with a nonionic surfactant, carefully follow the Directions for Use and Precautions on the nonionic surfactant label and in official spray guides. |
• Maximum Amount per Application: Do not apply more than 16 fl. oz./A (or 0.019 lb ai./A) of Agri-Mek 0.15 EC or any other foliarily applied abamectin containing product per application.
• Maximum Number of Applications: Do not make more than 2 applications Agri-Mek 0.15 EC or any other foliarily applied abamectin containing product per growing season.
• Grazing: Do not allow livestock to graze in treated hops yards.

Leafy Vegetables (except Brassica vegetables) Crop Group (Crop Group 4)
Crops in this group are: Amaranth (leafy Amaranth, Chinese spinach, tampala); Arugula (Roquette); Cardoon; Celery; Cettuce; Chervil; Chinese celery; Chrysanthemum, edible leaved and garland; Corn salad; Cress, garden and upland (yellow rocket and winter cress); Dandelion; Dock (Sorrel); Endive (escarole); Florence fennel; Lettuce, head and leaf; New Zealand Spinach; Orach; Parsley; Purslane, garden and winter; Radicchio (red chicory); Rhubarb; Spinach; Vine spinach; and Swiss chard.
For Control of Carmine spider mite, Liriomyza leafminers, and Twospotted spider mite
Mix with water as indicated below. Thorough coverage of the crop canopy is essential for optimum results. Inadequate coverage may result in reduced control.

Note: Agri-Mek 0.15 EC may be applied with ground application equipment or aircraft. For best control of mites, apply Agri-Mek 0.15 EC with ground application equipment. With aerial application, spray coverage and the resulting control of mites is less than with ground application. For this reason, the user accepts all liability for the level and duration of control of mites when Agri-Mek 0.15 EC is aerially applied.

Under conditions such as high pest populations, dense foliage, or adverse application conditions such as high temperatures, use a greater volume of water to insure adequate coverage.

• Maximum Amount per Application: Do not apply more than 12 fl. oz./A (or 0.014 lb. ai./A) of Agri-Mek 0.15EC or any other foliarly applied abamectin containing product per application.

• Application Interval: Wait at least 7 days before repeating application.

• Number of Applications: Do not make more than 2 sequential applications of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product and do not apply more than 3 applications per season.

• Maximum Amount per Season: Do not apply more than 36 fl. oz./A (or 0.042 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per crop per season.

• Grazing: Do not allow livestock to graze or feed treated foliage to livestock.

Pears (including Oriental pear trees)
For control of European red mite, McDaniel spider mite, Pear psylla, Pear rust mite, Twospotted spider mite, and Yellow mite
Agri-Mek 0.15 EC may be applied using conventional dilute or concentrate ground application sprayers calibrated to deliver sufficient water for thorough coverage. Gallons of spray will vary with size and number of trees per acre and density of foliage. In any case, thorough coverage is essential for good spider mite and insect control.

NOTE:
• For best results, apply in combination with horticultural spray oil (not a dormant oil) as directed. Applications without horticultural spray oil may result in reduced efficacy and/or residual control.

• When using Agri-Mek 0.15 EC plus horticultural spray oil, carefully follow the Directions for Use and Precautions on the horticultural spray oil label as well as the precautions in official spray guides or on product labels. For example, applying Agri-Mek 0.15 EC plus horticultural spray oil fewer than 14 days before or after applying Captan® can result in phytotoxicity and crop loss.
Stone Fruit Crop Group (Crop Group 12)

Crops in this group are: apricot; cherry (sweet and tart); nectarine; peach; plum; plum (chickasaw, damson, and Japanese); plumcot, and prune (fresh)

For control of European spider mite, Pacific spider mite, and Twospotted spider mite

Agri-Mek 0.15 EC may be applied using conventional dilute or concentrate sprayers calibrated to deliver sufficient water for thorough coverage. Gallons of spray will vary with size and number of trees per acre and density of foliage. In any case, thorough coverage is essential for good spider mite control.

- Apply when mites first appear.
- A second application may be made, if needed, to maintain control. (See Use Restrictions.)
- Always apply Agri-Mek 0.15 EC in combination with a nonionic surfactant that spreads on and/or penetrates the leaf cuticle, or apply with horticultural spray oil (not a dormant oil).

**NOTE:**

1) A nonionic surfactant that spreads on and/or penetrates the leaf cuticle can improve insect control. Although Agri-Mek 0.15 EC has been tested in combination with nonionic surfactants for safety to stone fruit, it is impossible to test on all stone fruit varieties under the variety of conditions that may cause crop injury. Therefore, when using Agri-Mek 0.15 EC in combination with a nonionic surfactant, carefully follow the Directions for Use and Precautions on the surfactant label and in official spray guides.
Strawberries
For control of Strawberry spider mite and Twospotted spider mite
Mix with water as indicated below. Apply with ground application equipment as a foliar spray and insure thorough coverage on upper and lower leaf surfaces. Adjust spray volume and nozzle placement to insure maximum coverage of tops and undersides of leaves.

<table>
<thead>
<tr>
<th>Pest</th>
<th>fl. oz./A</th>
<th>Instructions</th>

<td>• Make 2 applications 7-10 days apart when mites first appear. Repeat this application sequence, if needed, to maintain control. <em>(See Use Restrictions.)</em></td>
</tr>
<tr>
<td>Twospotted spider mite</td>
<td></td>
<td>• <strong>Note:</strong> Agri-Mek 0.15 EC may be used without a wetting agent. When necessary to improve the wetting of foliage and to smooth out spray deposits, a nonionic surfactant is recommended.</td>
</tr>
</tbody>
</table>

Use Restrictions – Strawberries
- **PHI:** Do not apply within 3 days of harvest.
- **Application Method:** Ground application only. Do not apply with aircraft.
- **Prohibited Use:** For resistance management purposes, do not use in strawberry nurseries.
- **Amount of Water:** Do not apply in less than 50 gals. of water/A with conventional ground application equipment. When using electro-static sprayers do not apply in less than 10 gallons of water/A.
- **Maximum Amount per Application:** Do not apply more than 16 fl. oz./A (or 0.019 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per application.
- **Application Interval:** Wait at least 21 days after the second application before repeating application.
- **Maximum Amount per Season:** Do not apply more than 64 fl. oz./A (or 0.075 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product in a growing season.
• Maximum Amount per Application: Do not apply more than 20 fl. oz./A (or 0.023 lb. ai./A) of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per application.

• Applications per Season: Do not make more than 2 applications of Agri-Mek 0.15 EC or any other foliarly applied abamectin containing product per growing season.

• Maximum Amount per Season: Do not apply more than 40 fl. oz./A (or 0.047 lb. ai./A) of Agri-Mek or any other foliarly applied abamectin containing product in a growing season.

• Grazing: Do not allow livestock to graze in treated groves/orchards.

Tuberous and Corm Vegetables Crop Subgroup (Crop Subgroup 1C)

Crops in this subgroup are: arracacha; arrowroot; artichoke, Chinese; artichoke, Jerusalem; canna, edible; cassava (bitter and sweet); chayote (root); chufa; dasheen; ginger; leren; potato; sweet potato; tanier; turmeric; yam bean; and yam (true).

For control of Colorado potato beetle, *Liriomyza* leafminers, Potato psyllid, and Spider mites

Mix with water as indicated below. Thorough coverage of the crop canopy is essential for optimum results. Inadequate coverage may result in reduced control.

**Note:** Agri-Mek 0.15 EC may be applied using ground application equipment or aircraft. For best control of mites, apply Agri-Mek 0.15 EC with ground application equipment. With aerial application, spray coverage and the resulting control of mites is less than with ground application. For this reason, the user accepts all liability for the level and duration of control of mites when Agri-Mek 0.15 EC is aerially applied.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

Pesticide Storage
Store in a tightly closed container in a cool, dry place.

Pesticide Disposal
Waste resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Handling
Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

WARNING/AVISOS
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Precautionary Statements
Hazards to Humans and Domestic Animals
WARNING/AVISOS

May be fatal if swallowed. Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Harmful if inhaled or absorbed through the skin. Avoid breathing spray mist or contact with skin. Prolonged or frequently repeated exposure may cause allergic skin reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

Environmental Hazards
This pesticide is toxic to fish and wildlife. For terrestrial uses: do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from target areas. Do not contaminate water when disposing of equipment wash water or rinseate. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

Use of this product may pose a risk to threatened and endangered species of fish, amphibians, crustaceans (including fresh water shrimp), and insects. All use of this product in the state of California should comply with the recommendations of the California Endangered Species Project. Before using this product in California, consult with your county agriculture commissioner to determine use limitations that apply in your area.

Physical or Chemical Hazards
Do not use or store near heat or open flame.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.
