INDUSTRIAL RECIRCULATING COOLING WATER SYSTEMS: For the control of bacteria, algae, and fungi, add KTND microbicide to the tower, distribution box, or any other point to ensure uninhibited flow. Initial Dose: If the system is normally flocked, apply 144 to 883 ppm KTND microbicide (3.2 to 17.6 fluid ounces to 10 or 113 fluid ounces of KTND per 1,000 gallons of water in the system). Repeat until control is achieved. Subsequent Dose: When microbial control is evident, add 35 to 219 ppm KTND microbicide (0.3 to 1.86 pounds or 4.5 to 28 fluid ounces of KTND per 1,000 gallons of water in the system) weekly or as needed to maintain control. Badly fouled systems must be cleaned before initial treatment. AIR WASH SYSTEMS: Add to the air washer sump or dirt irrigating system, to ensure uninhibited flow. 35 to 883 ppm KTND microbicide (0.3 to 17.6 fluid ounces to 113 fluid ounces of KTND per 1,000 gallons of water in the system) depending upon the severity of contamination to control bacteria, fungi, and algae which cause fouling in industrial air washer systems. INTEREST IN OIL SLUG REMOVAL: Initial Dose: When the system is normally flocked, apply 144 to 883 ppm KTND microbicide (3.2 to 17.6 fluid ounces to 10 or 113 fluid ounces of BUSAN 1078 per 1,000 gallons of water in the system). Repeat until control is achieved. Subsequent Dose: When microbial control is evident, add 35 to 219 ppm KTND microbicide (0.3 to 1.86 pounds or 4.5 to 28 fluid ounces of KTND per 1,000 gallons of water in the system) weekly or as needed to maintain control. CONTINUOUS FEED METHOD: Initial Dose: When the system is just normally flocked, apply 144 to 883 ppm KTND microbicide (0.3 to 1.86 pounds or 4.5 to 28 fluid ounces of KTND per 1,000 gallons of water in the system). Subsequent Dose: Maintain this treatment level by adding a continuous feed microbicide at a rate of 0.07–0.1 pound (2.5–3.8 fluid ounces of KTND) per 1,000 gallons of water per week. weekly or as needed to maintain control.

KEEP OUT OF REACH OF CHILDREN DANGER PELIGRO FIRST AID

If in Eyes

• Hold eye open and rinse slowly and gently with water for 15–20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If in Skin, Hair or Clothing

• Take off contaminated clothing.
• Wash skin with soap and water or clean soap and water.
• If splashed on the face or eyes, wash with soap and water or clean soap and water.

If swallowed

• Have person sip a glass of water, if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.

Do not give anything by mouth to an unconscious person.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
