DIRECTIONS FOR USE

Cobra™ Rods are for remedial treatment of utility pole structures, dimensional lumber (round stock, square stock) or any non-food contact piece of wood. Cobra™ Rods are recommended for protection against fungal decay and insects. Cobra™ Rods can be used for all wood species.

Cobra™ Rods are effective against some kinds of termites. Cobra™ Rods are used internally in wood with a permanent or periodic moisture content above the fibre saturation point (30%) for Poles, etc. The rate of application for Cobra™ Rods is dependent upon the volume of wood to be treated. The recommended load is up to 6 oz. Boric Acid per cubic foot of wood. Cobra™ Rods contain 1.39 times equivalent Boric Acid (BAE).

To install Cobra™ Rods, the three step process is as follows:
1. Drill holes to accommodate the rod size needed.
2. Insert the correct size and quantity of Cobra™ Rods needed into the pre-drilled holes (determined from area to be treated).
3. Leave enough headroom to accommodate a 1/16" oversize plug. Never hammer the Cobra™ Rods during installation. Avoid dust formation. Do not break, crush, grind, mill or powder this product.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Inspections can be carried out every 5-8 years for industrial wood and every 6-10 years for commercial wood. If reusable plugs are used new rods may be inserted into the existing holes during the reinspection process and the same plugs tapped back into place. The angle at which the rods are installed should be 45° for commercial wood and 60-80° for industrial (large round stock) wood using a drill guide as the guideline zone. This will ensure the rods as placed in the most advantageous location for best diffusion results. The sapwood and heartwood interface in the outer shell is the best area, ensuring chemical loads are sufficient to provide adequate decay protection. If the wood is decayed sufficiently to be condemned and no reinforcement is mandated, DO NOT install Cobra™ Rods. Be careful during installation to not cause unnecessary structural damage to the wood during installation of rods.

Cobra™ Rods are placed into holes drilled in wood at specific locations and depend upon moisture to work. The rods are positioned so that moisture distributes the desired loadings throughout the target area. For remedial treatments of existing decay 6 oz. of Boric Acid Equivalent (BAE) per cubic foot of wood is recommended. For preventative treatments, 2 BAE/cuft is sufficient.

GENICS INC.
Cobra™ Rod

Wood Preservative for Remedial Treatment of Utility Poles, Posts, Piling Millwork, Decks, Window Joinery and any non-food contact piece of wood.

Protection of Wood Against Fungal Decay and Insects

KEEP OUT OF REACH OF CHILDREN CAUTION

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if worn, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center or doctor.

Precautionary Statements
Hazards to Humans and Domestic Animals: Harmful if swallowed. Avoid contact with eyes and skin. Avoid rubbing eyes while working with product. Avoid breathing dust, use only in well ventilated area.

Personal Protective Equipment (PPE): Applicators and other handlers must wear: Long-sleeved shirt and long pants, shoes and socks. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have become drenched or heavily contaminated with this product’s concentrate. Do not reuse them.

User Safety Recommendations
Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

Storage and Disposal
Do not contaminate water, food, or feed by storage or disposal. Storage: Store in a dry location at all times, out of reach of children and out of contact with food or feed. Disposal: Excess rods may be disposed on site or at an approved waste disposal facility. Container Disposal: Non-refillable container. Do not re-fill or re-use. If empty, offer for recycling if available or dispose of packaging in a sanitary landfill through ordinary trash collection, by incineration or if allowed by state and local authorities by burning. If burned, stay out of smoke. If partly filled, dispose of on-site or call 1-800-CLEANUP or local authorities for disposal instructions.

CONTAINS INGREDIENTS LISTED BELOW FUSED AT HIGH TEMPERATURE TO FORM WATER SOLUBLE, CLEAR HARD AND GLASS-LIKE ROD. COMPARED TO THE CRYSTALLINE INGREDIENTS, THE GLASSY RODS FUNCTION AS A SLOW RELEASE SYSTEM. Cobra™ Rods ARE MANUFACTURED IN DIFFERENT SIZES AND WEIGHTS INCLUDING SMALL WAFFERS AND PELLETS.

ACTIVE INGREDIENTS:
- Disodium Octaborate Tetrahydrate: 90.6%
- Boric Acid: 4.7%
- Cupric Hydroxide: 1.8%

INERT INGREDIENTS: 1.8%
TOTAL: 100.0%
