PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: HIGHLY CORROSIVE. CAUSES SKIN AND EYE DAMAGE. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves ( PVC or Nitrile) when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using the toilet. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewerage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS
STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. Homemade Disposal: Store in a cool, dry area away from direct sunlight. In case of a spill, flood area with large quantities of water. Disposal of Product: Do not dispose of this container in any manner. It may be contaminated with the product. Empty remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container with water and reca. Shake for 10 seconds. Pour reca. into application equipment or a mix tank or store for future use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

THIS PRODUCT MAY BE USED FOR NON-FESTICIDAL USES SUCH AS:
- Oxidizing organics
- Bleaching
- Whitening
- Chlorine source
- Reducing color
- Controlling iron and manganese
- Reducing Total Organic Carbon (TOC)

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID
- IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
- IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
- IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do by a poison control center or doctor.
- IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may compromise the use of gastric lavage. Measures against circulatory shock, respiratory depression and coagulation may be needed. Have the product container or label with you when calling a poison control center or a doctor, or going for treatment.

SEE OTHER PRECAUTIONARY STATEMENTS ON SIDE PANEL BEFORE OPENING CONTAINER.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labelling.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

FOR THE CONTROL OF BACTERIA, ALGAE AND FUNGI, ADD THE SODIUM HYPOCHLORITE SOLUTION TO THE TOWER BASIN. DISTRIBUTIONS TO SOME OTHER POINT IN THE SYSTEM TO ENSURE UNIFORM MIXING.

COOLING TOWER, EVAPORATIVE CONDENSER WATER, PULP AND PAPER MILL, AND INDUSTRIAL WATER SYSTEMS

SLUG FEED METHOD
Initial Dose: When the system is noticeably foamy, add sufficient amount of NALCO 7341 per 10,000 gallons of water in the system to obtain 5 to 10 ppm available chlorine. Repeat until control is achieved. Badly foamed systems must be cleaned before treatment is begun.

Subsequent Dose: When microbial control is evident, add sufficient amount of NALCO 7341 per 10,000 gallons of water in the system daily, or as needed to maintain control and keep the chlorine residual at 1 ppm.

INTERMITTENT FEED METHOD
Initial Dose: When the system is noticeably foamy, add sufficient amount of NALCO 7341 per 10,000 gallons of water in the system to obtain 5 to 10 ppm available chlorine. Apply half (0.5) of this initial dose when half (0.5) of the water in the system has been lost by blowdown. Badly foamed systems must be cleaned before treatment is begun.

Subsequent Dose: When microbial control is evident, add sufficient amount of NALCO 7341 per 10,000 gallons of water in the system to obtain 5 to 10 ppm available chlorine. Apply half (0.5) of this initial dose when half (0.5) of the water in the system has been lost by blowdown.

CONTINUOUS FEED METHOD
Initial Dose: When the system is noticeably foamy, add sufficient amount of NALCO 7341 per 10,000 gallons of water in the system to obtain 5 to 10 ppm available chlorine. Badly foamed systems must be cleaned before treatment is begun.

Subsequent Dose: Maintain this treatment level by starting a continuous feed of 1 oz. of NALCO 7341 per 1,000 gallons of water lost by blowdown to maintain a 1 ppm residual.

Revised: 3/4/2014

UN1791, Hypochlorite solution, 8, PG III [RQ component: sodium hypochlorite; RQ amount: 800 lbs]
PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGERS:
HIGHLY CORROSIVE. CAUSES SKIN AND EYE DAMAGE. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves (PVC or Nitrile) when handling this product. Washagher with soap and water after handling and before eating, drinking, chewing gum, or using the toilet. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, oceans, or other waterways unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and the permitting authority that has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS
STONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gram fillers such as sawdust, urea, etc., or with ammonia, acids, detergents or other chemicals will release hazardous gases irritating to eyes, lungs and mucous membranes.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

Pesticide Disposal: Washes resulting from the use of this product may be disposed of on site or on an approved waste disposal facility.

Container Disposal: Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Triple rinse (or equivalent) container promptly after emptying. Triple rinse as follows: Empty remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Pressure and then closing the container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its side and tip it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinses for later use or disposal. Repeat this procedure two or more times.

THIS PRODUCT MAY BE USED FOR NON-PESTICIDAL USES SUCH AS:
- Oxidizing organic
- Bleaching
- Whitening
- Chlorine source
- Staining color
- Controlling iron and manganese
- Reducing Total Organic Carbon (TOC)

Naperville, IL 60543-1198
EMERGENCY PHONE NO. (800) 424-9300

Revised: 3/4/2014

UN1791, Hypochlorite solution, 8, PG III [RQ component: sodium hypochlorite; RQ amount: 800 lbs]

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage as necessary to maintain the required level of available chlorine.

COOLING TOWER, EVAPORATIVE CONDENSER WATER, PULP AND PAPER MILL AND INDUSTRIAL WATER SYSTEMS

SLUG FEED METHOD

Initial Dose: When the system is obviously fouled, add appropriate amount of NALCO 7341 per 10,000 gallons of water in the system to obtain 5 to 10 ppm available chlorine. Repeat until control is achieved. Badly fouled systems must be cleaned before treatment is begun.

Subsequent Dose: When microbial control is evident, add appropriate amount of NALCO 7341 per 10,000 gallons of water in the system daily, or as needed to maintain control and keep the chlorine residual at 1 ppm.

INTERMITTENT FEED METHOD

Initial Dose: When the system is noticeably fouled, add appropriate amount of NALCO 7341 per 10,000 gallons of water in the system to obtain 5 to 10 ppm available chlorine. Apply half (or 1/2, 1/4, or 1/3) of this initial dose when half (or 1/2, 1/4, or 1/3) of the water in the system has been lost by blowdown. Badly fouled systems must be cleaned before treatment is begun.

Subsequent Dose: When microbial control is evident, add appropriate amount of NALCO 7341 per 10,000 gallons of water in the system to obtain a 1 ppm residual. Apply half (or 1/2, 1/4, or 1/3) of this initial dose when half (or 1/2, 1/4, 1/3) of the water in the system has been blown down.

CONTINUOUS FEED METHOD

Initial Dose: When the system is noticeably fouled, add appropriate amount of NALCO 7341 per 10,000 gallons in the system to obtain 5 to 10 ppm available chlorine. Badly fouled systems must be cleaned before treatment is begun.

Subsequent Dose: Maintain this treatment level by starting a continuous feed of 1 oz. of NALCO 7341 per 1,000 gallons of water lost by blowdown to maintain a 1 ppm residual.

DANGER: HIGHLY CORROSIVE. CAUSES SKIN AND EYE DAMAGE. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves (PVC or Nitrile) when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using the toilet. Avoid breathing vapor. Ventilate poorly ventilated areas as soon as possible. Do not return until odms have dissipated. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS
STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gases such as those, urine, etc., or with ammonia, acids, detergents or other chemicals will release hazardous gases, irritating to eyes, lungs and mucous membranes.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage, or disposal.
Pesticide Storage: Store in a cool, dry area away from direct sunlight. In case of a spill, flood area with large quantities of water.
Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
Container Disposal: Affilable container. Refill this container with pesticide only. Do not reuse this container for any other purpose. Closing the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or completely with the pump for 2 minutes. Pour or pump contents into application equipment or reuse collection system. Repeat this mixing procedure two more times.

THIS PRODUCT MAY BE USED FOR NON-PESTICIDAL USES SUCH AS:
- Oxidizing organics
- Bleaching
- Whitening
- Chlorine source
- Reducing color
- Controlling iron and manganese
- Reducing total organic carbon (TOC)
