Controls Bedbugs

Crawling Insect Control

CONTAINS DIATOMACEOUS EARTH

- Effective Long Lasting When Kept Dry.
- Controls Cockroaches, Ants, Earwigs, Crickets, Millipedes, Centipedes, Silverfish, Fleas, Carpet Beetles, Bedbugs, Grasshoppers, Slugs and Other Crawling Insects.
- For Outdoor and Indoor Household Use.

ACTIVE INGREDIENT:
- Diatomaceous earth. 95.0%
- Other elemental oxides. 10.0%
- Inert ingredients. 5.0%
- Total. 100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panel for additional precautionary statements.

NET WEIGHT 4 LBS. (1.8 KG)
Natural Guard

Crawling Insect Control
CONTAINS DIATOMACEOUS EARTH

FIRST AID

If inhaled: Do not induce vomiting. Get medical help immediately.

If swallowed: Call your poison control center or doctor. Do not give anything by mouth.

If in eyes: Remove any contact lenses. Wash out with water for 15 to 20 minutes. Get medical help immediately.

If on clothing: Remove clothing. Wash exposed clothing before reuse.

Detailed instructions for each situation are listed on the back of this label.

DON'T USE ON PLANTS - USE SPARINGLY - SEE INSTRUCTIONS ON BACK

PRECAUTIONARY STATEMENTS

HUMAN AND DOMESTIC ANIMALS

DIATOMACEOUS EARTH is intended for crawling insect control, including ants, roaches, silverfish, millipedes, slugs and snails in and around the home.

DIATOMACEOUS EARTH has proven effective as a highly concentrated and effective insecticide for the control of a variety of crawling insects and other pests, including ants, roaches, silverfish, millipedes, slugs and snails. It is safe to use around people, pets, and plants when used according to the directions on this label.

DIATOMACEOUS EARTH is recommended for use in and around the home, including kitchens, bathrooms, basements, attics, garages, and other areas where pests are commonly found. It should be applied directly to surfaces where pests are present, such as cracks and crevices, under cabinets, behind doors, and around baseboards.

DIATOMACEOUS EARTH is not to be used on plants or on ornamental plants. It should be stored in a cool, dry place out of reach of children and pets.

DIATOMACEOUS EARTH is safe to use around people, pets, and plants when used according to the directions on this label. It is effective against a wide range of crawling insects and other pests, including ants, roaches, silverfish, millipedes, slugs, and snails.

DIATOMACEOUS EARTH is not a systemic insecticide and will not kill pests that are not in direct contact with the product. It is an effective insecticide for the control of crawling insects and other pests, but it is not effective against flying insects.

DIATOMACEOUS EARTH should be applied sparingly to prevent overapplication and ensure effective control. Overapplication may lead to ineffective control and potential harm to beneficial insects and plants.

DIATOMACEOUS EARTH is not to be used on foods or food contact surfaces. It should be used in areas where it is unlikely to come into contact with food or food contact surfaces. It should be stored in a cool, dry place out of reach of children and pets.

DIATOMACEOUS EARTH is recommended for use in and around the home, including kitchens, bathrooms, basements, attics, garages, and other areas where pests are commonly found.
