NET WT.: 3 OZ.
Bait Tray (85 g)

1 Bait Tray

ACTIVE INGREDIENT:
Brodifacoum 3-(3,4'-bromo-1,1'-biphenyl)-4-y1
-1,2,3,4-tetrahydro-1-naphthalenyl
-4-hydroxy-2H-1-benzopyran-2-one................0.005%
INERT INGREDIENTS..........................99.995%
TOTAL:......................................100.000%

KILLS
WARFARIN-RESISTANT HOUSE MICE AND WARFARIN-RESISTANT NORWAY RATS
KEEP OUT OF REACH OF CHILDREN
CAUTION: SEE OUTER PACKAGE FOR DIRECTIONS AND ADDITIONAL INFORMATION.

FIRST AID

IF BAIT IS EATEN BY HUMANS
• CALL A PHYSICIAN AT ONCE. For 24 hour emergency assistance, call your local Poison Control Center.

IF BAIT IS EATEN BY ANIMALS OR PETS
• Call your local veterinarian.

NOTE TO PHYSICIAN AND VETERINARIAN

This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K₁ are indicated, as in poisoning from overdose of dicumarol (bishydroxycoumarin). FOR HUMAN CASES: Vitamin K₁ is antidotal at doses of 10 to 20 mg (not mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. FOR ANIMAL CASES: Vitamin K₁ is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K₁ should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.
