ONE U.S. GALLON
(3.785 L)

5580
BLUE

ACTIVE INGREDIENT
COPPER OXIDE
57.2%
NIGHT INGREDIENTS
32.8%
COPPER AS METALLIC 10.0%

CONTAINS PETROLEUM DISTILLATES

EPA REG NO. 9293-172
NOTE: MICRON CSC™ SHARK WHITE 5584 may strange color at the waterline. Color difference may occur between actual paint and color swatch on front of can.

UNDERWATER METALS: Contact the Interlux Technical Service Department at 1-800-468-7580 for full technical assistance. Repair imperfections with Interlux Walenite YAV135; sand and wipe clean. Apply first Interlux Fiberglass Solvent 202™; apply 2 or more coats of MICRON CSC®, allowing proper dry times. Sand any imperfections and repair with Interlux Waterline YAV135; sand and wipe clean. Apply at least 2 coats of MICRON CSC®, allowing proper dry times.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of loose paint and contaminants. Failure to properly clean the surface will result in paint delamination. MICRON CSC™ can be used below the waterline in fresh, salt or brackish water on fiberglass, wood and properly primed metal hull and parts. Do not use on aluminum.

COMPATIBILITY: MICRON CSC™ can be applied over most hard conventional antifouling paints as long as the old coating is tightly adhered and in sound condition. MICRON CSC™ should not be applied over MICRON® 33, MICRON® 44 or soft antifouling paints. These old coatings should be removed. MICRON CSC™ is compatible with conventional bottom paints after they have been thoroughly sanded with 80 grit or dry sandpaper.

VOC: Less than 400 grams/liter (3.34 lbs/gallon) as supplied.

THINNER: Offensive - Brush-Ease 433™

THINNING: Thin only when necessary. Do not exceed 10% by volume.

CLEAN-UP: Special Thinner 216™ or Brush-Ease 433™

THEORETICAL COVERAGE: 440 square feet per gallon/coat will yield 2 mils dry film thickness.

DRIY TIMES: Brush dry - 2 hours

77°F (25 °C) Dry to overcoat - 16 hours minimum

Dry to launch - 16 hours minimum

APPLICATION TEMPERATURE: 50°F (10 °C) and above. (Air and hull)

* If the air or hull temperature falls below 50°F (10 °C) during the 10 hour dry time extend the dry times to a minimum of 36 hours.

APPLICATION SYSTEMS

GENERAL APPLICATION PROCEDURE: Shake well prior to use. Apply at least 2 full coats (3 coats on bare wood) of MICRON CSC™ by brush or solvent resistant 3/8” nap roller. Do not apply thin coats. Keep in mind that the use of paint is closely related to the amount of paint applied. If coating application is found to be too thin, use 3/8” nap or roller. A thin coat should be applied to ensure that MICRON CSC™ does not wash away the other areas of the bottom. 2270 Morris Ave., Union, NJ 07083 • 908-686-1300

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of loose paint and contaminants by sanding the entire surface with 80 grit wet or dry sandpaper. Wipe surface clean with Interlux Special Thinner 216™. Apply at least 2 coats of MICRON CSC™, allowing proper dry times.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with Interlux® Interchange 205E™ for fiberglass, Interlux® Interchange 205F™ for wood and by sandblasting steel surfaces to a bare white metal. Proceed with application system for bare wood as described below.

BARE FIBERGLASS - NO SAND SYSTEM: Wash entire surface thoroughly with Interlux® Fiberglass Solvent 202™. Changing rags frequently. Before liquid drips, wipe clean with a dry cloth. (Be sure all water and other contaminants are removed). Failure to properly clean the surface will result in paint delamination. Sand any imperfections. After sanding, for a clean and shiny finish, apply a full coat of MICRON CSC™. Sand and wipe clean. Apply 4 or more coats of MICRON CSC™ allowing proper dry times.

BARE FIBERGLASS - SANDING SYSTEM: Wash entire surface thoroughly with Interlux® Fiberglass Solvent 202™; changing rags frequently. Before liquid drips, wipe clean with a dry cloth. (Be sure all water and other contaminants are removed). Failure to properly clean the surface will result in paint delamination. Sand any imperfections. After sanding, for a clean and shiny finish, apply a full coat of MICRON CSC™. Sand and wipe clean. Apply 4 or more coats of MICRON CSC™ allowing proper dry times.

BARE WOODS: Sand entire surface thoroughly with 80 grit production sandpaper, wipe surface clean with Interlux® Brush-Ease 433™. Repeat sanding with Interlux® Waterline YAV135 and wipe clean. Apply at least 1 full coat of MICRON CSC™. Add Interlux® Brush-Ease 433™ to Interlux® Solvent 202™. (10% minimum). Fill seams with Interlux® Seam Compound 30 between first and second coats of MICRON CSC™. Sand and wipe clean. Contact the Interlux Technical Service Department at 1-800-468-7585 for full details on how to properly sand underwater molds. Do not use on aluminum.

NOTE: MICRON CSC™ SHARK WHITE 5584 may change color at the waterline. Color difference may occur between actual paint and color swatch on front of can.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are not hazardous. Improper disposal of excess pesticide, spray mixture or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to the label instructions, contact your State Pesticide Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for assistance.

CONTAINER DISPOSAL: Nonreturnable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into a disposal bag or mix up and drain for 15 seconds. Pour the container flat with water and recirculate for 10 seconds. Repeat the procedure two more times. For CHEMICAL, EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTEX 1-800-424-9300 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-666-1136.
