USE RESTRICTIONS (Continued from other panel)
• This product may only be used to control pocket gophers and moles* in manual, below-ground applications in lawns.
• Bat must be applied directly into the burrow or tunnel systems.
• Do not apply in gardens and areas where food or feed may become contaminated.
• Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.
• Do not apply this product by the use of an artificial burrow builder.

APPLICATION DIRECTIONS FOR POCKET GOPHERS: Apply bait to control pocket gophers using one of the two methods outlined below:

Plug-Removal Baiting: Burrowing pocket gophers (Thomomys spp. and Geomys spp.) throw low, fan-shaped mounds on either side of their underground tunnels. These lateral tunnels coming to the surface are on the far side of the fan and are plugged with soil. Using a long-handled spade, carefully remove the plug. Insert one teaspoonful of bait as far down as possible. Do not allow bait to touch soil with soil.

Main Runway Baiting: To locate main runways, probe about 6 to 8 inches away from mounds by use of an iron bar, a strong stick, or other suitable implement. Resistance on probe will drop suddenly and probe will fall about two inches when main runway is encountered. Carefully close the hole with a stone, sod, or soil. Take care not to cover bait with soil.

APPLICATION DIRECTIONS FOR MOLES: The presence of moles may be indicated by a network of surface ridges in the turf, by a series of conical mounds of earth pushed up from deep burrows. To locate main runways, probe about 6 to 8 inches away from mounds by use of an iron bar, a strong stick, or other suitable implement. Resistance on probe will drop suddenly and probe will fall about two inches when main runway is encountered. Carefully close the hole with a stone, sod, or soil. Take care not to cover bait with soil.

STORAGE AND DISPOSAL
STORAGE: Store only in original container in a dry place inaccessible to children and pets.

DISPOSAL: Nonrefillable container. Do not reuse or refill this container. This product may only be applied against the pests listed on this label.

NOTE TO PHYSICIAN OR VETERINARIAN
Contains the phosphine-producing active, Zinc Phosphide. Probable mucosal damage may contraindicate the use of gastric lavage. For animals ingesting tail and/or shoveling passing signs, induce vomiting by using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralise the stomach acidity. The stomach and intestinal tract can be evacuated, oxygen administered and cardiac and circulatory stimulants given.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor for treatment. You may also contact 1-877-654-2494 for emergency medical treatment information.

If swallowed:
• Call a poison control center or doctor immediately for treatment advice or transport the patient to the nearest hospital.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

If inhaled:
• Move person to fresh air.
• If person is not breathing, call 911 or ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

Some states require the product to be used only by pest control professionals.

Directions for use:
This product may only be applied against the pests listed on this label.

CAUTION
Keep out of reach of children.
