**FEED INGREDIENTS:**
Molasses Products, Redgum Phosphate, Monocalcium Phosphate, Dicalcium Phosphate, Salt, Calcium Carbonate, Calcium Hydroxyide, Hydrolyzed Vegetable Oil, Magnesium Oxide, Manganese Oxide, Manganese Sulfate, Zinc Oxide, Zinc Sulfate, Copper Sulfate, Sodium Selenate, Ethylene Diamine Dihydroiodide, Calcium Iodate, Cobalt Carbonate, Vitamin A Supplement, Vitamin D3 Supplement and Vitamin E Supplement.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION:**

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, mouth, or clothing. Prolonged or frequently repeated skin contact may cause allergic reaction to some individuals.

**USER SAFETY RECOMMENDATIONS:**

**PERSONAL PROTECTIVE EQUIPMENT (PPE):** Long-sleeved shirt and long pants, shoes and socks, chemical resistant gloves. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Follow manufacturer’s instructions for cleaning/maintaining PPE. If for such instructions for standard, use detergent and hot water. Keep and throw PPE separately from other laundry.

**ENVIRONMENTAL HAZARDS:** This compound is toxic to fish.

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**USE RESTRICTIONS:** To not be used on horses destined for slaughter. This product contains dichlorvos, which is a cholinesterase inhibitor. The most frequently reported clinical signs of cholinesterase inhibition in the horse are abdominal pain, blindness, sweating, tearing, and excessive salivation. If these signs are seen in horses, consult your veterinarian immediately. Do not use this product simultaneously or within a week before or after treatment with cholinesterase inhibiting drugs, pesticides or chemicals. Consult a veterinarian before using this product on stallions, aged, pregnant or nursing animals. This product has not been tested in breeding horses.

**GENERAL INSTRUCTIONS:**

1. Feed block 6 blocks of cattle or horses. This allows all animals equal access to blocks. Feed blocks at the rate of 1.5 oz. per 100 lb. of bodyweight per day. This intake will supply 0.3%, of lardicic acid per 100 lb. of bodyweight per day (2.1 grams per 100 lb. bodyweight per month).
2. Place blocks where animals congregate. Locate blocks throughout pastures, placing them near water and food areas. Maintain adequate distance between blocks (10 ft. minimum).
3. Do not allow animals to run out of blocks. When a block is half-consumed, place a new block near it. Place very small pieces in troughs or feed pans.
4. Animals will consume about 5 oz. per head daily. When animals consume the block at the recommended rate, it will supply 3 mg of selenium.
5. Blocks can be fed to animals in confinement. Exact location of blocks to obtain desired consumption will vary between confinement feeding programs.
6. Feed as the only FREE CHOICE source of salt, other minerals and vitamins.
7. SEXUITE® Rabon® Molasses Pressed Block prevents the development of fecal flies in the manure of treated cattle and horses, but is not effective against existing adult flies. It may be necessary to use other control measures to reduce the population of existing adult flies. Supplementation by control measures may be needed in and around buildings to control adult house flies and stable flies which can breed not only in animal manure but in other decaying matter on the premises. In order to achieve optimum fly control, SEXUITE® Rabon® Molasses Pressed Block should be used in conjunction with other rodent management and sanitation practices. Start feeding SEXUITE® Rabon® Molasses Pressed Block early in the spring before flies begin to appear and continue feeding throughout the summer and into the fall. SEXUITE® Rabon® Molasses Pressed Block may be fed to cattle up to slaughter.
8. Follow feeding directions. Consumption of selenium should not exceed 3 mg per head daily.

**STORAGE AND DISPOSAL:**
Do not contaminate water, food, or feed by storage or by disposal.

**Disposal:** Non-flammable container. Do not reuse or refill this container. Offer for recycling, if available. Completely empty tank into application equipment. Do not dispose of empty tank in a sanitary landfill or by incineration. Do not allow to enter public water supplies. Follow state and local laws for recycling.

**For additional information, please contact your SEXUITE® representative.**
