Corral® Poly
Drift Control Agent and Deposition Aid
For use with Pesticides and Fertilizers

PRINCIPAL FUNCTIONING AGENTS:
Polyvinyl Polymer (Polyacrylamide) ........................................... 30%
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANT .................. 70%
TOTAL .................................................. 100%

All ingredients are exempt from tolerance requirements as specified in federal regulation 40 CFR 180.

STOP - READ LABEL BEFORE USING
KEEP OUT OF REACH OF CHILDREN

WARNING
Hazardous to humans and domestic animals. Harmful if absorbed through skin, swallowed, or inhaled. Causes skin and moderate eye irritation. Do not get on skin, in eyes, or on clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment: Wear chemical-resistant gloves, long-sleeved shirt and long pants, and shoes plus socks.

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Contains petroleum distillate-vomiting may cause aspiration pneumonia.

USE PRECAUTIONS
The degree of drift hazard varies with the type of pesticides, application conditions, and vegetation near the sprayed area. Common sense and sound application technology must be followed when spraying.

STORAGE AND DISPOSAL
Storage: Store in original container only. Do not contaminate water, food, or feed by storage or disposal. Keep product in a closed container and do not allow contact with water until added to the spray solution during mixing.

Container Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. Contact your state and local ACRC recycler or visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

GENERAL INFORMATION
CORRAL POLY is an effective, easy-to-use adjuvant for deposition improvement and drift retardation in spraying applications. CORRAL POLY is designed for general use in standard ground and aerial applications and is fully compatible with a wide variety of spray configurations including those with new A.I.L. and other specialized drift reduction nozzles. Further, CORRAL POLY is compatible in tank mix application with a broad spectrum of crop protection pesticides, including the complete range of all branded and generic glyphosate formulations.

DIRECTIONS FOR USE
For Terrestrial Use Only - Not For Aquatic Use

SHAKE BOTTLE WELL BEFORE USING. Dosages may be adjusted to compensate for environmental conditions or mechanical factors. For example, lower dosages generally may be used when spraying under calm winds, slow application speeds, low pressures, short release height, and for higher humidity. The greater the shear on the spray boom nozzle head, the greater the spray droplet fragmentation which produces fines (mists) which may drift to non-targeted areas or evaporate and rise as smoke into the atmosphere. For best control results using this product in aerial application, use state-of-the-art techniques, such as pressure less than 45 psi and nozzles oriented 45 degrees back to straight back.

Mixing: This product is extremely concentrated and effective in mixing as low as 1 oz. per 100 gallons. Start with lower dosage and increase as needed. A thickened or "stringy" solution indicates that too much CORRAL POLY has been used.

1. Select proper dosage for the spraying operation.
2. Fill the mix tank with water, pesticide, fertilizer, surfactant and/or other additives and begin agitating.
3. Shake CORRAL POLY well before using.
4. For best results, either (1) inject CORRAL POLY liquid into the solution side of the feeder or recirculating pump to obtain adequate solution, or (2) slowly add CORRAL POLY liquid to the rapidly agitating tank mix to the areas of highest turbulence by pouring a thin stream through a poor space.
5. Continue to agitate the mix tank for at least 3 minutes before spraying.

Dosage: Generally 1-8 ounces per 100 gallons of spray solution.

- Cone or raindrop nozzles 1-3 oz.
- Flat fan or lood nozzles 1-5 oz.
- Off center nozzles 2-6 oz.
- Spray gun (30-55 psi) 5-8 oz.

After use, flush and rinse sprayer system. Follow clean-up instructions on the pesticide label.

NOTICE OF WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS.

This warranty does not extend to the storage, handling or use of this product contrary to label instruction, or under abnormal conditions, or when conditions are not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
