**HOME GARDEN**

Proven effective in commercial applications, this 100% natural product is now available to the home gardener and landscape professional. Animals avoid treated ornamental shrubs, perennials and annuals before they bite, not after! Can last up to 6 months over winter on dormant ornamental shrubs and 3 months on most other succulent broadleaf plants. Always treat new growth.

**FORESTRY**

Plantskydd's effectiveness as an animal browse deterrent has been confirmed in operational conditions since 1993 by large forestry companies on millions of conifer and deciduous trees of various species. Plantskydd's effectiveness is attributed to its tenacity in sticking to plants, even under severe snow/rainfall—lasts up to 6 months over winter on dormant seedlings.

**PROFESSIONAL GROWER**

During the growing season, row crop growers can optimize Plantskydd by diluting each 1 lb/454 g package in 1.5 to 2 gallons of water—apply every 2-6 weeks depending on growth rate and level of browse. For over winter protection, use full strength (see dilution rates).

Also Available:
Plantskydd Rabbit and Small Critter Repellent
Easy to use Granular Just sprinkle it on!

1 lb makes 4 quarts

This package of Plantskydd® soluble powder concentrate makes approximately 4 quarts of ready to spray solution.
