An insect growth regulator to prevent the emergence of adult Sciarid flies in mushroom culture

ACTIVE INGREDIENT: (S)-Methoprene (CAS #68733-16-6) ........................... 33.6%
OTHER INGREDIENTS*: ........................................ 66.4%
Total: .......................................................... 100.0%

*Contains petroleum distillates
This product contains 2.5 lb/gallon (288 grams/liter)
(S)-methoprene active ingredient

KEEP OUT OF REACH OF CHILDREN
CAUTION
SEE BACK PANELS FOR ADDITIONAL PRECAUTIONARY STATEMENTS

1 Liter (33.8 fl. oz.)
METHOD A, METHOD B, METHOD C, OR METHOD D

INTEGRATION OF CASEntag:

5. Apply APEX® at the rate of 2 3/4 fl oz/1,000 sq ft. Apply evenly and thoroughly incorporate using a spawning machine or other suitable mechanical means. After treatment, APEX® will prevent the emergence of adult Sciarid flies when incorporated into the mushroom growing medium.

COMPATIBILITY ON MUSHROOMS

In most cases, treatment with APEX® has a beneficial effect on mushroom yield through control of damaging Sciarid fly larvae. However, to determine if spotting or effect on yield may occur, the user should conduct test treatments on small plots.

METHOD, RATE, AND TIMING OF APPLICATION: For best results, incorporate APEX® in the casing layer before setting it in place.

A. INCORPORATE IN CASING AT TIME OF CASING: Apply APEX® at the rate of 5 1/2 fluid ounces (fl oz) per 1,000 square feet (sq ft). Apply evenly and mechanically mix into casing material prior to the casing operation, or drench evenly onto the surface of the casing immediately after placement.

B. INCORPORATE IN COMPOST AT TIME OF SPAWNING AND IN CASING AT TIME OF PLACEMENT OF CASING LAYER: In Compost: Apply APEX® at the rate of 5 1/2 fl oz/1,000 sq ft in adequate water for even distribution. Spray or sprinkle on the surface of compost at the time of spawning and thoroughly incorporate using a spawning machine or other suitable mechanical means. In Casing: Apply APEX® at the rate of 2 1/4 fl oz/1,000 sq ft. Apply evenly and mechanically mix into casing material prior to the casing operation, or drench evenly onto the surface of the casing immediately after setting it in place.

C. COMPOST SURFACE DRENCH BEFORE CASING AND IN CASING AT TIME OF PLACEMENT OF CASING LAYER: For those varieties of mushrooms that have a 16-day or longer spawn run, use a split application. First Application, on compost: Apply APEX® 12-13 days after spawning. Drench APEX® evenly on the surface at the rate of 2 ½ fl oz/1,000 sq ft in adequate water for even distribution. Second Application, in casing: Apply APEX® at the rate of 2 1/4 fl oz/1,000 sq ft. Apply evenly and thoroughly incorporate using a spawning machine or other suitable mechanical means. After treatment, APEX® will prevent the emergence of adult Sciarid flies when incorporated into the mushroom growing medium.

If the product is soil injected or soil incorporated, the Worker Protection Standard, AG47-02419, 29 CFR Part 1951, applies.

DIRECTIONS FOR USE:

Read and follow the instructions on the container. The directions of use for APEX® are listed below. If you want more options, follow the instructions for category E on an EPA registation label.

APPLICATION OF APEX®

For plant health, the active ingredient in APEX® is (S)-methoprene, the analog of a natural insect hormone. Unlike traditional pesticides, the presence of (S)-methoprene does not cause immediate toxicity to mushroom plants. After treatment with APEX®, mushroom plants can be highly tolerant of adult and pupal infestations.

PRECAUTIONARY STATEMENTS – HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION: Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID

If in eyes • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. • Call a poison control center or doctor for treatment advice.

If on skin • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.

If swallowed • Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give ANY liquid to the person. Do not give anything by mouth to an unconscious person.

For information or in case of an emergency, call 1-800-248-7763.

User Safety Recommendations:

If you come in contact with a product, wash exposed skin thoroughly with soap and water. If skin irritation or rash occurs, get medical treatment immediately.

For more information or to report a problem, call 1-800-248-7763.

If you have any concerns about personal protective equipment (PPE) and restricted-entry interval. The requirements in U.S. law do not specify PPE and REI. It also contains specific instructions and exceptions pertaining to the statements on this label concerning the use and handling of this product other than indicated on the label. To the extent consistent with applicable law, seller makes no warranty.
Apply APEX® at the rate of 5 1/2 fluid ounces per 1,000 square feet (sq ft). Apply evenly and mechanically mix into casing material prior to the casing operation, or drench evenly onto the surface of the casing immediately after setting it in place.

METHOD, RATE, AND TIMING OF APPLICATION:
For best results, incorporate APEX® in the casing layer:  

A. INCORPORATE IN CASING AT TIME OF CASING:
METHOD A, METHOD B, METHOD C, OR METHOD D

B. COMPOST SURFACE DRENCH BEFORE CASING AND IN CASING AT TIME OF PLACEMENT OF CASING LAYER:
In Compost:
Apply APEX® 12-13 days after spawning. Drench APEX® with its labeling. Do not apply this product in a way that will contact workers or other persons, other directly or through spray drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.

Exception: If the product is soil injected or soil incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water in: • Coveralls • Chemical-resistant gloves, such as neoprene rubber (≥ 14 mils), nitrile rubber (≥ 14 mils), barrier laminate, or viton (≥ 14 mils) • Shoes plus socks

Do not apply this product through any type of irrigation system.

Personal Protective Equipment (PPE): Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category E on an EPA chemical resistance category selection chart. Applicators and other handlers must wear:  

- long-sleeved shirt and long pants, shoes plus socks, chemical resistant gloves, such as neoprene rubber (≥ 14 mils), nitrile rubber (≥ 14 mils), barrier laminate, or viton (≥ 14 mils). Follow manufacturer’s instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Controls Statements: When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

IMPORTANT: When reduced PPE is worn because a closed system is being used, handlers must be provided all PPE specified above for “applicators and other handlers” and have such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

User Safety Recommendations: Users should: • Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. • Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. • Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through spray drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

NOTE TO PHYSICIAN: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

ACTIONS TO BE TAKEN ON EXPOSURE:
• Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes.

• Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. • Call a poison control center or doctor for treatment.

• If on skin: Wash the outside of gloves before removing. As soon as possible, wash thoroughly and put on clean clothing. • Remove PPE immediately after handling this product.

• Burn or otherwise destroy container and all its contents, with the same precautions as those taken when disposing of waste.
mechanically mix into casing material prior to the casing operation, or drench evenly onto the surface of the casing immediately after setting it in place.

D. INCORPORATE IN CASING AT TIME OF CASING FOLLOWED BY A SURFACE APPLICATION PRIOR TO FIRST BREAK OF MUSHROOMS: First Application, in casing: Apply 5 1/2 fluid ounces APEX®/1,000 sq ft in adequate water for even distribution and mechanically mix into the casing material prior to the casing operation. Second Application, on casing surface just prior to first break: Apply 2 3/4 fluid ounces APEX®/1,000 sq ft in adequate water for even distribution as a surface drench prior to first break of mushrooms.

MIXING AND HANDLING INSTRUCTIONS: 1. Add the measured amount of APEX® to a spray tank partially filled with water, mix, and complete filling with specified quantity of water. 2. Use diluted spray solution within 72 hours of mixing. Agitate before each use.

STORAGE and DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Pesticide Storage – Store in a cool, dry place. Pesticide Disposal – Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility. Container Disposal – Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows. Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available, or puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY AND CONDITIONS OF SALE: To the extent consistent with applicable law, seller makes no warranty concerning the use and handling of this product other than indicated on the label. To the extent consistent with applicable law, buyer assumes all risks of use and handling of this material when such use and handling are contrary to label instructions.
