**STRIKE Ultra**

**PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Cautions: Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

**FIRST AID**

- **If eyes:**
  - Hold eyes open and rinse slowly with plenty of water for 15-20 minutes.
  - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes.
  - Call a poison control center or doctor for treatment advice.

- **If on skin:**
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes.
  - Call a poison control center or doctor for treatment advice.

- **If swallowed:**
  - Immediately call a poison control center or doctor.
  - Do not induce vomiting unless told to do so by a poison control center or doctor.
  - Do not give milk or food to the person.
  - Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-248-7763 for emergency medical treatment information.

**NOTE TO PHYSICIAN:** Contains petroleum distillate—vomiting may cause separation pneumonitis.

For information in case of an emergency, call 1-800-248-7763.

**EXTRAORDINARY HAZARDS:** To the extent, this product contains ingredients that are responsible for extraordinary hazards, please refer to the labeling.

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**WEARING AND HANDLING INSTRUCTIONS:**
- Wear protective clothing when handling the product.
- Avoid contact with skin, eyes, and mucous membranes.
- Wash hands thoroughly after handling the product.

**USE APPLICATIONS**

**Waste Water Treatment Facility Pests:**
- Apply STRIKE® Ultra in trickling filters, sludge drying beds, clarifiers, holding ponds, lagoons, influent structures, stagnant city standing water, or other areas of waste water treatment facilities where non-biting midges, filter flies, and other nuisance aquatic insect pests are a problem.

**What to Expect in Waste Water Treatment Facilities**
- Continuous Flow Sewage (waste water)
  - To achieve effective results, apply STRIKE® Ultra daily for 10 days. If applications are not made on a continuous basis, natalistic results may occur. Following initial applications of STRIKE® Ultra, a gradual reduction in the number of adult pests will be observed approximately 1 week later. Reduction in adult populations will be very noticeable within a 2-week period following continuous application. Due to varying conditions or heavy infestations, a longer period may be necessary to achieve control. Strong winds or action of STRIKE® Ultra may prevent adult emergence, existing adults and eggs present at the time of initial application will complete their life cycle.
  - When application of STRIKE® Ultra is halted following population suppression, rebound of the population can be expected within 2 to 4 weeks after stopping application. For continuous suppression throughout the post-season, continue applications of STRIKE® Ultra.

- Skid or Solid Waste Applications
  - For solid waste applications, use 3 oz per million gallons of sludge or solids. Apply solution until the drying beds have been filled.
  - Following filling of the drying beds, halt the application. Apply the solution at the desired rate on the sludge or solids prior to drying beds. Application of STRIKE® Ultra to solids will prevent the emergence of adult insect pests thereby keeping intestinal/infectious disease control.

**METHODS OF APPLICATION**

**Waste Water Treatment Facilities:** Dilute STRIKE® Ultra with water prior to use. Apply STRIKE® Ultra by using a metering pump to the treatment plant's influent, or an effluent, or other suitable equipment. Metering pumps are the most efficient and accurate method of application. This application method will influence appropriate product dilution. Prepare the desired volume of dilution to apply over a 1-2 hour period, or in cases of sludge beds, apply until the beds have been filled. When using delivery devices, it is important to calibrate the device to deliver the required amount of STRIKE® Ultra over a 1-2 hour period.
