optimum control of face flies, horn flies, gulf coast ticks, and spinose ear ticks on beef and dairy cattle (including lactating).

application.

Continual exposure of horn flies to a single class of insecticides (e.g. pyrethroids or organophosphates) may lead to the development of resistance to that class of insecticide. It is important to rotate insecticides and/or the method of horn fly control on a seasonal basis. CyLence Ultra Cattle Ear Tag contains the pyrethroid insecticide beta-cyfluthrin plus piperonyl butoxide. These two classes of insecticide are effective against face and spinose ear ticks.

Storage and Disposal:

Do not contaminate water, food or feed by storage of ear tags. It is a violation of Federal law to use this product in areas to which the user has no right of possession. Do not contaminate water, food or feed by storage of ear tags. It is a violation of Federal law to use this product in areas to which the user has no right of possession, by burning. If burned, stay out of smoke.

Opened pouches containing ear tags should be resealed for storage.

Waste (spent tags) resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. If it is not possible to dispose of the waste on site, it should be placed in a suitable container and transported to an approved waste disposal facility.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

May cause eye irritation. Flammable if ignited. Avoid exposure to open flames. Avoid breathing dust, mists, fumes, smoke. Wash hands after handling. Avoid ingestion. Wash hands after handling. Avoid inhalation. Avoid contact with eyes, skin, or clothing. Avoid breathing dust, mists, fumes, smoke. Wash hands after handling. Avoid ingestion. Wash hands after handling. Avoid inhalation. Avoid contact with eyes, skin, or clothing. Avoid breathing dust, mists, fumes, smoke. Wash hands after handling. Avoid ingestion. Wash hands after handling. Avoid inhalation. Avoid contact with eyes, skin, or clothing.

FIRST AID

In case of contact:

For eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Do not instill anything into eyes.

For skin: Wash skin with soap and water. If irritation persists, consult a physician.

If swallowed:

Do not give anything to an unconscious person. Call a poison control center or doctor for treatment advice.

If inhaled:

Move person to fresh air. If person is not breathing call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth if possible.

If contacted:

Wash thoroughly with soap and water. If irritation persists, consult a physician.

If on Skin or Clothing:

Take off contaminated clothing. Wash skin with soap and water. If irritation persists, consult a physician.

If in Eyes:

Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses if present after the first 5 minutes, and then continue rinsing eye.

If Swallowed:

Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor for treatment advice.

If ingested:

Do not give anything to an unconscious person. Call a poison control center or doctor for treatment advice.

If Inhaled:

Move person to fresh air. If person is not breathing call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth if possible.

If contacted:

Wash thoroughly with soap and water. If irritation persists, consult a physician.

Other Ingredients

Beta-cyfluthrin; Cyano (4-fluoro-3-phenoxyphenyl) methyl 3-(2,2 – dichloroethenyl) pyrethroid insecticide (e.g. pyrethroids or organophosphates) may lead to the development of resistance to that class of insecticide. It is important to rotate insecticides and/or the method of horn fly control on a seasonal basis. CyLence Ultra Cattle Ear Tag contains the pyrethroid insecticide beta-cyfluthrin plus piperonyl butoxide. These two classes of insecticide are effective against face and spinose ear ticks.

Environmental Hazards: This pesticide is toxic to fish. Do not contaminate water, food or feed by storage of ear tags. It is a violation of Federal law to use this product in areas to which the user has no right of possession, by burning. If burned, stay out of smoke.

Directions for Use:

1. Universal Total Tagger with red pin and black clip.

2. Pouches of 10 tags each

3. Directions for Use:

   a. Use the Allflex Black Clip by depressing the lever.

   b. Insert the tag by depressing the lever. Apply as indicated (Figures 1-4). Calves less than 3 months of age should not be tagged as ear damage.

   c. Use the Allflex Black Clip by depressing the lever.

   d. Apply the tag between the front side of the ear.

   e. Remove ear tags from empty pouches by placing the front side of the ear.

   f. Apply the tag between the front side of the ear.
Ear Tags have been proven to be effective against face and horn flies for up to five months. Adequate control of horn flies, face flies, gulf coast ticks, and spinose ear ticks, attach one tag to each ear (two per animal). For the control of horn flies, face flies, gulf coast ticks, and spinose ear ticks on beef and dairy cattle (including lactating), replace as necessary. CyLence Ultra® and spinose ear ticks, attach one tag to each ear.  

Environmental Hazards:  This pesticide is toxic to birds. Do not contaminate water, food, or feed by improper disposal of waste tags. Apply this product only as specified on the label.
