FOR THE SELECTIVE CONTROL OF MANY BROADLEAF WEEDS IN WHEAT, OATS, BARLEY, RYE, FLAX, GRASSLAND, AND IN NON-CROP AREAS

ACTIVE INGREDIENT:
2-Ethylhexyl Ester of 2-Methyl-4-Chlorophenoxyacetic acid ............ 74.4%
INERT INGREDIENTS ................................................................. 25.6%
TOTAL ........................................................................ 100.0%
Equivalent to 47.7% or 4 lbs. of MCPA per gallon. U.S. Patent No. 6,232,672

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Do not store this product near fertilizers, seeds, insecticides or fungicides. Protect product from freezing. If subjected to freezing conditions, warm to 70°F and agitate. This will return the product to original condition. Reclose all partially used containers by thoroughly tightening the screw cap. Damaged or leaking containers, which cannot be used immediately, should be transferred to suitable sound containers and properly marked. Absorb any spill with a suitable clay absorbent and dispose of as indicated under the pesticide disposal section. For safety and prevention of unauthorized use, all pesticides should be stored in locked facilities. To prevent accidental misuse, different pesticides should be stored in separate areas with enough distance between to provide clear identification. Opened, partially used pesticide should be stored in original labeled containers when possible. When transfer to another container is necessary because of leakage or damage, carefully mark and identify contents of the new container.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: NONREFILLABLE CONTAINER (EQUAL TO OR LESS THAN 5 GALLONS): Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Pour rinsate into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available. NONREFILLABLE CONTAINER (GREATER THAN 5 GALLONS): Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available. REFILLABLE CONTAINER: Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

SEE INSIDE LEAFLET FOR ADDITIONAL PRECAUTIONARY STATEMENTS AND COMPLETE DIRECTIONS FOR USE.

EPA Reg. No. 5905-506

COLLIERSVILLE, TENNESSEE 38017

PRECAUTIONARY STATEMENTS

CAUTION

Hazard to Humans and Domestic Animals
Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes, or clothing. Avoid inhaling vapor or spray mist. Prolonged or frequent repeated skin contact may cause allergic reactions in some individuals.

FIRST AID

IF SWALLOWED:
• Call a poison control center or doctor immediately for treatment advice.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give any liquid to the person.
• Do not give anything to an unconscious or convulsing person.

IF ON SKIN OR ON CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor immediately for treatment advice.

IF IN EYES:
• Hold eyelid open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor immediately for treatment advice.

IF INHALED:
• Move victim to fresh air.
• If not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.

NOTE TO PHYSICIAN: May pose an aspiration pneumonia hazard. Contains petroleum distillate.

HOT LINE NUMBER: Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of emergency, call ChemTrec at 1-800-424-9300.

NET CONTENTS:
PERSONAL PROTECTIVE EQUIPMENT

Some materials that are chemical-resistant to this product are: Laminate, Nitrile Rubber, Neoprene Rubber and Viton. If you want more options, follow the instructions for category F on an EPA chemical-resistance category selection chart.

Mixers, loaders, applicators, flaggers, and other handlers must wear:
- Long-sleeved shirt and long pants
- Shoes plus socks, and
- Chemical-resistant gloves

Additional PPE requirements for mixers and loaders supporting aerial application to rangelands, pasturelands, or non-cropland.

These mixers/loaders also must wear:
- A chemical-resistant apron and
- NIOSH-approved respirator with a dust/mist filter with MSHA/NIOSH approval prefix TC-21C or any N, R, P, or HE filter.

See “Engineering Controls” for additional requirements.

USER SAFETY RECOMMENDATIONS

- Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic invertebrates. Do not apply directly to water, to areas where the surface water is present, or to intermittent areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the table is shallow, may result in groundwater contamination.

CHEMIGATION STATEMENT

Do not apply through any type of irrigation system.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame. Do not cut or weld container.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL

Use this product only in accordance with its labeling contains requirements for the protection of agricultural pesticides. It contains requirements for tràins specific instructions and exceptions pertaining and restricted-entry interval. The requirements in the Protection Standard.

Do not allow worker entry into treated areas during the PPE required for early entry to treated areas that is with anything that has been treated, such as plants, such as:
- Coveralls
- Chemical-resistant gloves such as barrier laminate
- Shoes plus socks

NON-AGRICULTURAL

The requirements in this box apply to uses of this pr agricultural pesticides (40 CFR Part 170). The WPS forests, nurseries, or greenhouses. Do not allow peo

STORAGE

PESTICIDE STORAGE: Do not store this product ning. CONTAINER DISPOSAL: Wastes resulting from the tainer is necessary because of leakage or damage, c

NONREFILLABLE CONTAINER (EQUAL TO OR LESS) container (or equivalent) promptly after emptying. Tr ment or a mix tank and drain for 10 seconds after th for 10 seconds. Pour rinsate into application equipm onds after the flow begins to drip. Repeat this proce NONREFILLABLE CONTAINER (GREATER THAN equivalent) promptly after emptying. Triple rinse as f tank. Fill the container 1/4 full with water. Replace an ing at least one complete revolution, for 30 seconds, the container over onto its other end and tip it back to mix tank or store rinsate for later use or disposal. Re REFILLABLE CONTAINER: Refill this container wit the container before final disposal is the responsibl responsibility of the refiller. To clean the container b application equipment or mix tank. Fill the container t the pump for 2 minutes. Pour or pump rinsate into a p dure two more times.
**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber or viton
- Shoes plus socks

**NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not allow people or pets to enter treated area until sprays have dried.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

**PESTICIDE STORAGE:** Do not store this product near fertilizers, seeds, insecticides or fungicides. Protect product from freezing. If subjected to freezing conditions, warm to 70°F and agitate. This will return the product to original condition. Reclose all partially used containers by thoroughly tightening the screw cap. Damaged or leaking containers, which cannot be used immediately, should be transferred to suitable sound containers and properly marked. Absorb any spill with a suitable clay absorbent and dispose of as indicated under the pesticide disposal section.

For safety and prevention of unauthorized use, all pesticides should be stored in locked facilities. To prevent accidental misuse, different pesticides should be stored in separate areas with enough distance between to provide clear identification.

Opened, partially used pesticide should be stored in original labeled containers when possible. When transfer to another container is necessary because of leakage or damage, carefully mark and identify contents of the new container.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:**

**NONREFILLABLE CONTAINER (EQUAL TO OR LESS THAN 5 GALLONS):** Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available.

**NONREFILLABLE CONTAINER (GREATER THAN 5 GALLONS):** Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Offer for recycling, if available.

**REFILLABLE CONTAINER:** Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

When transfer to another con- of the new container.

GENERAL PRECAUTIONS AND RESTRICTIONS:
WILDCARD® is injurious to most broadleaf plants. Although this product contains material of low volatility, use it with caution where the spreading of vapors can damage nearby susceptible plants.

Physical Drift from the application of this product may also cause injury to susceptible plants. Do not apply directly to or other-wise permit even minute amounts (such as spray drift) to contact fruit trees, vegetables, flowers, ornamentals, or other desirable plants susceptible to MCPA. **DO NOT APPLY IN THE VICINITY OF COTTON, GRAPES, TOBACCO, OR TOMATOES.** Do not use in or near a greenhouse. Do not spray when wind is blowing towards susceptible crops or ornamental plants.

Spray Drift Management:
The applicator and the grower are responsible for considering all these factors when making decisions. Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment- and weather-related factors determine the potential for spray drift.

Apply only as a medium or coarser spray (ASAE standard 572) or a volume mean diameter of 300 microns or greater for spinning atomizer nozzles.

Apply only when wind speed is 2–10 mph at the application site.

Additional requirements for aerial applications:
- The boom length must not exceed 75% of the wingspan or 90% of the rotor blade diameter.
- Release spray at the lowest height consistent with efficacy and flight safety. Do not release spray at a height greater than 10 feet above the crop canopy.
- When applications are made with a crosswind, the swath will be displaced downwind. The applicator must compensate for this displacement at the downwind edge of the application area by adjusting the path of the aircraft upwind.
- Do not make applications into temperature inversions.

Additional requirements for ground boom applications:
- Do not apply with a nozzle height greater than 4 feet above the crop canopy.

Application Restrictions:
Do not apply this product in a way that will contact any person, or pet, either directly or through drift. Keep people and pets out of the area during application.

Entry Restrictions: Do not allow people or pets to enter the treated area until sprays have dried.

WHERE TO APPLY:
MCPA Ester is used to control broadleaf weeds in flax, small grains, grass pastures, and rangeland. This product will kill or control the following weeds in addition to many other noxious plants susceptible to MCPA:

### Most Susceptible Weeds (most areas):

<table>
<thead>
<tr>
<th>Weed</th>

WHEN TO APPLY:
Apply the product during warm weather when weeds are young and actively growing. Uniform spray coverage is necessary for best results. Generally, lower dosages listed will be satisfactory for young, succulent growth of sensitive weed species. For less sensitive species and under conditions where control is difficult, the higher doses will be needed.

HOW TO APPLY:
PREPARING THE SPRAY: Mix the MCPA ester with water unless otherwise indicated on the label. Fill the mixing tank or spray tank with approximately 1/2 the amount of water to be used for spraying. Add the required amount of product with agitation. Add the remainder of the water while continuing to agitate. NOTE: Adding oil, wetting agents, or other adjuvants to the spray may reduce selectivity to crops, possibly causing crop damage.

SPRAYING CONDITIONS: Use a moderate spray pressure of approximately 20 PSI. Enough spray volume should be used to give good coverage of the weeds being sprayed. This is usually 5 to 30 gallons by ground application or 3 to 10 gallons by air. Higher spray volumes may be useful in some situations to provide better spray coverage when weeds are especially dense and/or to reduce spray drift.

WEED CONTROL APPLICATIONS
FLAX: Use 1/4 to 1/2 pint per acre. Apply by ground sprayer or by airplane. Use sufficient water to give uniform and adequate coverage.

Apply only when weeds are up and when flax is 4 to 8 inches high and before it comes into bud. Treatment after early bud stage may result in severe damage. If Canada thistle is present, it may be necessary to go as high as 3/4 pint per acre to prevent seed-head production. Some injury to the flax may result. Flax varieties may vary in tolerance to MCPA. NOTE: Do not apply more than 1/2 pint (0.25 lb. a.e.) per acre per year. Consult local Extension Service or University Specialists for advice on herbicide use in flax. Do not forage or graze meat animals on treated areas within seven days of slaughter.

WEED CONTROL IN SMALL GRAINS: NOTE: Do not permit dairy animals or meat animals being finished for slaughter to forage or graze treated grain fields within 2 weeks after treatment. Do not forage or graze meat animals on treated areas within 7 days of slaughter.

Wheat, Barley, Oats and Rye: Use 1/2 to 1.5 pints of MCPA ester per acre for the more susceptible weeds when grains are in the 3- to 4-leaf stage or up to early boot stage. Apply when weeds are very small for best results. NOTE: Do not apply more than 1.5 pints (0.75 lb. a.e.) per acre during the boot-to-dough stage of the grain.

SOD FARMS:
Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

GOLF COURSES:
Do not apply more than 3 pints (1.5 lbs.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

RESIDENTIAL TURF:
Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

GRASSES GROWN FOR SEED:
Use 1 to 3 pints per acre, the higher rate where weed stands are heavy. In established grasses, apply in spring before head comes into boot and on seeding grass after grass has tilled. Do not use from early boot to milk stage. Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

PASTURE/RANGELAND:
Use 1 to 3 pints of MCPA ester per acre. Apply when weeds are small and actively growing for best results. Use the higher rates for whitetop, Canada thistle, buttercup and other more difficult-to-control weeds. Spray perennials in early bud to full bloom stage and regrowth in the fall. Legumes may be injured or killed. Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

GRASS CUT FOR HAY:
Use 1 to 3 pints per acre in sufficient water (2 to 120 gallons) in airplane or ground sprayer application to provide thorough coverage. Use higher rate for White top, Canada Thistle, and other hard-to-kill weeds; spray perennials in early bud to full bloom stage and regrowth in fall. Spray other weeds in spring or fall.

Precautions and Restrictions: When using on grass cut for hay, do not apply more than 3 pints per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

NOTE FOR WEED CONTROL IN GRASSES: Do not use MCPA ester in flax. Do not forage or graze meat animals on treated areas within seven days of slaughter.

WHEAT, BARLEY, OATS AND RYE: Use 1/2 to 1.5 pints of MCPA ester per acre for the more susceptible weeds when grains are in the 3- to 4-leaf stage or up to early boot stage. Apply when weeds are very small for best results. NOTE: Do not apply more than 1.5 pints (0.75 lb. a.e.) per acre during the boot-to-dough stage of the grain.

On fallowland, do not plant any crop until grass is well established.

WHEN TO APPLY:
Apply the product during warm weather when weeds are young and actively growing. Uniform spray coverage is necessary for best results. Generally, lower dosages listed will be satisfactory for young, succulent growth of sensitive weed species. For less sensitive species and under conditions where control is difficult, the higher doses will be needed.

HOW TO APPLY:
PREPARING THE SPRAY: Mix the MCPA ester with water unless otherwise indicated on the label. Fill the mixing tank or spray tank with approximately 1/2 the amount of water to be used for spraying. Add the required amount of product with agitation. Add the remainder of the water while continuing to agitate. NOTE: Adding oil, wetting agents, or other adjuvants to the spray may reduce selectivity to crops, possibly causing crop damage.

SPRAYING CONDITIONS: Use a moderate spray pressure of approximately 20 PSI. Enough spray volume should be used to give good coverage of the weeds being sprayed. This is usually 5 to 30 gallons by ground application or 3 to 10 gallons by air. Higher spray volumes may be useful in some situations to provide better spray coverage when weeds are especially dense and/or to reduce spray drift.

WEED CONTROL APPLICATIONS
FLAX: Use 1/4 to 1/2 pint per acre. Apply by ground sprayer or by airplane. Use sufficient water to give uniform and adequate coverage.

Apply only when weeds are up and when flax is 4 to 8 inches high and before it comes into bud. Treatment after early bud stage may result in severe damage. If Canada thistle is present, it may be necessary to go as high as 3/4 pint per acre to prevent seed-head production. Some injury to the flax may result. Flax varieties may vary in tolerance to MCPA. NOTE: Do not apply more than 1/2 pint (0.25 lb. a.e.) per acre per year. Consult local Extension Service or University Specialists for advice on herbicide use in flax. Do not forage or graze meat animals on treated areas within seven days of slaughter.

WEED CONTROL IN SMALL GRAINS: NOTE: Do not permit dairy animals or meat animals being finished for slaughter to forage or graze treated grain fields within 2 weeks after treatment. Do not forage or graze meat animals on treated areas within 7 days of slaughter.

Wheat, Barley, Oats and Rye: Use 1/2 to 1.5 pints of MCPA ester per acre for the more susceptible weeds when grains are in the 3- to 4-leaf stage or up to early boot stage. Apply when weeds are very small for best results. NOTE: Do not apply more than 1.5 pints (0.75 lb. a.e.) per acre during the boot-to-dough stage of the grain.

SOD FARMS:
Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

GOLF COURSES:
Do not apply more than 3 pints (1.5 lbs.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

RESIDENTIAL TURF:
Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

GRASSES GROWN FOR SEED:
Use 1 to 3 pints per acre, the higher rate where weed stands are heavy. In established grasses, apply in spring before head comes into boot and on seeding grass after grass has tilled. Do not use from early boot to milk stage. Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

PASTURE/RANGELAND:
Use 1 to 3 pints of MCPA ester per acre. Apply when weeds are small and actively growing for best results. Use the higher rates for whitetop, Canada thistle, buttercup and other more difficult-to-control weeds. Spray perennials in early bud to full bloom stage and regrowth in the fall. Legumes may be injured or killed. Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days.

GRASS CUT FOR HAY:
Use 1 to 3 pints per acre in sufficient water (2 to 120 gallons) in airplane or ground sprayer application to provide thorough coverage. Use higher rate for White top, Canada Thistle, and other hard-to-kill weeds; spray perennials in early bud to full bloom stage and regrowth in fall. Spray other weeds in spring or fall.
Precautions and Restrictions: When using on grass cut for hay there is a (1) 7-day pre-grazing interval for dairy cattle; (2) 3-day pre-slaughter interval for meat animals.

NOTE FOR WEED CONTROL IN GRASSES: Do not use this treatment where legumes, especially alfalfa, are present and desirable. In some areas, bent, buffalo, carpet, and St. Augustine grasses may be susceptible to injury. Do not use on newly seeded areas until grass is well established.

NON-CROPLAND RIGHTS-OF-WAY (Broadcast Treatment): For control of susceptible weeds in fencerows, fallowlands, rights-of-way, roadsides and similar areas, use 3 pints of product per acre in enough water to give sufficient coverage. Do not apply more than 3 pints (1.5 lbs. a.e.) per acre per year. Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days. NOTE: On fallowland, do not plant any crop until 3 months after treatment or until chemical has disappeared from soil.

NON-CROPLAND RIGHTS-OF-WAY (Spot Treatment): For weed control in pastures, rangelands, and in non-crop areas such as fencerows, farmyards, shelterbelts, and roadsides: Do not use more than 3 quarts (3.0 lbs. a.e.) per acre per year to control weeds such as Canada thistle, white top, meadow buttercup, and Texas blueweed. Apply when weeds are growing vigorously, usually prior to bloom, and spray fall regrowth, if necessary.

CONDITIONS OF SALE – LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES

Read the Conditions of Sale – Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded.

The directions on this label are believed to be reliable and should be followed carefully. Insufficient control of pests and/or injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Helena Chemical Company (the “Company”) or seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use subject to the factors noted above which are beyond the control of the Company. To the extent consistent with applicable law, the Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

To the extent consistent with applicable law, the exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Helena Chemical Company’s election, one of the following:

1. Refund of the purchase price paid by buyer or user for product bought, or
2. Replacement of the product used.

To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.

ACTIVE INGREDIENT:
2-Ethylhexyl Ester of 2-Methyl-4-Chlorophenoxyacetic acid

INERT INGREDIENTS

TOTAL (U.S. Patent No. 6,232,672)
Equivalent to 47.7% or 4 lbs. of MCPA.

KEEP OUT OF REACH OF CHILDREN

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes, or clothing. Avoid inhaling vapor or spray mist. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

FIRST AID

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything to an unconscious or convulsing person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.

IF IN EYES: Hold eyelid open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor immediately for treatment advice.

IF INHALED: Move victim to fresh air. If not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.

NOTE TO PHYSICIAN: May pose an aspiration pneumonia hazard. Contains petroleum distillate.

HOT LINE NUMBER: Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of emergency, call ChemTrec at 1-800-424-9300.

See Inside Leaflet For Additional Precautionary Statements and Complete Directions for Use.
