EverGreen®
Crop Protection EC 60-6

MULTI-PURPOSE INSECTICIDE
For use on growing crops, ornamentals, stored products, livestock and fruit fly control on harvested fruits and vegetables. Used alone as a clean-up spray or a pre-harvest spray.

ACTIVE INGREDIENTS:
Pyrethrins ............................................... 6.00%
*Piperonyl butoxide, Technical ..................... 60.00%
**OTHER INGREDIENTS ............................ 34.00%
100.00%

*Equivalent to 48.00% (butyrcarbonyl) (6-propylpiperonyl) ether and 12.00% related compounds.

EVERGREEN®, MGK® and PREMIUM PYRETHRUM® are registered trademarks of McLaughlin Gormley King Company.

KEEP OUT OF REACH OF CHILDREN
CAUTION

FIRST AID
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), you may call 1-888-746-5712.

See Back Panel for Additional Precautionary Language

Manufactured by:
8810 Tenth Avenue North • Minneapolis, MN 55427

NET CONTENTS 1 GALLON
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Avoid contact with skin or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear long-sleeved shirt and long pants, socks, shoes and chemical-resistant gloves (such as Barrier Laminate, Nitrile Rubber, Neoprene Rubber or Viton, Selection Category E). Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category E on an EPA chemical resistance category selection chart.

Applicators and other handlers who may be exposed to the dilute and/or concentrate through application or other tasks must wear: Long-sleeved shirt and long pants; Chemical-resistant gloves, such as Barrier Laminate, Nitrile Rubber, Neoprene Rubber, or Viton; Shoes plus socks; Protective Eyewear.

In addition to the above PPE, applicators using hand-held foggers in an enclosed area must wear a half-face, full-face or hood-style NIOSH-approved respirator with a dust/mist filtering cartridge (MSHA/NIOSH approval number prefix TC-2/1(C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-140), or a cartridge or canister with any R, P, or HE filter. See engineering controls for additional requirements.

USER SAFETY REQUIREMENTS:

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product’s concentrate. Do not reuse them.

ENGINEERING CONTROLS:

Pilots must use an enclosed cockpit that meets the requirement listed in the Worker Protection Standard (WPS) for agricultural pesticide [40 CFR 170.240 (d)(6)].

Human flagging is prohibited. Flagging to support aerial application is limited to use of the Global Positioning System (GPS) or mechanical flaggers.

USER SAFETY RECOMMENDATIONS:

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic organisms, including fish and invertebrates. Drift and run-off may be hazardous to aquatic organisms in water adjacent to treated areas. This product may contaminate water through run-off. This product has a potential for run-off for several weeks after application. Poorly draining soils and soils with shallow water tables are more prone to produce run-off that contains this product.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

Except as specified in the directions for use, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash-waters or rinsate.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.
### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

### GENERAL PRECAUTIONS & USE RESTRICTIONS

- Apply this product only as specified on this label.
- Do not contaminate food or feedstuffs.
- Do not enter or allow others to enter until vapors, mists and aerosols have dispersed, and the area has been thoroughly ventilated.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift.
- Only protected handlers may be in the area during application.
- Do not remain in treated area. Exit area immediately and remain outside the treated area until aerosols, vapors and/or mists have dispersed.
- Remove or cover exposed food and drinking water before application.
- Remove or cover dishes, utensils, food processing equipment and food preparation surfaces, or wash them before use.
- For direct application to non-domestic animals/livestock: Do not apply more than 1 time per day.
- When used in dairy barns or facilities: Close all bulk tank lids to prevent contamination from spray and from dust or falling insects. Remove or cover milking utensils before application. Wash teats of animals before milking.
- When used in indoor food handling or processing facilities: Do not make space spray applications when facility is in operation. During space spray applications, cover or remove exposed food. During space spray applications, cover food processing surfaces or clean after treatment with a suitable detergent, rinse with potable water before use. Do not apply more than 1 time per day.
- For food crops growing outdoors or in greenhouses in agricultural setting: Do not apply more than 10 times per season. Do not re-apply within 3 days except under extreme pest pressure. In case of extreme pest pressure, do not re-apply within 24 hours. Do not harvest until spray has dried. Do not apply to cotton within 14 days of seed harvest.
- For post-harvest applications to vegetables, fruits, nuts and other commodities: Do not re-apply within 7 days. Do not apply more than 10 times to sweet potatoes.
- For post-harvest applications to stored grains and seed: Do not re-apply within 30 days.
- For greenhouse grown ornamental, flowering and foliage plants: Do not apply more than 1 time per day.
- Remove pets, birds and cover fish aquarium before application.

### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard. 40 CFR, Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: Coveralls: Chemical-resistant gloves, such as Barrier Laminated, Nitrile Rubber, Neoprene Rubber, or Viton; Shoes plus socks; Protective eyewear.

### NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR, Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Keep unprotected persons out of treated areas until sprays have dried.

### USED ALONE: This concentrate contains natural pyrethrin.

### USED IN COMBINATION: This product may be a problem if cation must conform to that of the surfactant. Prior to tank mixing, a compatible tank mix application mix is required. The product cannot be mixed.

### USE THROUGH IRREGULAR Trays, lip, solid set or illegal pesticide residue. Extension Service specialist. Do not connect an irrigation safety devices for public v of the responsible person. The system must contain source contamination free the injection of the injection pump and masticated or manually sun motor stops. The irradiator the point where pesticide Systems must be a meter and compatible with pasti.

### Do not apply when wind is Constant agitation must be achieved by irrigation.
USED ALONE: This concentrate can be used also as a clean-up or a pre-harvest spray, where other materials cannot be used because of residue restrictions. Contains natural pyrethrins.

USED IN COMBINATION WITH OTHER INSECTICIDES: Evergreen Crop Protection EC 60-6 may be combined with other insecticides and acaricides where resistance may be a problem and to provide a flushing of insects from hiding and into contact with other spray residues for quicker and more complete control. The application must conform to the accepted use precautions and directions for both products.

Prior to tank-mixing, a compatibility test should be conducted using the proper proportions of chemicals and water to ensure the proper physical compatibility of the mixture.

Tank mix applications must be made in accordance with the more restrictive of label limitations and precautions. No label application rates may be exceeded. This product cannot be mixed with any product with label prohibitions against such mixing.

USE THROUGH IRRIGATION SYSTEMS (CHEMIGATION): Apply this product only through sprinkler (including center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand move) irrigation system. Do not apply this product through any other type of irrigation system. Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.

Do not connect an irrigation system (including greenhouse systems) used for pesticides application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place. A person knowledgeable of the chemigation system and responsible for the operation or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

The system must contain a functional check valve, vacuum relief valve, and low-pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump. The pesticide injection pipeline must also contain a functional normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the pump motor stops. The irrigation line or water pump must include a functional pressure valve that will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.

Systems must be a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

Constant agitation must be maintained in the chemical supply tank during the entire period of insecticide application. Greater accuracy in calibration and distribution will be achieved by injecting a larger volume of more dilute suspension per unit of time.

GROWING CROPS (OUTDOORS AND IN GREENHOUSES):

Apply 2 to 16 fluid ounces per acre and repeat if required to maintain effective control. Use in sufficient water for thorough coverage of upper and lower leaf surfaces unless otherwise noted. This product may be applied by air to no less than 2 gallons of water per acre and by ground in no less than 10 gallons of water per acre. It is recommended that the final spray mix be buffered to a pH of 5.5-7.0.

This concentrate is relatively non-toxic to honey bees. To avoid possible harm to honey bees, it is advisable to apply in the early morning or late evening hours.

Evergreen Crop Protection EC 60-6 may be used on most crops because its active ingredients are exempt from tolerances when applied to growing crops. The crop grouping scheme used on this label was devised by the Environmental Protection Agency to expedite minor use pesticide registration.

ROOT AND TUBER VEGETABLES: Arrachacha, Arrowroot, Purple Arrowroot, Japanese Artichoke, Jerusalem Artichoke, Garden Beets, Sugar Beets, Edible Burdock, Edible Canna, Carrots, Cassava (bitter or sweet), Celaber (calabre ro), Chayote, Chervil (turnip rooted), Chiony, Chufa, Dassenho, Ginger, Ginseng, Horseradish, Lérine, Porcle (turnip rooted), Parsnyp, PotaLo, Radish, Japanese Radish (Daikon), Rutabaga, Salsify, Black Salsify, Spanish Salsify, Skillet, Sweet Potato, Taker, Turnip, Yam (true), Yam Bean.

LEAVES OF ROOT AND TUBER VEGETABLES: Garden Beet, Sugar Beet, Edible Burdock, Carrot, Cassava (bitter or sweet), Celaber (calabre ro), Chervil (turnip rooted), Chiony, Dassenho (true), Parsnyp, Radish, Japanese Radish (Daikon), Rutabaga, Black Salsify, Sweet Potato, Taker, Turnip, Yam (true).

BULB VEGETABLES: (Allium spp.): Garlic, Great-headed Garlic, Leek, Onion (dry bulb and green), Onion, Welsh, Shallot.

LEAFY VEGETABLES: Ar Chrysanthemum (edible leaf), Fern (Fernres) Le (New Zealand), Swiss Cha Brasica (Cole) LEAF Chinese Cabbage (Napa), Chinese Green Legume VEGETABLES (6) Beans, Runner Beans, Snap, Southern Peas, Yardlong B (Edible Pod Pea), Garden P Lupin, Sword Bean.

FOLIAGE OF LEGUME VEGETABLE variety colors, Field Pec nuts.

FRUITING VEGETABLES:

CUCURBIT VEGETABLES: Cucumber, Gherkin, Edible Melon, Muskmelon, Persia.

STONE FRUITS: Apricot, (or)

SMALL FRUITS AND BERRIES: Raspberry (black and red).

TREE NUTS: Almond, Bee, Walnut, Pecan, and English.

ORIENTAL VEGETABLES: Napa, Chinese Mustard Cc (Daikon), Chinese Spinach.

SUBTROPICAL FRUITS: Pineapple, Passion Fruit, Paw Paw, P

ADDITIONAL CROPS: Ar, Sunflowers, Tea.

CEREAL GRAINS: Barley.

FORAGE, FODDER AND LAMBS: Herbs, Triticale, Wheat, V

GRASSES FOR SEED, FO that will be fed to or grazed.

NON-GRASS ANIMAL FE:

HERBS AND SPICES: Alfalfa, Fenugreek, Calla, Corn, Cardamon, Celery, Cinnamon, Cumin, Coriander, Lavatera, Marjoram, Oregano, Rosemary, Sage, Thyme, Tarragon, Tangerine, Yum (true), Zucchini, Zea Mays (corn).

FOR USE AROUND HOMES AND OTHER BUILDINGS: In grassy undeveloped areas use this concentrate at 1 part to 59 parts water to control foraging fire ants. Also spray grassy areas around yard borders liberally to control ticks that may carry Lyme Disease.

FOR USE ON HARVESTED FRUITS AND VEGETABLES: Including Apples, Blackberries, Blueberries, Boysenberries, Cherries, Cranberries, Currents, Dewberries, Figs, Gooseberries, Grapes, Guavas, Loganberries, Mangos, Mushrooms, Oranges, Peaches, Peas, Pinenapples, Plums, Raspberries, Tomatoes.

DIRECT SPRAY TO FRUITS IN BASKETS, ON TRUCKS OR IN PROCESSING PLANTS: To control Drosophila spp., Toxodrid spp. Fruit Flies, Vinegar Flies and other nuisance pests dilute this concentrate at the rate of 1 part with 1,200 parts water (1 pint per 150 gallons of water or 1 teaspoon per 12.5 pint water). Thoroughly mix the emulsion in the spray tank and treat as follows:

1) Apply liberally to fruits and vegetables in baskets, on trucks and in plants. Use sprayers at a high pressure for applying at the rate of five or six pints of diluted spray to a 2 ton load of produce. Direct the spray for maximum coverage of the baskets or hampers. It is important to spray between and beneath the containers.

2) Spray the raw stock stacked in the yard.

3) Dip baskets in the diluted spray, after dumping the produce to kill adhering larvae and pupae.

FOR USE IN CANNERY: The entire space inside of the canner should be sprayed after washing and cleaning up and just before bringing produce into it, with this product diluted 1 part to 29 parts of water (1 quart with 7.5 gallons water) up to 1 part to 11 parts of water (1 quart with 3 gallons water). Use 1 gallon of the spray per 750 square feet, directed on walls, ceiling, and floors paying special attention to forcing the spray into all cracks and crevices for the control of Ants, Roaches, Silverfish, Crickets, Spiders and Cheese Mites. This same dilution used as a space spray will give excellent control of Fruit Flies, House Flies, Hornets, Grain Moths, Gran, Moths, Mosquitoes, and Skipper Flies. Use one ounce diluted spray per 1,000 cubic feet of space. Do not spray while the plant in is operation as dead flies may fall into containers or the products being processed.

AS A SPACE SPRAY IN FOOD AND NONFOOD AREAS OF FOOD PROCESSING PLANTS, INDUSTRIAL INSTALLATION, BAKERIES, RICE AND WHEAT MILLS, RESTAURANTS, TOBACCO WAREHOUSE, HOMES, AND WAREHOUSES: To kill flying insects such as Fruit Flies, House Flies, Hornets, Wasps, Grain Moths, Gran, Moths, Mosquitoes and Skipper Flies, dilute this concentrate at the rate of 1 part with 29 parts water (1 quart with 7.5 gallons water) up to 1 part to 11 parts water (1 quart with 3 gallons water). Use at 1% to 2% respectively, keep doors and windows be closed for 2 to 4 hours per 4 hours of treatment or more. When oil residuals are not used and applied as a space spray, CRAWLING AND FLYING INSECTS Confused Flour Beetles, Bark Beetles, Yellow Mealworms, Flies, Indian Meal Moths, Mice, parts of water or oil (10,000 quarts per 10,000 quarts of the area and behind of the spray). Repeated treatment is USE AS A SURFACE SPRAY Insoluble exposed stages of crawl Drugstore Beetles, Grain Miller, Protection EC 60-6 with 59 parts water. Except in Federally Inspected, as per the direction in accordance with the direction To control accessible, exposed stages Drugstore Beetles, Drugstore Beetles, Grain Miller Protection EC 60-6 with 59 parts water. For USE ON SWEET POTATO galla, apply as a space fog of space. Apply only when fly applications.

FOR USE ON STORED PRODUCE On Rice, Barley, Beans, Bitter Melon, Peppers, Potatoes, Pumpkins, Potatoes, Okra, Tomatoes, etc., apply as a space spray. Use Evergreen Crop Protection EC 60-6 with 59 parts water. For USE ON STORED PRODUCE On Rice, Barley, Beans, Bitter Melon, Peppers, Potatoes, Pumpkins, Potatoes, Okra, Tomatoes, etc., apply as a space spray. Use Evergreen Crop Protection EC 60-6 with 59 parts water.

SURFACE TREATMENT OF SHELDS Should be made after the oak of water and apply at the rate FOR USE AS A GRAIN PROTECTION For grain age insects for a full season or apply the rate of 4 to 5 combination with a registered OILS AND OILS ON ALMONDS, PEANUTS ANI Cigarette Beetles, Confused Fl APHID Flies, Merchant Grain B A fluid ounces of Evergreen Crop Protection EC 60-6 with 59 parts water. Apply at the rate of 4 gallons per 1,000 square feet.
100 gallons of water for applications with 6% of Evergreen® Crop and apply with a con-}

ventional hydraulic sprayer.

1 to 4 fluid ounces

usual hydraulic sprayer.

1 quart

pared to 29 parts up to 1 part to 11 parts in deodorized base oil instead of water and applied as a space spray with any good type applicator such as mechanical or ULV fogger capable of producing particles of aerosol size.

CRAWLING AND FLYING INSECTS: For control of accessible, exposed stages of CRAWLING INSECTS including, Ants, Cockroaches, Caddelles, Cigarette Beetles, Confused Flour Beetles, Dark Mealworms, Dried Fruit Beetles, Drugstore Beetles, Grain Moths, Red Flour Beetles, Rice Weevils, Saw-toothed Grain Beetles, Spiders, Beetles, Yellow Mealworms and FLYING INSECTS including, but not limited to, Angoumois Grain Moths, Cheese Skippers, Flies, Fungus Gnats, Gnats, House Flies, Indian Meal Moths, Moquitoes, Mediterranean Flour Moths, Small Flying Moths, Tobacco Moths, dilute 1 part Evergreen® Crop Protection EC 60-6 with 11 parts of water or oil (10.67 ounces per gallon) and apply at the rate of 1 ounce per 1,000 cubic feet of space. Direct the spray towards the ceiling and upper con-

ers of the area and behind obstructions. Vacate the treated area and keep the area closed for at least 30 minutes after treatment. Ventilate the area before reoc-
cupying. Repeat treatment as necessary.

USE AS A SURFACE SPRAY IN HOMES, RESTAURANTS, FOOD PROCESSING PLANTS, INDUSTRIAL INSTALLATIONS AND WAREHOUSES: To control accessible, exposed stages of crawling insects including, Ants, Cockroaches, Caddelles, Cigarette Beetles, Confused Flour Beetles, Dark Mealworms, Dried Fruit Beetles, Drugstore Beetles, Grain Moths, Red Flour Beetles, Rice Weevils, Saw-toothed Grain Beetles, Spiders, Beetles, Yellow Mealworms, dilute 1 part Evergreen® Crop Protection EC 60-6 with 10 parts of water and apply at the rate of 1 gallon to 750 square feet, paying special attention to force the spray into all cracks and crevices. Except in Federally inspected meat and poultry plants, food processing operations may continue when this product is applied as a surface spray with care and in accordance with the directions and precautions given above.

To control accessible, exposed stages of crawling insects including, Ants, Cockroaches, Caddelles, Cigarette Beetles, Confused Flour Beetles, Dark Mealworms, Dried Fruit Beetles, Drugstore Beetles, Grain Moths, Red Flour Beetles, Rice Weevils, Saw-toothed Grain Beetles, Spiders, Beetles, Yellow Mealworms, dilute 1 part Evergreen® Crop Protection EC 60-6 with 10 parts of water and apply at the rate of 1 gallon to 750 square feet, paying special attention to force the spray into all cracks and crevices.

FOR USE ON SWEET POTATOES IN STORAGE: For control of Fruit Flies and Vinegar Flies dilute this concentrate at 1 part to 16 parts water (6.4 fluid ounces per gallon). Apply as a space fog with a mechanical fogger capable of producing particles of aerosol size at the rate of 1 gallon diluted spray per 100,000 cubic feet of space. Apply only where flying insects are present. Several applications may be necessary during period of heavy infestation, but do not make more than 10 applications.

FOR USE ON STORED PRODUCTS: This concentrate can be used at the rate of 1 part to 2 parts up to 1 part to 11 parts water or deodorized base oil can be used on Rice, Barley, Beans, Birdseed, Buckwheat, Cocoa Beans, Corn, Cottonseed, Flux, Oats, Grain Nuts, Dried Fruit, Almond Nuts and shells, Walnut Nuts and shells, Peanuts, Dried Prunes, Dried Apricots, Raisins, Figs, Wheat, Rye, Sorghum, Tobacco and Peanuts held in storage for control of the accessible stages of Almond Moths, Angoumois Grain Moths, Caddelles, Cigarette Beetles, Confused Flour Beetles, Flat Grain Beetles, Granary Weevils, Indian Meal Moths, Red Flour Beetles, Rice Weevils, Rusty Grain Beetles, Saw-toothed Grain Beetles, Square-necked Grain Beetles, and Tobacco Moths.

SURFACE TREATMENT OF STORED GRAIN AND SEEDS: To control Indian Meal Moths, Angoumois Grain Moths and Mediterranean Flour Moths, monthly inspections should be made after the grain is placed in storage. If the top two or three inches are infested, dilute 1 part Evergreen® Crop Protection EC 60-6 with 19 parts of water and apply at the rate of 1 to 2 gallons per 1,000 square feet of grain. Bake the mixture into the grain to a depth of 4 inches.

FOR USE AS A GRAIN PROTECTANT: This concentrate when diluted with water and sprayed directly on grains will effectively protect the grain against grain stor-
age insects for a full season or approximately 6 months. Dilute at the rate of 1 part to 29 parts water (1 quart with 7.5 gallons water). Thoroughly mix the emulsion and apply at the rate of 4 to 5 gallons per 1,000 bushels of grain as it is coined along a belt or as it enters the auger or elevator. This concentrate may be used in combination with a registered fumigant for use on heavily infested stored products.

ON ALMONDS, PEANUTS AND WALNUTS IN BULK OR IN BAGS: To control stored product insects such as, Almond Moths, Angoumois Grain Moths, Ants, Caddelles, Cigarette Beetles, Confused Flour Beetles, Drugstore Beetles, Flat Grain Beetles, Granary Weevils, Indian Meal Moths, Lesser Grain Borers, Maize Weevils, Mediterranean Flour Moths, Merchant Grain Beetles, Red Flour Beetles, Rice Weevils, Rusty Grain Beetles, Saw-toothed Grain Beetles and Square-necked Grain Beetles, dilute 1.5 fluid ounces of Evergreen® Crop Protection EC 60-6 per gallon of water and apply as a coarse wet spray over the top of stored nuts or the outside surface of stacked bagged nuts at the rate of 4 gallons per 1,000 square feet. Apply at weekly intervals for about 6 weeks and then at 15-day intervals. The first two applications should be applied at the rate of 4 gallons per 1,000 square feet and subsequent treatments should be applied at the rate of 2 gallons per 1,000 square feet.

FOR USE IN STORAGE SITES: Veying equipment as a clean up storage areas and conveying as on the floor and door frames insects that might be present.

For barns, particular attention of Newly harvested grain should be fumigated. These cleaning ope-

After storage sanitation measure part to 11 parts (1 quart with 3 parts water) and after 30 minutes attention to forcing the spr-

Monthly inspections should be of stored product.

FOR USE AS A LIVESTOCK
1) To kill and repel Horn Flies, with particular attention to or as needed when flies are
2) To kill and repel Stable Flies, the hair thoroughly with pit as needed.
3) To kill and repel Face Flies, of the animal in the morning needed.
4) For effective control of Bilt with 2 gallons) and spray to
5) To control Poultry Lice, us
6) To control Red Bugs with
7) To control Sheep with
8) To kill Flies and Ticks on animal by dipping or spray

FOR USE IN BARRNS, DAIRIES
Flour Flies, Mosquitoes, Gnat, approximately 2 fluid ounces; upper corners of the area being vacate the treated area in
FOR USE IN STORAGE SITES: This concentrate can be used to treat grain and seed in warehouse bins and trucks, cargo ships, mills, bin hoppers, elevators and conveying equipment as a clean up prior to using them for storage. In mills and elevators, all infested accumulations of grain should be removed from the bin hoppers. All storage areas and conveying equipment should be thoroughly cleaned by sweeping out the waste grain, cobwebs and other debris from the walls and ratters as well as on the floor and door frames with special attention to materials lodged in the cracks and crevices. All of the debris should be removed and burned to kill eggs and insects that might be present.

For barns, particular attention should be given to cleaning up around the used feed and grain bags, grain residues from wagons, harvesting equipment and feed troughs. Newly harvested grain should not be placed in the same bin with carry-over grain and all carry-over grain stocks that are not treated with grain protectant should be fumigated. These cleaning operations should be done within two or three weeks before harvest.

After adequate sanitation measures have been employed, spray all areas prior to use for storage with 1 part to 20 parts water (1 quart with 75 gallons water) up to 1 part to 11 parts (1 quart with 3 gallons water). Apply at the rate of one gallon per 750 square feet on walls, floors, ceilings and partition boards of bins, paying particular attention to forcing the spray into all cracks and crevices.

Monthly inspections should be made. If the top 2 or 3 inches are found to be infested, re-treat applying at the rate of 1 to 2 gallons of diluted material per 1,000 bushels of stored product.

FOR USE AS A LIVESTOCK AND POULTRY SPRAY:
1) To kill and repel Horn Flies, Horse Flies, Mosquitoes and Gnats, dilute at the rate of 1 to 2 fluid ounces per gallon of water and apply to wet the hair thoroughly with particular attention to topline, underline, flanks, withers and other infested areas. Repeat treatment at intervals of 5 to 12 days for small insect infestations or as needed when flies are emerging in large numbers.
2) To kill and repel Stable Flies, Horse Flies, and Deer Flies, dilute at the rate of 2 to 3 fluid ounces per gallon of water and apply at a quart per adult animal to wet the hair thoroughly with particular attention to the legs, flanks, tail, topline and other body areas commonly attacked by these flies. Repeat treatment each week as needed.
3) To kill and repel Face Flies, dilute at the rate of 2 fluid ounces per gallon of water and apply using spray which produces large wetting droplets. Apply to the face of the animal in the morning before releasing to pasture. Apply sufficiently to wet the face but not more than 1/2 to 1 fluid ounce per animal. Repeat daily as needed.
4) For effective control of Biting and Sucking Lice on Cattle, Horses, Sheep, Goats and Hogs, dilute at the rate of 1 quart with 75 gallons of water (1 fluid ounce with 2 gallons) and spray to thoroughly wet the hair of the animal including the head and brush of the tail. Repeat treatment in 10 days to kill newly hatched Lice.
5) To control Poultry Lice, using a dilution of 2 to 3 ounces of concentrate per gallon of water. Spray roosts, walls and nests or cages thoroughly. It is not necessary to remove poultry from the housing unit during treatment. This should be followed by spraying over the birds with a fine mist.
6) For control of Red Bugs and Mites on poultry and in poultry houses, dilute at the rate of 2 to 3 fluid ounces per gallon of water and spray crevices of roost poles, cracks in walls and cracks in roosts where the Red Bugs and Mites hide, followed by spraying over the birds with a fine mist.
7) To control Sheep “Tick” or Keds, dilute at the rate of 1 to 2 fluid ounces per 4 gallons of water and thoroughly wet all portions of the body by dipping or by spraying with sufficient pressure and with a nozzle adjustment to give penetration of the wool. Treat at a rate sufficient to wet the animal.
8) To kill Fleas and Ticks on livestock and pets, and to obtain protection against reinfection, dilute at the rate of 2 fluid ounces per gallon of water and wet the animal by dipping or spraying. For best results against Fleas and Ticks on Dogs and Cats, the kennels and/or animal quarters and bedding should be treated.

FOR USE IN BARNS, DAIRIES, MILKING PARLORS, MILKING ROOMS AND POULTRY HOUSES: To control flying insects including, but not limited to, Flies, Fruit Flies, Mosquitoes, Gnats, Wasps, Hornets and Small Flying Moths, dilute at the rate of 2 fluid ounces per gallon of water. Apply as a fog or fine mist (at approximately 2 fluid ounces per 1,000 cubic feet of space), directing the nozzle for maximum coverage and above livestock and poultry toward the ceiling and upper corners of the area being treated. For best results, close doors and windows before spraying, and keep them closed for 10 to 15 minutes. Applicator should vacate the treated area and ventilate it prior to returning. Repeat application as necessary.
STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

PESTICIDE DISPOSAL: To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

CONTAINER HANDLING: Nonrefillable container: Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Then offer for recycling if available; or puncture and dispose of in a sanitary landfill.

Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

For use on growing

ACTIVE INGREDIENT
Pyre

**OTHER INGREDIENTS

*Equivalent to

EVER

IF SWALLOWED: Call a poison control center or doctor for treatment advice.

Have the product container close by.

KEEP OUT OF REACH OF CHILDREN
CAUTION

FIRST AID
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), you may call 1-888-740-8712.
