**PRODUC T INFORMA TION**

**INTE NT OF USE**
Use LA NNA TE® LV to control serious infestations of many insect pests in field crops and greenhouse plants. LA NNA TE® LV is primarily used for the control of grasshopper, cucumber beetle, cutworm, and aphid infestations. It is a rapid acting contact insecticide.

**RATE AND METHOD OF APPLICATION**

- **Field Crops:**
  - Use 1 to 3 applications of the highest recommended rate for controlling severe infestations. Thereafter, use the lowest rate possible to maintain control.
  - Aerial applications are recommended for all crops except fava beans, navy beans, and succulent asparagus beans.
  - For aerial, use a minimum of 2 gals. per acre (gpa) except 10 gpa for nectarines and peaches; 15 gpa for oranges, lemons, grapefruit, tangelos, and tangerines.

- **Greenhouse Plants:**
  - Use 1 to 3 applications of the highest recommended rate for controlling severe infestations.
  - Thereafter, use the lowest rate possible to maintain control.

**APPLICATION REQUIREMENTS**

- **Mixing:**
  - Use 1 to 3 applications of the highest recommended rate for controlling severe infestations.
  - Thereafter, use the lowest rate possible to maintain control.

- **Volume per Acre:**
  - Aerial applications must be made at the highest recommended rate to control severe infestations. Thereafter, use the lowest rate possible to maintain control.

**PRECAUTIONS AND ST ANDARDS**

- **Mixers, loaders, cleaners, repairers of application equipment:**
  - Wear appropriate protective clothing and equipment.

- **Drift Management:**
  - The most effective way to reduce drift potential is to apply large droplets (>150 - 200 microns). The best drift management strategy is to apply the largest droplets possible.

- **Environmental Conditions:**
  - Avoid applying LA NNA TE® LV during or immediately after rain or excessively high wind conditions.

**POST TREATMENT CONSIDERATIONS**

- **Sign Posting:**
  - Posting must conform to all the following requirements. Treated areas shall be posted with signs at all usual points of entry and along likely routes of approach.

**FIRST AID**

- **Inhalation:**
  - Remove to fresh air.

- **Eyes:**
  - Rinse with plenty of water for 15 minutes. Do not apply heat.

- **Skin:**
  - Wash with soap and water. Avoid contact with eyes, mouth, and skin.

- **Ingestion:**
  - Do not induce vomiting. Give several ounces of water if swallowed.

**TOXICITY**

- **LD₅₀:**
  - Oral: Rat - 150 mg/kg.

**INTERACTION OF LA NNA TE® LV WITH OTHER CHEMICALS**

- **Do not use LA NNA TE® LV with Bordeaux mixture, "Du Ter" (triphenyltin hydroxide), lime sulfur, "Rayplex" iron nor in highly alkaline solutions. Use mildly alkaline solutions with control and resistance is a reasonable cause, immediately consult your local company representative or agricultural advisor for the best alternate method.

**COMPATIBILITY OF LA NNA TE® LV WITH OTHER CHEMICALS**

- **Do not use LA NNA TE® LV with Bordeaux mixture, "Du Ter" (triphenyltin hydroxide), lime sulfur, "Rayplex" iron nor in highly alkaline solutions.

**USE RESTRICTIONS**

- **Use only enough air volume to penetrate the canopy and provide good coverage.

**NOTICE TO USERS**

- **Users should:**
  - Avoid contact with eyes, mouth, and skin.

**LABELLING**

- **Labeling requirements include:**
  - EPA Reg. No. 352-384 TOT A L 100%
  - Provision of first aid instructions.
  - Warning statements.
  - Insecticide information.
  - Application method.
  - Storage and disposal.

**SUPPLEMENTAL LABELS**

- **(Supplemental Labels, Special Local Need Registrations, FIFRA Section 18 exemptions, FIFRA 2(ee) Bulletins), or as otherwise permitted by FIFRA.**
