DuPont™ Lannate® LV

INSECTICIDE

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification. Direct supervision for this product requires the certified applicator to review federal and supplemental label instructions with all personnel prior to application, mixing, loading, or in cleaning of application equipment.

E. I. du Pont de Nemours and Company, 1007 Market Street Wilmington, Delaware 19898 U.S.A.

A01 7 8327 0

Contains 2.4 lbs ACTIVE INGREDIENT PER GALLON.

ACTIVE INGREDIENT

Methomyl (S-methyl-N-[/(methylcarbamoyl)oxy]thioacetimidate)

OTHER INGREDIENTS

71%

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-441-3637 for emergency medical treatment information.

Artificial respiration or oxygen may be necessary. Allow no further exposure to any cholinesterase inhibitor until recovery is assured.

Mixers, loaders, cleaners, repairers of application equipment, and others exposed to the concentrate must wear:

PERSONAL PROTECTIVE EQUIPMENT

Long-sleeved shirt and long pants. Chemical-resistant gloves, such as barrier laminate or butyl rubber.

Shoes plus socks. Protective eyewear.

IF INHALED:

Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN:

— Atropine sulfate should be used for treatment. Administer repeated doses, 1.2 to 2.0 mg. intravenously every 10 to 30 minutes until full atropinization is achieved. Maintain atropinization until the patient recovers.

POISONING SYMPTOMS

(Due to High Acute Toxicity to Humans.)

— Methomyl poisoning produces effects associated with anticholinesterase activity which may include weakness, blurred vision, headache, nausea, abdominal cramps, discomfort in the chest, constriction of the pupil, weakness, constipation, and sweating.

Probable mucosal damage may contraindicate the use of gastric lavage.

POISON CONTROL CENTER OR DOCTOR:

Call a poison control center or doctor immediately for treatment advice. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

ENGINEERING CONTROL STATEMENTS

First-Aid Equipment: Wash thoroughly and change into clean clothing.

FIRST-AID:

DO NOT SUBJECT TO TEMPERATURES BELOW 32°F. Net: 55 GALLONS Nonrefillable Container

USER SAFETY RECOMMENDATIONS

DO NOT USE OR STORE NEAR HEAT OR OPEN FLAME. Keep container closed. Use with adequate ventilation.

ENVIRONMENTAL HAZARDS

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply near blooming crops or weeds. Do not contaminate water when disposing of use. Do not contaminate water when disposing of pesticide equipment wash water or rinsate.

This chemical can contaminate surface water through spray drift. Under some conditions, it may also have a high potential to contaminate ground water and surface water. Use an application method consistent with the WPS. Do not apply on vineyards. Do not apply to surface water or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of this product's concentrate.

Agricultural Use Requirements

This chemical can contaminate surface water through spray drift. Under some conditions, it may also have a high potential to contaminate ground water and surface water. Use an application method consistent with the WPS. Do not apply on vineyards. Do not apply to surface water or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of this product's concentrate.

PUBLIC HEALTH RECOMMENDATIONS

READ DIRECTIONS FOR USE IN SUPPLEMENTAL LABELING ATTACHED.
