RESTRICTED USE PESTICIDE
DUE TO TOXICITY TO FISH AND AQUATIC ORGANISMS.
For retail sale to and use only by Certified Applicators, or persons under their direct
supervision, and only for those uses covered by the Certified Applicator’s certification.

FIFRA Section 24(c) Special Local Need

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

DANITOL® 2.4 EC SPRAY

EPA Reg. No. 59639-35
EPA SLN No. WA-020014
Rev. 2

DANITOL® 2.4 EC SPRAY FOR CONTROL OF STINKBUG ON
APPLE AND PEAR BY AERIAL APPLICATION

This label for Danitol 2.4 EC Spray expires and must not be distributed or used in accordance with this
SLN registration after December 31, 2017.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This labeling must be in the possession of the user at the time of pesticide application.

Follow all applicable directions, restrictions, Worker Protection Standard requirements and precautions
on the EPA-registered label.

<tr>
<td>Apple Pear &amp; Non-Crop Borders next to Apple &amp; Pear Orchards</td>
<td>Stinkbug</td>
<td>16 to 21-1/3 fl oz (0.3 to 0.4)</td>
<td>Ground application is the preferred method of application to ensure uniform coverage of fruit and foliage. Aerial application of Danitol 2.4 EC Spray may be made when orchard conditions make ground application impractical (such as bins, props and low hanging limbs due to heavy fruit loads shortly before harvest). Control with aerial application may not be equal to ground application. Orchard border rows and vegetation surrounding the orchard should be inspected prior to treatment to verify the presence of stinkbugs. Apply Danitol 2.4 EC Spray with air or ground equipment to non-crop borders adjacent to apple and pear orchards in sufficient water to ensure uniform coverage (minimum of 10 gal/acre by air and minimum of 20 gallons per acre by ground). Ground application to orchard rows should be made as a full coverage spray with air-blast spray equipment in a minimum of 75 to 100 gal/acre. <strong>WSDA Aquatic Advisory:</strong> This pesticide is extremely toxic to fish and aquatic organisms and is toxic to wildlife. Danitol 2.4 EC Spray should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at <a href="http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx">http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx</a> or contact the Washington Department of Fish &amp; Wildlife, National Marine Fisheries Service (NOAA Fisheries) or U.S. Fish &amp; Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.</td>

</table>

**RESTRICTIONS/PRECAUTIONS**
- Do not exceed 2-2/3 pints (42-2/3 fl oz, 0.8 lb ai fenpropathrin) total application of Danitol 2.4 EC Spray per acre per season.
- Do not apply within fourteen (14) days of harvest.
- This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or broadleaf weeds.
- Do not apply this product or allow it to drift to blooming trees or broadleaf weeds. Broadleaf weed bloom must be controlled prior to application.
- For use under this SLN label, do not apply this product through any type of irrigation system.
- Do not feed or allow livestock to graze on cover crops from treated orchards.

**WSDA Container Disposal Guidance:** Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program website at [http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx](http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx). Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.
