CAUTION

Keep out of reach of children

Harmful if inhaled

Avoid contact with eyes, skin, or clothing

FIRST AID

IF IN EYES

• Hold eye open and flush with water for 15 to 20 minutes.
• Remove contact lenses if present after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING

• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

IF INHALED

• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a poison control center or doctor for treatment advice.

• You can also call 314-694-4000, collect, day or night, for emergency medical treatment information.

• This product is identified as Roundup WeatherMAX Herbicide, EPA Registration No. 524-537.

Read the entire label before using this product. Use only according to label directions.

AVOID CONTACT OF THIS HERBICIDE WITH FOLIAGE, GREEN STEMS, EXPOSED NON-WOODY ROOTS OR FRUIT OF CROPS DESIRABLE PLANTS AND TREES, EXCEPT AS DIRECTED FOR USE ON ROUNDUP READY® CROPS, AS SEVERE PLANT INJURY OR DESTRUCTION COULD RESULT.

Read the "LIMIT OF WARRANTY AND LIABILITY" statement at the end of this labeling before buying or using. If terms are not acceptable, return at once unopened.

THIS IS AN END-USE PRODUCT. MONSANTO COMPANY DOES NOT INTEND AND HAS NOT REGISTERED IT FOR REFORMULATION. SEE INDIVIDUAL CONTAINER LABEL FOR REPACKAGING LIMITATIONS.

Herbicide for Roundup Ready® Crops
Selective broad-spectrum weed control in Roundup Ready® crops
Non-selective, broad-spectrum weed control for many agricultural systems and noncroplands

ACTIVE INGREDIENT:

*Glyphosate, N-(phosphonomethyl)glycine, in the form of the potassium salt........ 48.8%.

OTHER INGREDIENTS: ................................................................................ 51.2%
..............................................................................................................100.0%

*Contains 660 grams of the active ingredient glyphosate, in the form of the potassium salt, per liter or 5.5 pounds per U.S. gallon, which is equivalent to 540 grams of the acid.

NOTES: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 64, 72, 80, 88, 96

CONTENTS

1.0 INGREDIENTS

For a list of patents, if any, covering this product or its use, please go to the agency responsible for pesticide regulation.

* Contains 660 grams of the active ingredient glyphosate, in the form of its potassium salt, per liter or 5.5 pounds per U.S. gallon, which is equivalent in the form of its potassium salt ................................................... 48.8%

IF ON CONTACT, Wash off immediately with plenty of soap and water. If not readily removable, wash skin with petrolatum or other non-corrosive oil for at least 15 minutes, then wash with soap and water.

If eye contacted, remove contact lenses (if worn), if safe to do so, and flush eyes with large amounts of clean water for at least 15 minutes. If pain or irritation persists, consult a physician.

• Have the product container or labeling with you when calling a poison center or doctor. This product contains the active ingredient glyphosate. In case of an emergency, call 1-800-332-3111. For medical assistance, call collect, day or night, (314) 694-4000.

Non-Agricultural Use Requirements

This product is a postemergence, systemic herbicide and is effective against a wide range of grasses and broadleaves. glyphosate products are used for the control of weeds on a variety of non-selective and non-competitive crops. It is also used for the control of weeds on non-crop areas, such as roadsides, railways, and in recreational areas.

In the event of a fire, use dry chemical, carbon dioxide (CO2), dry chemical (Class D), foam, or water fog. Do not use sand or earth as extinguishing agents. In the event of a fire, use dry chemical, carbon dioxide (CO2), dry chemical (Class D), foam, or water fog. Do not use sand or earth as extinguishing agents.

* Master label rate: 2.5 g, 2.7 g, 4.7 g of glyphosate per acre per application

Do not apply this product in a way that will contact workers or other persons, including pets. Do not apply this product when children are likely to be present or within areas where the sprayed plants are being or are likely to be handled.

The primary target species for this product is annual weeds. This product is a postemergence, systemic herbicide and is effective against a wide range of grasses and broadleaves. glyphosate products are used for the control of weeds on a variety of non-selective and non-competitive crops. It is also used for the control of weeds on non-crop areas, such as roadsides, railways, and in recreational areas.

INSIDE TEXT (Even Pages)

1. Mixing with Water

Do not mix this product with other products containing the Group 9 herbicides. For enhanced results, apply tank mixtures with this product at a minimum time to symptoms of 4 to 5 days. Check the "ANNUAL WEEDS RATE SECTION" and "PERENNIAL WEEDS RATE SECTION" of this label.

2. Tank Misters

This product does not provide residual weed control. This product may be tank-mixed with other herbicides to provide residual weed control in the soil. The combination of this product with other continuous-acting herbicides is not recommended. The total rate of all products applied must not exceed the rates listed on the product labels. Consult a local Cooperative Extension Service agent for information on tank mixtures for combining specific residual herbicides.

3. Head Misting Practices

Resistant populations are those in which individual plants are resistant to the normal level of a herbicide. Resistance occurs when the plant is able to survive and produce seed even when herbicides are used at their normal levels. Resistance can be managed by rotating crops, using different herbicides, and by using a combination of cultural techniques and cultural practices.

4. Weeds

Spray application of the product may result in direct and indirect effects on beneficial and detrimental organisms. Insecticides or fungicides are recommended when necessary to control weeds. This product is not recommended for control of weeds in aquatic environments.

5. Notes

Ensure the applicator and all equipment used to apply this product are compatible with the chemical mixtures to which this product is being mixed. If any questions arise regarding the compatibility of the chemical mixtures, refer to the "MIXING" section of this label for instructions regarding other additives.

**Ground Application Equipment**

Keep the product in the appropriate tank as specified on the label or in a 3 to 4 gallon water/methanol tank when spraying through an irrigation system with a standard water/methanol tank. All other water/methanol tank systems are not approved for use with this product. Water/methanol tank systems are not approved for use with this product because of the potential for increased drift and high phytotoxicity. Ensure that the pressure tank system is properly designed and constructed to avoid leaks or spills.

**Handheld Sprayers**

When using a handheld sprayer, supply spray solution of the product at a pressure of 30 to 70 pounds per square inch (PSI). For best results, adjust the nozzle for a spray pattern that produces a spray angle of between 80 and 95 degrees from the top of the hood. This will ensure that the minimum concentration of herbicide will reach the target vegetation. Avoid operating this equipment on rough or sloping surfaces.

**A hooded sprayer must be configured and operated in a manner that the spray volume reaches the ground in deep furrows. The spray nozzle(s) should be in a position that the spray is directed toward the ground or other vegetation from the ground, ensuring even coverage of the target vegetation. A shielded sprayer directs the herbicide solution to the target weeds while avoiding contact with the crop or vegetation. Avoid using this equipment on mulched or unmulched row middles.

**A mechanical sprayer is preferable to other methods of application.**

**Interplant Application**

Spray volunteers or weeds between rows of crops at the rate of 20 to 30 gallons per acre. The spray volume should be adjusted to ensure adequate coverage of weeds and vegetation. Use nozzles that will avoid generating spray mist. Avoid operating this equipment on rough or sloping surfaces.

**A shielded sprayer directs the herbicide solution to the target weeds while avoiding contact with the crop or vegetation.**

Avoid using this equipment on mulched or unmulched row middles.

**A mechanical sprayer is preferable to other methods of application.**

**Interplant Application**

Spray volunteers or weeds between rows of crops at the rate of 20 to 30 gallons per acre. The spray volume should be adjusted to ensure adequate coverage of weeds and vegetation. Use nozzles that will avoid generating spray mist. Avoid operating this equipment on rough or sloping surfaces.

**Handbook Sprayers**

A hooded sprayer head should be configured and operated in a manner that the spray volume reaches the ground in deep furrows. The spray nozzle(s) should be in a position that the spray is directed toward the ground or other vegetation from the ground, ensuring even coverage of the target vegetation. A shielded sprayer directs the herbicide solution to the target weeds while avoiding contact with the crop or vegetation. Avoid using this equipment on mulched or unmulched row middles.

NOTES

Book Cut/Fold Lines

(1) RESTRICTIONS: This product may be used as a foliage contact herbicide, spot treatment or as a preplant herbicide. It is not recommended for use over the top of sugarbeet.(2) RESTRICTIONS: This product is a broadleaf systemic herbicide and should not be used in or around areas where livestock feed is grown. Avoid application to livestock feed or livestock feed areas and do not use where livestock feed will be used. Avoid application to areas where livestock feed will be used by livestock. Avoid application to areas where livestock feed will be used by livestock feeders. Do not apply this product in cowpeas, since these are considered to be grown only as livestock feed. Do not apply to cowpeas in the "APPLICATION EQUIPMENT AND TECHNIQUES" section of this label.

TROUBLESHOOTING/TECHNICAL ASSISTANCE: For assistance with this product, call Monsanto at 1-800-635-1882. Monsanto represents the Crop Protection Division of Dow AgroSciences, 933 North Main Street, Indianapolis, Indiana 46204. Monsanto Crop Protection Division is a unit of The Dow Chemical Company. Monsanto, The Monsanto logo, Pintura, and all other trademarks and service marks are owned by The Dow Chemical Company or one of its subsidiaries.

**NEW STAND ESTABLISHMENT (Seeding Year)**

**Application Rates**

- **Preplant, At-planting and Preemergence single application**
  - Apply 11 fluid ounces of this product per acre or up to 22 fluid ounces per acre in a tank mixture with the following herbicides:
    - imazamox; imazapic
    - sethoxydim; quizalofop p-ethyl

- **Postemergence (In-crop)**
  - Apply 11 to 16 fluid ounces of this product per acre after the crop has emerged and is in the stage of development when control is needed for acceptable weed control.
  - Overlapping applications as this could result in temporary yellowing, delayed flowering, and/or growth reduction. Similar crop injury could result when applied to a subsequent crop prior to or during bolting or flowering.

**RESTRICTIONS:**
- Allow a minimum of 5 days between sequential applications.
- Apply this product at a rate of between 11 and 22 fluid ounces per acre per season.
- The total for all Preplant, At-Planting, Preemergence and Postemergence applications combined is 44 fluid ounces per acre.

**USE INSTRUCTIONS:**
- This product may be applied at a rate of between 11 and 22 fluid ounces per acre on Roundup Ready canola with the directions for use on TruFlex Roundup Ready Canola.
- For directions for use on TruFlex Roundup Ready Canola, refer to the “ROUNDUP READY CROPS” section of this label for information on Maximum Application Rates.
- For directions for use of this product on TruFlex Roundup Ready Canola, refer to the section for use on Non-Glyphosate-Tolerant Canola.

**APPLICATIONS:**
- Preplant; At-planting; Preemergence; Postemergence

**TYPES OF APPLICATION:**
- Preplant; At-planting; Preemergence; Postemergence

**PRECAUTIONS:**
- Freezing or near freezing conditions, or large temperature fluctuations may adversely affect the surfactant. Refer to the “SURFACTANTS” section of this label for more information on surfactant application rates.

**MIXING:**
- Read and follow label directions for all products in the tank mixture.
- Ensure that the product used in the tank-mix is labeled for application to Roundup Ready crops. This product may be applied at a rate of between 11 and 22 fluid ounces per acre in a tank mixture with the following herbicides:
  - imazamox; imazapic
  - sethoxydim; quizalofop p-ethyl

**APPLICATIONS:**
- Preplant; At-planting; Preemergence; Postemergence

**PRECAUTIONS:**
- Always a minimum of 1 days between sequential applications.
- The total for all Preplant, At-Planting, Preemergence, and Postemergence applications combined is 44 fluid ounces per acre at the 4-trifoliate growth stage.

**NEW STAND ESTABLISHMENT (Seeding Year)**

For maximum weed control, make a postemergence (in-crop) application when weeds exceed 4 inches in height.

Restrictions

- Maximum quantity of this product that may be applied for weed control in FTC-based seed corn production fields is 22 quarts per acre.
- A 1-day interval between applications for tanker application.
- A 2-day interval between applications for over-the-top broadcast applications.

Application

This product may be applied alone or in a tank-mix over the top. Information on tank-mixed products can be found in the "TANK-MAINS" section of this label.

Precaution

For maximum weed control, make a postemergence (in-crop) application when weeds exceed 4 inches in height. For more information on tank-mixed products, see the "TANK-MAINS" section of this label.

N/A
of this product in 3 to 10 gallons of water per acre to bindweed that has reached a length of 6 to 18 inches in length. 

For suppression in the spring, apply 22 fluid ounces of this product in 3 to 10 gallons of water per acre. When going from orchardgrass sod to no-till corn, apply 22 to 32 fluid ounces of this product in 3 to 10 gallons of water per acre or 44 fluid ounces in 10 to 40 gallons of water per acre. Apply to actively growing target plants up to 24 inches tall. Sequential applications of 22 to 44 fluid ounces of this product in 3 to 10 gallons of water per acre or 64 fluid ounces in 10 to 40 gallons of water per acre may be made following harvest or when most plants have reached the 7-leaf stage of growth. Subsequent applications will be necessary for long-term control.

In annual cropping systems, apply 22 to 44 fluid ounces of this product in 3 to 10 gallons of water per acre to suppress annual weeds that are actively growing and in full bloom. Do not apply with residual herbicides when applying this product for suppression. Use a commercial sprayer with a minimum droplet size of 50 microns to ensure the product reaches the target weeds. A single application of 22 to 44 fluid ounces of this product, applied at least 3 weeks prior to a killing frost, provides effective suppression in pastures, sod fields or non-crop areas where deep tillage will not follow the application. Application of this product may be made up to 14 days prior to a killing frost. Visual symptoms of control will be slow to develop.

* For enhanced results, apply when at least 60 percent of the target plants have reached the boot to early-seedhead stage of development. For partial control, apply in late-September or October when trumpetcreeper is at or beyond flowering. For enhanced results, apply when maximum emergence has occurred and the majority of runners are 6 to 18 inches in length.

** For partial control or suppression, apply a 0.7-percent solution of this product as a spot treatment when johnsongrass is 12 to 18 inches tall. Ensure that spray coverage is uniform with deep tillage, apply 22 fluid ounces of this product in 3 to 10 gallons of water per acre when most plants have reached the boot to early seedhead stage of growth. Allow a minimum of 3 days after application before tillage.

** Apply when most target plants have reached the late-bud to flower stage of growth. For enhanced results, apply at late-spring or fall. Allow a minimum of 3 days after application before planting. A single application of 44 fluid ounces, in 5 to 10 gallons of water per acre or 64 fluid ounces in 10 to 40 gallons of water per acre may be made following harvest or when most plants have reached the 7-leaf stage. Subsequent applications will be necessary for long-term control.

** Enhanced results can be obtained when application is made to late summer or fall. Application of this product may be made up to 14 days prior to a killing frost. Visual symptoms of control will be slow to develop.
This product contains glyphosate, an herbicide that is a known carcinogen. Use appropriate precautions when handling this product.

### Herbicidal Action

This product controls vegetation as indicated by the chemical description on the Complete Directions for Use label. It is not a selective herbicide and will kill desirable as well as undesirable species of plants when applied at the rates listed below. Avoid application to or contact with desirable vegetation, crop injury or failure of crop due to abnormal weather or to conditions beyond the control of this Company, including, but not limited to, weather problems, shortage of water, insect infestations, and disease. For in-crop (over-the-top) uses on Roundup Ready crops, crop safety and weed control performance are not warranted by Monsanto when this product is used in the manner described.

This Company does not warrant any product reformulated or repackaged ranges set forth in the Directions, use and/or application in any manner not in accordance with the Complete Directions for Use label (“Directions”) and the chemical description on the label. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, NO OTHER EXPRESS WARRANTY OR IMPLIED WARRANTY IS MADE OR GIVEN BY THIS COMPANY OR ANY OTHER SELLER WITH RESPECT TO THE USE OR APPLICATION OF SUCH QUANTITY OF SUCH QUANTITY, OR, IF NOT ACQUIRED BY PURCHASE, REPLACEMENT BY THE SELLER FOR THE QUANTITY OF THIS PRODUCT INVOLVED, OR, AT THE DISCRETION OF THE SELLER, REIMBURSEMENT OF THE PURCHASE PRICE OF THE QUANTITY OF THIS PRODUCT INVOLVED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO EVENT SHALL THIS COMPANY OR ANY OTHER SELLER BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OR HANDLING OF THIS PRODUCT, INCLUDING, BUT NOT LIMITED TO, INJURY TO PERSONS OR PROPERTY, LOSS OF USE, LOSS OF PROFITS, OR REVENUE, LOSS OF BUSINESS, OR ANY OTHER LOSS ARISING FROM USE OR HANDLING OF THIS PRODUCT. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY FOR ANY CLAIMS FOR DAMAGES FOR INJURY TO PERSONS OR PROPERTY, LOSS OF USE, LOSS OF PROFITS, OR REVENUE, LOSS OF BUSINESS, OR ANY OTHER LOSS ARISING FROM USE OR HANDLING OF THIS PRODUCT IS THE REIMBURSEMENT OF THE PURCHASE PRICE OF THE QUANTITY OF THIS PRODUCT INVOLVED.

1. Partial Control
   - Through burning of foliage is necessary for enhanced results.

### Herbicidal Action

Enhanced results can be obtained following application in the fall. Application to regenerating plants prior to leaf development is not recommended. For in-crop (over-the-top) uses on Roundup Ready crops, crop safety and weed control performance are not warranted by Monsanto when this product is used in the manner described.

**Worldwide**

Enhanced results can be obtained when application is made in the fall. Refrigerate and do not freeze. In arid areas, application in the fall must be made before leaves lose green color.

### Herbicidal Action

For partial control, apply 44 to 86 fluid ounces of this product per acre. For full control, apply 88 to 140 fluid ounces of this product per acre. Application to re-sprouts that are 3 to 6 feet tall. Enhanced results can be obtained following application in the fall.

### Herbicidal Action

This product is nontoxic to fish. Use this product in sufficient quantities to control vegetation as indicated by the chemical description on the label. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, NO EVENT SHALL THIS COMPANY OR ANY OTHER SELLER BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OR HANDLING OF THIS PRODUCT, INCLUDING, BUT NOT LIMITED TO, INJURY TO PERSONS OR PROPERTY, LOSS OF USE, LOSS OF PROFITS, OR REVENUE, LOSS OF BUSINESS, OR ANY OTHER LOSS ARISING FROM USE OR HANDLING OF THIS PRODUCT. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY FOR ANY CLAIMS FOR DAMAGES FOR INJURY TO PERSONS OR PROPERTY, LOSS OF USE, LOSS OF PROFITS, OR REVENUE, LOSS OF BUSINESS, OR ANY OTHER LOSS ARISING FROM USE OR HANDLING OF THIS PRODUCT IS THE REIMBURSEMENT OF THE PURCHASE PRICE OF THE QUANTITY OF THIS PRODUCT INVOLVED.
NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 64, 72, 80, 88, 96.
**PRINCIPAL_use and RECOMMENDATIONS STATEMENTS**

**Hazardous INGREDIENTS**

* Glyphosate: Cause moderate eye irritation. Inhaling of dust may irritate respiratory tract. Avoid breathing dust or spray mist. Avoid contact with eyes, skin, or clothing. Avoid breathing dust or spray mist.

* Polyacrylamide: Harmful if inhaled. Avoid contact with eyes, skin, or clothing. Avoid breathing dust or spray mist.

**Storage and Disposal**

Proper storage and disposal are essential to protect against exposure to people and the environment. Do not store in direct sunlight or near heat, open flame, sparks, or other ignition sources. Hazardous waste is any pesticide that is not disposed of in accordance with local, state, and federal regulations.

Do not store with food, feed, or feed ingredients. Keep container closed to prevent spills and contamination.

**Handling and Disposal of-contaminated Materials**

If such symptoms are observed, provide the animal with plenty of fluids to prevent dehydration.

**FIRST AID**

**IF IN EYES**

• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.  Call a poison control center or doctor for treatment advice.

**IF INHALED**

• Move person to fresh air.

**IF SWALLOWED**

• Call a poison control center or doctor for treatment advice.

**IF SKIN OR CLOTHING**

• Take off contaminated clothing and wash immediately with soap and water for 15 to 20 minutes.  Call a poison control center or doctor for treatment advice.

**IF ON FURNITURE OR CARPET**

• Wipe clean with detergent and hot water.  Keep and use clean floor washing equipment.

**LEGAL AND OTHER REQUIREMENTS**

This product is subject to the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170). The WPS applies when the pesticide is used to prevent agricultural plants from herbicides, herbicides, or pesticides. 

**Environmental Hazard(s)**

• May emit harmful fumes when exposed to sunlight, heat, or other ignition sources.

• Not apply this product in a way that will contact workers or other persons, either directly or through drift.

**Topical Use Limitations**

• Do not use in closed environments or using equipment that will result in inhalation of dust or spray mist.

**Residential Use Limitations**

• Do not use in a closed environment or using equipment that will result in inhalation of dust or spray mist.

**Non-agricultural Use Limitations**

**NOTICE TOÏUSERS: This product is not intended for non- agricultural use.**

**The Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170):**

• Contains 660 grams of the active ingredient glyphosate, in the form of its potassium salt, per liter or 5.5 pounds per U.S. gallon, which is equivalent to 540 grams of the acid, glyphosate, per liter or 4.5 pounds per U.S. gallon, (10.6% weight).

**NOT REGISTERED IT FOR REFORMULATION. SEE INDIVIDUAL CONTAINER LABEL FOR ADDITIONAL INFORMATION.**

**Return Properly Rinsed Container to Monsanto for Recycling - Call 1-800-ROUNDUP (1-800-768-6387)**

**Physical or Chemical Hazards**

• Not a flammable liquid or gas. Avoid contact with eyes, skin, or clothing. Avoid breathing dust or spray mist.

**Other Physical Properties**

• Contains 660 grams of the active ingredient glyphosate, in the form of its potassium salt, per liter or 5.5 pounds per U.S. gallon, which is equivalent to 540 grams of the acid, glyphosate, per liter or 4.5 pounds per U.S. gallon, (10.6% weight).

**Vapor Pressure**

• Yes, it is possible to ignite this product by exposing it to a closed environment or using equipment that will result in inhalation of dust or spray mist.

**Flash Point**

• This product is not flammable.

**Boiling Point**

• This product is not flammable.

**Pour Point**

• This product is not flammable.

**辛酸溶点**

• This product is not flammable.

**Urea Concentration**

• This product is not flammable.

**Cryoprotectant Concentration**

• This product is not flammable.

**Labeling statement**

• Includes 660 grams of the active ingredient glyphosate, in the form of its potassium salt, per liter or 5.5 pounds per U.S. gallon, which is equivalent to 540 grams of the acid, glyphosate, per liter or 4.5 pounds per U.S. gallon, (10.6% weight).

Hazards to Humans and Domestic Animals

IF INHALED

• Move person to fresh air.
• Call a poison control center or doctor for treatment advice.

IF ON SKIN

• Wash skin immediately with plenty of water for 15 to 20 minutes.
• Take off contaminated clothing.
• Call a poison control center or doctor for treatment advice.

INHALED

• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Have the product container or labeling with you when calling a poison control center or doctor.
• Call a poison control center or doctor for treatment advice.

IF ON CLOTHING

• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Take off contaminated clothing.
• Call a poison control center or doctor for treatment advice.

DOMESTIC ANIMALS:

• Remove from animal’s contact with the product or its application and wash thoroughly with soap and water.
• Keep animal away from any areas where the product has been applied.
• Call a veterinarian if symptoms persist for more than 24 hours.
• Bring the product container or labeling with you when calling a veterinarian.

FIRST AID

• This product is identified as
• You can also call

CAUTION

• This product is known to contain or be used with substances that may be harmful to humans and/or domestic animals. However, when used as directed, some of these substances may be beneficial to people and/or domestic animals. See the label for more information.

IN case of contact with eyes:

• Rinses with plenty of water for 15 to 20 minutes.
• Seek medical attention.

IN case of contact with skin:

• Wash with plenty of soap and water.
• Seek medical attention.

IN case of contact with clothing:

• Wash clothing before reuse.
• Seek medical attention.

IN case of ingestion:

• Do not induce vomiting.
• Call a poison control center or doctor for treatment advice.

IN case of exposure to fumes:

• Go outdoors or into fresh air.
• Call a poison control center or doctor for treatment advice.

IN case of breathing difficulties:

• Administer artificial respiration, preferably mouth-to-mouth, if possible.
• Have the product container or labeling with you when calling a poison control center or doctor.
• Call a poison control center or doctor for treatment advice.

IN case of discharge of any kind:

• Wash with soap and water.
• Seek medical attention.

IN case of exposure to dust:

• Wear a dust mask when cleaning equipment.
• Call a poison control center or doctor for treatment advice.

IN case of exposure to liquid:

• Wash with soap and water.
• Seek medical attention.

IN case of exposure to mist:

• Wash with soap and water.
• Seek medical attention.

IN case of inhalation of gas:

• Move person to fresh air.
• Call a poison control center or doctor for treatment advice.

IN case of irritation of mucous membranes:

• Rinses with plenty of water for 15 to 20 minutes.
• Seek medical attention.

IN case of irritation of rashes:

• Keep the rash covered.
• Call a poison control center or doctor for treatment advice.

IN case of burning:

• Cool burn under cool running water.
• Avoid applying ice packs or menthol.
• Call a poison control center or doctor for treatment advice.

IN case of contact with clothing:

• Wash clothing before reuse.
• Seek medical attention.
