User Safety Recommendations

• Avoid breathing vapor or spray mist.
• Harmful if inhaled.

CAUTION

• Do not contaminate water when cleaning equipment or disposing of equipment.
• Do not reuse this container for any other purpose.
• Do not contaminate water, foodstuffs, feed or seed by storage or disposal.

IF IN EYES

Rinse skin immediately with plenty of water for 15 to 20 minutes.

IF INHALED

Avoid breathing vapor or spray mist.

DOMESTIC ANIMALS:

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth.

For product information or assistance using this product call toll-free 1-800-332-3111

IN CASE OF FIRE

Do not use water. Use dry chemical, carbon dioxide, or Class B foam-type extinguisher. Do not use water.

For immediate assistance in the event of an accident involving this product, call the Monsanto Poison Center at 1-800-332-3111

If swallowed, get medical advice immediately.

Roundup WeatherMax Herbicide for Roundup Ready® Crops

Selective broad-spectrum weed control in Roundup Ready® crops.

Non-selective, broad-spectrum weed control for many agricultural systems and farmsteads

PRODUCT INFORMATION & DIRECTIONS FOR USE

This product is a selective herbicide that is used to control weeds in Roundup Ready® crops (see label or product literature for full list of crops).

For a list of patents, if any, covering this product or its use, please go to www.monsantotechnology.com.

Complete Directions for Use

Harmful if ingested, inhaled, or absorbed through the skin.

Keep out of reach of children.

Avoid contact with eyes, skin, or clothing.

Avoid breathing vapor or spray mist.

FIRST AID

IF IN EYES

• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
  • Remove contact lenses if present after the first 5 minutes then continue rinsing eye.
  • Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING

• Take off contaminated clothing.
  • Rinse skin immediately with plenty of water for 15 to 20 minutes.
  • Call a poison control center or doctor for treatment advice.

IF INHALED

• Move person to fresh air.
  • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
  • Call a poison control center or doctor for treatment advice.

• Have the product container or labeling with you when calling a poison control center or doctor, or going for treatment.

• You can also call (314) 694-4000, collect, day or night, for emergency medical treatment information.

• This product is identified as Roundup WeatherMAX Herbicide, EPA Registration No. 524-537.

Read the entire label before using this product. Use only according to label directions.

AVOID CONTACT OF THIS HERBICIDE WITH FOLIAGE, GREEN STEMS, EXPOSED NON-WOODY ROOTS OR FRUIT OF CROPS DESIRABLE PLANTS AND TREES, EXCEPT AS DIRECTED FOR USE ON ROUNDUP READY® CROPS, AS SEVERE PLANT INJURY OR DESTRUCTION COULD RESULT.

Read the “LIMIT OF WARRANTY AND LIABILITY” statement at the end of this labeling before buying or using. If terms are not acceptable, return at once unopened.

THIS IS AN END-USE PRODUCT. MONSANTO COMPANY DOES NOT INTEND AND HAS NOT REGISTERED IT FOR REFORMULATION. SEE INDIVIDUAL CONTAINER LABEL FOR REPACKAGING LIMITATIONS.

Herbicide for Roundup Ready® Crops

Selective broad-spectrum weed control in Roundup Ready® crops
Non-selective, broad-spectrum weed control for many agricultural systems and farmsteads

ACTIVE INGREDIENT:
Glyphosate, N-(phosphonomethyl)glycine, in the form of its sodium salt
48.8%

OTHER INGREDIENTS:
51.2%

Contains 660 grams of the active ingredient glyphosate, in the form of its sodium salt, per liter or 5.5 pounds per U.S. gallon, which is equivalent to 540 grams of the acid, glyphosate, per liter or 4.5 pounds per U.S. gallon (39.8% by weight).

Keep by-pass and return lines on or near the bottom of the tank to minimize the mixture before resuming application.

Mix only the quantity of spray solution that will be applied that day. Application carrier by mixing small proportional quantities in advance.

7.3 Tank-Filling Procedure

Proper formulation of the tank-mix concentrate is important in preparing the tank before application. See the quantity of spray solution that you will apply. Application

Some tank-mix products have the potential to cause injury under certain conditions. Some tank-mix products have the potential to cause injury under certain conditions. Refer to the Instructions section of the supplement or separate supplemental labeling for this product. The potential for crop injury.

Continued filling the tank with water through the screen and add the amount of this product indicated in the following table with water.

This product may be applied with the following application equipment:

Handheld Sprayers

For filling backpack and pump-up sprayers, consider mixing the appropriate amount of this product with water in a larger container and then filling the tank before adding other products.

The maximum single application rate for this product is 1.3 fl oz per acre. When using tank-mix products, carefully combine the appropriate amount of the products used in the mix.

When tank-mixing this product with 2,4-D, only 2,4-D amine formulations may be used. Applications are typically to be made with the nozzle release point at 8 to 15 feet above the top of the largest plants, unless a greater height is required for aircraft safety. Making the application at the lowest height that is safe and practical is the most effective way to control weeds. The maintenance of an organic coating (paint)

Some tank-mix products have the potential to cause injury under certain conditions. The potential for crop injury.

For the convenience of the operator, a chart of recommended nozzle sizes and working pressures is included on the label of the product used in the mix.

Aerial Application Equipment

When using a handheld sprayer, apply spray solutions of this product uniformly backwards, parallel to the air stream, will produce larger droplets than regular patterns.

For the convenience of the operator, a chart of recommended nozzle sizes and working pressures is included on the label of the product used in the mix.

This product will be killed along with the weeds. Take care not to spray or allow this product to drift or splash onto desirable vegetation. For information on non-target crops, do not apply this product within 500 feet of the desirable vegetation. Selective application equipment must be capable of preventing all vegetation contacted. To prevent injury to adjacent desirable vegetation.

When the desired height of the inversion layer is achieved, nozzle calibration and drift control reduction additives may be used.

In many cases, reducing this distance to 30 percent of the length of the wingspan or rotor will improve drift control without substantially increasing spray volumes.

Instruct the operator to maintain a minimum flight height of 80 feet above the ground or water surface during all aerial applications of Roundup WeatherMAX.

Aircraft Maintenance

Drift control reduction additives may be used.

The maintenance of an organic coating (paint)

Aircraft Maintenance

2 tablespoons = 1 fluid ounce (fl oz)

This product, when tank-mixed with dicamba, may not be applied by air in California.

A wiper applicator is a device that physically wipes this product or solutions of this product or destruction. To the extent consistent with applicable law, such damage shall be the sole responsibility of the applicator.

To avoid unwanted crop destruction. See the “APPLICATION EQUIPMENT AND PRECAUTIONS” section of this label.

Each product may be diluted in water and applied as a shielded or hooded sprayer. Shielded and hooded sprayers are used to apply liquid herbicides in greater volumes to achieve a more uniform herbicide concentration across the target area. Applications made using hooded sprayers are designed to move liquid herbicides through the canopy without causing injury to desirable vegetation. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution. Applications made using shielded sprayers are designed to apply liquid herbicides to the surface of the crop or vegetation in a finely atomized mist that will not cause injury to desirable vegetation. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution.

When using a mechanical wiper applicator, adjust the height of the applicator to ensure the wiper blades do not contact the crop. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the wiper blades do not contact the crop. /3. A mechanical wiper applicator is one that is operated by a mechanical or hydraulic motor or other means of power.

To apply this product to rice fields or levees when fields are flooded, do not apply more than 22 fluid ounces of this product per acre. Take care not to spray or allow spray to drift outside the target area in order to avoid unwanted crop destruction. See the “APPLICATION EQUIPMENT AND PRECAUTIONS” section of this label.

To reduce the potential for herbicide solution to migrate to one side, causing dripping on the lower end of the crop, or to drip onto desirable vegetation. Be aware that on sloping ground the herbicide solution can migrate to one side, causing dripping on the lower end of the crop, or to drip onto desirable vegetation. Be aware that on sloping ground the herbicide solution can migrate to one side, causing dripping on the lower end of the crop, or to drip onto desirable vegetation.

To avoid injury to desirable vegetation. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the wiper blades do not contact the crop. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the wiper blades do not contact the crop.

A hooded sprayer is a type of shielded sprayer where the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution.

To avoid injury to desirable vegetation. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution.

To avoid injury to desirable vegetation. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution.

To avoid injury to desirable vegetation. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution.

To avoid injury to desirable vegetation. To avoid injury to desirable vegetation, the spray should be applied in a manner that ensures the spray pattern is fully enclosed, including the top, sides, front and back, thereby shielding the crop from the herbicide solution.
SURFACTANT TO THIS PRODUCT FOR PREHARVEST APPLICATION TO COTTON.

**For all products used in the tank mixture, ensure a 5-day minimum interval between application and harvest of grain sorghum. Preharvest application of this product on grain sorghum (milo) could cause damage. Only hooded sprayers that completely enclose the spray product in any manner with any vegetation to which application is not intended are to be used. Contact of this herbicide, the main plant could be damaged or destroyed. Contact of this product or any other soybean herbicide may alter the appearance of initial pod set in soybean. For hard-to-control annual weeds, such as fall panicum, barnyardgrass, or 10 to 60 gallons of nitrogen solution per acre.

**TANK MIXTURES:** Apply 8 fluid ounces of this product per acre in a tank-mix with an appropriate product. 9.4 Oilseed Crops

**USE INSTRUCTIONS:** This product may be applied as a spot treatment in grain sorghum under conditions listed in the \"ANNUAL WEEDS RATE SECTION\" and \"PERENNIAL WEEDS RATE SECTION.\" For hard-to-control annual weeds, such as fall panicum, barnyardgrass, or over the top of peppermint and spearmint with a wiper applicator. Application may be repeated on the same area at 30-day intervals.

**RESTRICTIONS:** Do not make a PREHARVEST APPLICATION if you have exceeded the maximum application rate of this product for all preemergence, selective equipment applications. For sunflower, a tank mixture with pendimethalin may be applied before, during or after planting. Applications of this product to sweet sorghum (forage), sorghum (milo), soybean, squash (all types) or wheat.

**USE INSTRUCTIONS:** This product may be used as a substitute for tillage to control tall weeds. Application may be repeated on the same area at 30-day intervals. This product may be applied to grain sorghum stubble following harvest to control tall weeds. Apply 8 fluid ounces of this product in 3 to 10 gallons of water per acre.

**RESTRICTIONS:** Grain sorghum must be at least 12 inches tall, measured from the soil line to the highest point of the plant. Applications are repeated on the same area at 30-day intervals. This product may be applied using a wiper applicator or shielded hooded sprayer. See \"SELECTIVE EQUIPMENT.\" Applications of this product to sweet sorghum (forage), sorghum (milo), soybean, squash (all types) or wheat.

**USE INSTRUCTIONS:** This product may be applied in soybean using a wiper applicator or shielded hooded sprayer. Applications of this product to sweet sorghum (forage), sorghum (milo), soybean, squash (all types) or wheat.

**RESTRICTIONS:** Allow a minimum of 7 days between application and harvest of grain sorghum. Preharvest application of this product on grain sorghum (milo) could cause damage. Only hooded sprayers that completely enclose the spray product in any manner with any vegetation to which application is not intended are to be used. Contact of this herbicide, the main plant could be damaged or destroyed. Contact of this product or any other soybean herbicide may alter the appearance of initial pod set in soybean. For hard-to-control annual weeds, such as fall panicum, barnyardgrass, or 10 to 60 gallons of nitrogen solution per acre.

**TANK MIXTURES:** Apply 8 fluid ounces of this product per acre in a tank-mix with an appropriate product. 9.4 Oilseed Crops

**USE INSTRUCTIONS:** This product may be applied as a spot treatment in grain sorghum under conditions listed in the \"ANNUAL WEEDS RATE SECTION\" and \"PERENNIAL WEEDS RATE SECTION.\" For hard-to-control annual weeds, such as fall panicum, barnyardgrass, or over the top of peppermint and spearmint with a wiper applicator. hybrids that contain Roundup Ready 2 Technology, see the "Sweet Corn Hybrids Technology logo.

3.3 quarts per acre

When applied as directed, this product will control annual grasses and broadleaf weeds when corn plant height is 24 to 30 inches. When corn plants are in the V13 stage or 100 GDU (Growing Degree Units) before flowering.

Maximum Application Rates

For annual and perennial weed control prior to crop harvest after 20 nodes of incremental growth have occurred, apply 22 fluid ounces per acre before weeds exceed 4 inches in height or before weeds become competitive with the crop. If apply more than 2 applications of this product, do not apply the last application within 15 days of the crop's physiological maturity.

USE INSTRUCTIONS: This product may be applied over the top of Roundup Ready cotton.

APPLICATION ON CANOLA GROWN FOR FOOD OR FEED.

12.8 Roundup Ready Soybeans

Preemergence applications 3.3 quarts per acre

POSTEMERGENCE APPLICATIONS

See the "ROUNDUP READY CROPS" section of this label for information regarding the use of this product in Roundup Ready soybean. See the "PRODUCT USE INSTRUCTIONS" section of this label for maximum application rates (In-crop); Preharvest; Post-Harvest

Maximum Application Rates

IN THE STATES OF ARIZONA, NEW MEXICO AND TEXAS (WEST OF I-35) ONLY, up to 44 fluid ounces of this product per acre may be applied per postemergence application. In addition to broadcast application, post-directed application of this product may be directed at rates up to 32 fluid ounces per acre per application. See the "TANK MIXTURES" section of this label for more information on Maximum Application Rates. See the "FERTILIZERS AND ADDITIVES CONTAINING SURFACTANT TO THIS PRODUCT FOR PREHARVEST APPLICATION TO ROUNDUP READY SOYBEANS" section of this label for more information on Maximum Application Rates.

USE INSTRUCTIONS: This product may be used to control annual and perennial grasses, broadleaf weeds, and volunteer wheat and witchgrass. For control of kochia, apply 16 to 20 fluid ounces of this product per acre in a tank-mix with atrazine and dicamba. Ensure that the atrazine and dicamba product has no soil activity and does not control emergence of perennial weeds from volunteer wheat and witchgrass. For enhanced results on hard-to-control perennials, such as bermudagrass, dock, field bindweed, and spotted knapweed, tank mix this product with a product labeled for use on these weeds.

An enhanced control of certain order-to-order control can be achieved by tank-mixing this product with dicamba at the rates listed in the "ANNUAL WEEDS RATE SECTION." Performace of this product can be enhanced if applied in a tank-mix with 2,4-D at the tank-mix rates listed in the "ANNUAL WEEDS RATE SECTION" in the cotyledon to 2-leaf stage. Apply this product in a tank-mix with 2,4-D at the rates listed in the "ANNUAL WEEDS RATE SECTION," and this product has no soil activity and does not control emergence of perennial weeds from volunteer wheat and witchgrass. For enhanced results on hard-to-control perennials, such as bermudagrass, dock, field bindweed, and spotted knapweed, tank mix this product with a product labeled for use on these weeds.

An enhanced control of certain hard-to-control perennials can be achieved by tank-mixing this product with dicamba at the rates listed in the "ANNUAL WEEDS RATE SECTION." Performance of this product can be enhanced if applied in a tank-mix with 2,4-D at the rates listed in the "ANNUAL WEEDS RATE SECTION," in the cotyledon to 2-leaf stage. Apply this product in a tank-mix with 2,4-D at the rates listed in the "ANNUAL WEEDS RATE SECTION," and this product has no soil activity and does not control emergence of perennial weeds from volunteer wheat and witchgrass. For enhanced results on hard-to-control perennials, such as bermudagrass, dock, field bindweed, and spotted knapweed, tank mix this product with a product labeled for use on these weeds.

Apply this product in a tank-mix with 2,4-D at the rates listed in the "ANNUAL WEEDS RATE SECTION," and this product has no soil activity and does not control emergence of perennial weeds from volunteer wheat and witchgrass. For enhanced results on hard-to-control perennials, such as bermudagrass, dock, field bindweed, and spotted knapweed, tank mix this product with a product labeled for use on these weeds.
Application of this product in the fall must be made before a killing frost. When most plants have reached the boot to early-seedhead stage of development, more than one application might be needed to achieve control. Application in late-September or early-October to plants that are at least 18 inches long. Irrigate at least once to promote active bindweed growth.

This product is not registered in the State of California for control of water bermudagrass. Bermudagrass is 12 to 18 inches in length. For fall application, till fallow fields and apply 22 fluid ounces of this product per acre. Actual rate is 44 fluid ounces in 10 to 40 gallons of water per acre when most target plants have reached the late-bud to flower stage of growth. Apply at or beyond the bloom stage of growth.

Thorough coverage will provide enhanced control. Apply this product when pampas grass is at or beyond the boot stage of growth.

Application in spring to early-summer when brush species are at high moisture content will provide enhanced control. Application has a minimum of 4 weeks for re-growth of existing plants.

For partial control, apply to plants that are at or beyond the bloom stage of growth. For enhanced results, apply in late-summer or fall.

Sequential applications of 22 to 44 fluid ounces of this product in 3 to 10 gallons of water per acre will need repeated applications of this product after germination for long-term control. Sprayer rate amount is 15% when applying in 10 to 40 gallons of water per acre or 44 fluid ounces in 10 to 40 gallons of water per acre. On non-crop sites or fields with deep tillage, apply 44 fluid ounces of this product when applying in 10 to 40 gallons of water per acre.

Irrigation will need repeated applications of this product after germination for long-term control. Sprayer rate amount is 15% when applying in 10 to 40 gallons of water per acre or 44 fluid ounces in 10 to 40 gallons of water per acre. On non-crop sites or fields with deep tillage, apply 44 fluid ounces of this product when applying in 10 to 40 gallons of water per acre.
### TABLE 7.8 LIMIT OF WARRANTY AND LIABILITY

Monsanto Company ("Company") warrants that this product conforms to the chemical description on the label. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, NO OTHER EXPRESS WARRANTY OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE IS MADE. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE DISCLAIMED. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, MONSANTO COMPANY AND ANY OTHER SELLER WILL NOT BE LIABLE FOR ANY LOSS, INJURY OR DAMAGE CAUSED BY HANDLING OR USE OF THIS PRODUCT. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE LIMIT OF THE LIABILITY OF THIS COMPANY OR ANY OTHER SELLER FOR ANY AND ALL LOSSES, INJURIES OR DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT (INCLUDING CLAIMS BASED IN CONTRACT, NEGLIGENCE, STRICT LIABILITY, OTHER TORT OR OTHERWISE) SHALL BE THE PURCHASE PRICE PAID TO THIS COMPANY OR ANY OTHER SELLER FOR THE QUANTITY OF PRODUCT INVOLVED, OR, AT THE ELECTION OF THIS COMPANY OR ANY OTHER SELLER, THE REPLACEMENT OF SUCH QUANTITY, OR, AT THE ELECTION OF THIS COMPANY OR ANY OTHER SELLER, THE REPLACEMENT OF SUCH QUANTITY TO THE EXTENT CONSISTENT WITH APPLICABLE LAW. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO EVENT WILL THIS COMPANY OR ANY OTHER SELLER BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES.
