GENERAL INFORMATION

RENEGADE® is a unique blend of nonionic surfactant, modified seed oil, ammonia and buffering agents that enhances retention and penetration of herbicides on weed surfaces. RENEGADE raises the pH of the spray solution which aids in prolonging the activity of some herbicides in the spray tank. RENEGADE will maximize the performance of products such as Accent®, Betamix®, Betanex®, Progress®, Pursuit®, Stinger® and UpBeet®. Do not use with Assert® herbicide.

DIRECTIONS FOR USE

Start with a clean sprayer. RENEGADE should be added to the herbicide tank mix according to the mixing order recommended on the herbicide product label. Note: Adding RENEGADE to the spray tank first or immediately after introducing UpBeet to the spray tank may be most favorable for precipitate reduction. Agitate while mixing and during spraying; do not allow spray mixture to set in tank. Flush sprayer between loads.

Do not freeze. Shake well before using.

RENEGADE may be used with Micro Rate Programs and with products that recommend use of an adjuvant.

ALWAYS READ AND FOLLOW ALL DIRECTIONS ON THIS LABEL AND THE LABELS OF THE PESTICIDES BEING USED.

USE RATES

Use RENEGADE at the rate of 1 to 2.5 gallons per 100 gallons of spray mixture (1 to 2.5% v/v). Some pesticide labels may recommend a higher or lower surfactant use rate for optimum efficiency. Follow the pesticide label directions when this occurs. For local recommendations, consult your Wilbur-Ellis Company representative or dealer.

For herbicides that permit use of a surfactant at a higher rate, follow instructions on the herbicide label. HOWEVER, DO NOT ADD THIS PRODUCT AT A RATE WHICH EXCEEDS 5% OF THE FINISHED SPRAY VOLUME. EXCEPT WHEN USED AS A DILUENT IN DORMANT, BASAL, SITE PREPARATION OR OTHER SIMILAR APPLICATIONS, PER LABEL INSTRUCTIONS.

RESTRICTIONS

• Not for Aquatic Use.
• Do not use with Assert herbicide.
