FIRST AID

If swallowed:
• Immediately call a poison control center or doctor.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give any liquid to the person.
• Do not give anything by mouth to an unconscious person.

If in Eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eyes.
• Call a poison control center for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For information regarding medical emergencies or pesticide incidents, call 1-800-929-9675.

HI-YIELD® D.I.Y. INDOOR PEST CONTROL with Nylar® contains a unique combination of ingredients to provide quick knockdown and kill of the listed pests as well as an insect growth regulator which prevents immature cockroaches and fleas that are sprayed or that contact the spray residue from becoming adults. By preventing the development of adult cockroaches and fleas, the lifecycle is broken and reproduction will not occur. In the case of fleas, biting adult fleas will not result from treated immature fleas and the reproductive life cycle is broken. Treatment will last for 7 months for fleas and 4 months for cockroaches.

SHAKE WELL BEFORE USE. Avoid contamination of food and feedstuffs. Read entire label and follow all label directions. Use this product as a spot or crack and crevice treatment to localized areas where pests are seen or suspected. Spray surfaces until visibly wet. Spray pests directly, whenever possible. Keep children and domestic animals out of treated areas until the spray is dry.

ANTS, COCKROACHES, CRICKETS, CRISEPTES, FIREBATS, PILLBUGS, SILVERFISH, SPIDERS, AND SONOBUS: Spray pests when they are seen and spray areas suspected of harboring these pests. Spray all trails and spray cracks and crevices and points of entry into the house. Pay special attention to areas behind and beneath sinks, stoves, refrigerators, garbage containers, inside cabinets, along baseboards, in cracks and crevices in walls and doors, and window sills and frames, around drains, gas, plumbing, bookcases, storage and utility areas, and utility installation areas. Treatment for roaches should not be needed for 10 days. For other pests, repeat as needed.

CARPET BEETLES: Thoroughly vacuum rugs and carpets before treatment. Remove the vacuum bag and dispose of it in outside trash. This helps prevent reinfestation from eggs and larva vacuums. Spray Backing of carpet and rugs, focusing on low traffic areas and areas under furniture. When dry, replace on floor and spray surface of carpet and rugs, focusing on low traffic areas and areas under furniture and corners of rooms. Also spray baseboards.

FLEAS AND TICKS: Thoroughly vacuum all covered furniture and board furniture, under furniture, low-traffic areas, and areas where pets normally rest. Pet bedding should be removed and laundered. Replace pet bedding after treatment dries. Put vacuum bag in separate bag and dispose of in outside trash. Apply as a spot treatment to cracks and crevices. Along baseboards, pet resting areas, and localized areas of floors and furniture coverings where the pests are suspected. Do not treat pets with this product.

If fleas and tick infested animals are transported in vehicles, use as a spot treatment to carpets and upholstered areas, paying attention to cracks and crevices. To further protect your pet and your home from continuing reinfestation by fleas, you should use an EPA registered product to treat the animal, such as a spot on product, a dust product or spray product, before or after the animal is allowed back into the house. You should also treat the area in the yard where the pet typically spends time with an EPA registered product for yard flea control. The pet, home, and yard should be treated at the same time.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by either storage or disposal. Pesticide Storage: Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

Pesticide Disposal and Container Handling: Do not puncture or incinerate nonrefillable container. Do not reuse or refill this container. If empty, Place in trash or offer for recycling if available. If partly filled. Call your local solid waste disposal agency for disposal instructions.
