DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. The product is to be used as a surgical prep solution only after proper palpation of any surface or instrument that is to be sterilized directly into the human body, either intubated or non-intubated. It is not to be used on mucous membranes but should be applied to the oral cavity. It is also to be used on any wound area of the body. It is not to be used on mucous membranes but should be applied to the oral cavity. The product may be used to provide absorbent material to absorb or contain any chemical or liquid that may come into contact with the body.

DISINFECTION
For disinfection of inanimate, punctured, hot, non-porous surfaces such as mops, sponges, doorknobs, drawer pulls, cabinets, bathtubs, washers, dryers, refrigerator elements, plastic surfaces, glass, metal, painted metal, and other hard surfaces in homes, operating rooms, medical clinics, nursing homes, hospitals, and other clean rooms, furniture, and similar surfaces.

TO DISINFECT:
Depicted by microscopic surfaces to be disinfected. This product may be used in the same manner as alcohol. Apply a spray, with a spray gun or mechanical sprayer or by the immersion of the object to be disinfected into a 1:10 dilution of the product. The product may also be used in a fogger. Apply to the desired surface until all visible bacteria has been removed. Store unused portions of the solution in a clean, dry, dark container. Apply to the desired surface until all visible bacteria has been removed. Store unused portions of the solution in a clean, dry, dark container.

TUBERCULOCIDAL ACTIVITY: This product kills all microorganisms effectively against Mycobacterium avium (RDR) in 3 minutes at 20°C when used in a dilution of 1:100.

KILLS HAV AND HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES
OBJECTS PREVIOUSLY SOILED WITH BLOOD/BIODUFLUIDS
In hospitals, nursing homes, and other settings in which there is no evidence of any infectious agents, the following objects (such as bed sheets, blankets, bed covers, and other furnishings) should be used against blood or body fluids that can be associated with the presence of transmissible infectious material, because 1 part in 100,000 (1 in 100,000) may be contaminated with HIV or hepatitis virus (HAV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV (AND HIV) AND HBV ON SURFACES OR ITEMS INTO WHICH BLOOD OR BODY FLUIDS HAVE BEEN SOILED
