**Recommendations and Directions**

Refer to the label booklet under Protection Standard, 40 CFR Part 170.

Use this product only in accordance with Agricultural Use Requirements and neoprene rubber. If you want more options, follow the instructions for:

- **Agricultural Use Requirements**
- **Non-Agricultural Use Requirements**
- **Spray Drift Management**
- **Terms and Conditions of Use**

**Harmful If Absorbed Through Skin**

- If on skin:
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue to rinse eye.
  - Remove contaminated clothing and shoes.
  - Call a doctor, or going for treatment. You may also contact 1-800-992-5994 day or night.

**PPE Requirements**

- Chemical-resistant gloves made of any waterproof material
- Eye protection: Chemical splash goggles
- If splashes enter the eyes:
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue to rinse eye.

**Storage and Disposal**

- Keep away from fire and sparks. Do not allow this product to come in contact with water or other water-based materials.
- Do not reuse or refill this container.

**Compatibility**

- The physical spray compatibility of specific tank mixes can be checked based on the ingredients present in the product.
- To properly mix Fore® 80WP Rainshield® and other tank-mix products, ensure the product (concentrate) is well agitated and the required amount of Fore® 80WP Rainshield® is added. Slowly pour the appropriate amount of Fore® 80WP Rainshield® into the tank. When using an agitated spray tank, fill the tank 1/2 to 3/4 full with clean water.

**Spray Preparation**

- For outdoor or greenhouse use, apply the equivalent of 1 1/2 lb of Fore® 80WP Rainshield® per acre. When treating ornamentals, determine the required fungicide use rate and the application methods described in this Product Information Sheet.

**Compatibility with Adjuvants**

- Compatibility is not a guarantee of effectiveness. Evaluate compatibility by spraying a small and inconspicuous area of the crop. The addition of an adjuvant may improve initial spray deposits, fungicide redistribution and weatherability.

**Recommended Adjuvants**

- Slowly pour the required amount of Fore® 80WP Rainshield® into a tank and run the tank. For slower run times, pouring the required amount of Fore® 80WP Rainshield® into a small container and running the small container may be more effective.

**Compatibility with Other Pesticides**

- The WPS applies when this product is used for disease control. The WPS does not apply when this product is used for preventative or suppressive treatments for pest control.

**Adjuvant Recommendations**

- Slowly pour the appropriate amount of Fore® 80WP Rainshield® into a small container and run the small container. Do not apply with a nozzle height greater than 4 feet above the crop canopy.

**Crop Protection**

- The chart below lists the crops and diseases for which Fore® 80WP Rainshield® is recommended. For more information, see the Product Information Sheet for Fore® 80WP Rainshield® and the Dow AgroSciences website.

**Documentation**

- Dow/AgroSciences MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE OF THIS PRODUCT. TO THE EXTENT PERMITTED BY LAW, ALL SUCH RISKS SHALL BE ASSUMED BY THE USER. THE INFORMATION PROVIDED HEREIN IS FOR GENERAL INFORMATION PURPOSES ONLY AND IS NOT TO BE CONSTRUED AS A WARRANTED GUARANTEE. DOW/AGROSCIENCES MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER WARRANTY WHICH MAY ARISE FROM COURSE OF DEALING, COURSE OF PERFORMANCE OR USAGE OF TRADE.

**EPA Accepted 06/05/13**

- No employee or sales agent of Dow AgroSciences or the seller has any authority to make any changes to this label. If any changes are made, the seller or Dow AgroSciences may give prior or subsequent notice of such changes. To the extent permitted by law, all such risks shall be assumed by the user.

Agricultural Use Requirements

It contains requirements for training, decontamination, notification, notifiable events, and restricted-access area. In this box, the requirements apply to uses of this product that are covered by the Worker Protection Standard (WPS).

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are not covered by the WPS. In this box, the requirements apply to uses of this product that are not covered by the WPS. In general, these requirements include:

- User Safety Recommendations:
  - Wash hands before eating, smoking, or using the toilet.
  - Change into clean clothing.
  - Wash clothing containing the product properly.
  - Use personal protective equipment (PPE) appropriate for the product use and conditions.
  - Use appropriate PPE for the job.
  - Wash PPE before reuse.
  - Use appropriate PPE for the job.
  - Use appropriate PPE for the job.

- Application and Storage Requirements:
  - Do not apply this product to areas where food, water, or feed is produced for human consumption.
  - Do not contaminate water, food, or feed by storage and disposal.
  - Do not contaminate food or feed by storage and disposal.
  - Do not contaminate soil or vegetation by storage and disposal.

- Application Directions:
  - Do not apply this product at wind speeds greater than 15 mph.
  - Do not apply this product over the area of a pond or lake.
  - Do not apply this product over the area of a pond or lake.

- Storage Requirements:
  - Do not store this product near food, water, or feed.
  - Do not store this product near food, water, or feed.
  - Do not store this product near food, water, or feed.

- Disposal Requirements:
  - Do not dispose of this product in the environment.
  - Do not dispose of this product in the environment.
  - Do not dispose of this product in the environment.

- Transportation Requirements:
  - Do not transport this product in the environment.
  - Do not transport this product in the environment.

User Safety ................................................................................................... 1

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard, 40 CFR Part 170.

In addition, all handlers (except pilots, groundboom applicators, and ground applications) shall wear the following PPE:

• Gloves
• Goggles or face shield
• Coveralls

Other safety practices:

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses (if present) immediately after exposure. Call 911 or local emergency services if needed.

First Aid

First Aid

Remove contaminated clothing when possible. Use only water to flush eyes. Do not rub eyes. If not able to remove contaminated clothing, loosen clothing and remove if necessary. Keep person calm. Move person to fresh air if needed. Keep person warm. Call 911 or local emergency services immediately.

• If breathed: Move the exposed person to fresh air. If the exposed person is not breathing, perform artificial respiration. Call 911 or local emergency services immediately.

• If in eyes: Flush eyes with plenty of cool, running water for 15 minutes while lifting upper and lower eyelids. If irritation persists, call 911 or local emergency services.

• If on skin: Remove contaminated clothing when possible. Wash affected area with soap and plenty of water for 15 minutes while lifting upper and lower eyelids. Call 911 or local emergency services if needed.

Waste Disposal

Waste Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Consult local authorities for disposal information.

CAUTION: Do not dispose of in landfills or burn.
