DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or nontarget animals to rodenticides. To help prevent accidents:
1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in tamper-resistant bait boxes or cabinets.
3. Keep treated areas clean and free from attractants.
4. Follow label directions and precautions for all uses.

USE RESTRICTIONS: For control of Norway rats, roof rats, mice, and house mice in and around homes, industrial, commercial, agricultural, and public buildings, and similar manmade structures. May also be used in transport vehicles (ships, trains, aircraft) and in ships' holds. This product may also be used in animal feedlots, farms, and feedyards. Do not use in water bodies, as this product may be injurious to aquatic animals. Do not apply this product to areas where there is a possibility of contaminating food or surfaces that are likely to be ingested by humans, pets, or other animals. Do not apply this product in or near drinking water sources.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are around structures, in cracks and crevices, in corners and elevated places, and along walls and roofs. Do not apply this product to areas where there is a possibility of contaminating food or surfaces that are likely to be ingested by humans, pets, or other animals. Do not apply this product in or near drinking water sources.

APPLICATION DIRECTIONS:
RATS: Apply 2 to 8 pacs (usually at intervals of 15 to 30 feet) per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days. If the bait is not consumed, replace it with fresh bait. MICE: Apply 1 to 2 pacs per placement. Space placements at 8 to 10 feet intervals. Larger placements, up to 30 feet, may be necessary at points of extremely high infestation. Maintain an uninterrupted supply of fresh bait for at least 10 days.

KILLS WARFARIN RESISTANT NORWAY RATS AND HOUSE MICE

KILLS RATS & MICE

Norway rats and house mice may consume a lethal dose in one (1) feeding. The lethal dose for Norway rats is approximately 0.045 teaspoon per pound of body weight. Keep out of reach of children and pets. Keep out of reach of children and pets.
