**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THE LABEL.** Read this entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.

**IMPORTANT:** Do not expose children, pets, or nontarget animals to rodenticides. To help prevent exposure:

1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hooded livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

**Bait Stations:** Mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used wherever children, pets, non-target mammals, or birds may have access to the bait placement location.

**USE RESTRICTIONS:** This product may only be used to control the following rodent pests in and around agricultural buildings and man-made agricultural structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys humulis), Golden mouse (Ochrotomys nuttalli), Polygenis rat (Rattus exulans), Meadow vole (Microtus pennsylvanicus), White-throated woodrat (Neotoma albigula), Southern plains woodrat (Neotoma micropus), and Mexican woodrat (Neotoma mexicana). This product must be used in and within 100 feet of agricultural buildings and man-made agricultural structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Fence and perimeter baiting, beyond 100 feet from an agricultural structure as defined above, and within 100 feet of agricultural buildings and man-made agricultural structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations, is prohibited. This product must not be applied directly to food or feed crops. Burrow baiting with Jaguar Rodenticide Place Pacs is prohibited.

**NOTE TO PHYSICIAN:** If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K1 intramuscularly or orally. Vitamin K1 is antidotal at doses of 10–20 mg (mL/kg). Repeat as necessary based on monitoring of prothrombin times.

**APPLICATION DIRECTIONS:**

**RATS:** Apply 2 to 8 pac to each point of extremely high mouse or meadow vole activity. space placements at 8 to 12 feet intervals. Larger placements, up to one unopened pac, may be needed at points of extremely high mouse or meadow vole activity. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of fresh rat activity.

**HOUSE MICE AND MEADOW VOLES:** Open pac and apply 1/4 to 1/2 oz. of bait per placement in infested areas. Space placements at 8 to 12 feet intervals. Larger placements, up to one unopened pac, may be needed at points of extremely high mouse or meadow vole activity.

**FOLLOW-UP:** Replace contaminated or spoiled bait immediately. Wear gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfection, limit sources of rodent food, water, and harborage as much as possible. If reinfection does occur, repeat treatment. Where a continuing source of infestation is present, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: Harmful if swallowed. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes or on clothing. All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**SAFETY PRECAUTIONS:**

**User Safety Requirements:** Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washable PPE, wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**ENVIRONMENTAL HAZARDS:** This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinse.

**STORAGE AND DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

**Pesticide Disposal:** Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility. Container Handling: Nonreturnable container. Do not reuse or refill this container. [Plastic] Offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill or by incineration. In most states, burning is not allowed. [Paper] Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. In most states, burning is not allowed.

**DISPOSAL:** Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polygenis rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

**NOTE TO PHYSICIAN**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K<sub>1</sub> intramuscularly or orally. Vitamin K<sub>1</sub> is antidotal at doses of 10–20 mg (not mg/kg). Repeat as necessary based on monitoring of prothrombin times.

**TREATMENT FOR PET POISONING**

If animal eats bait, call veterinarian at once.

**NOTE TO VETERINARIAN**

Anticoagulant Brodifacoum: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K<sub>1</sub> at doses of 2–5 mg/kg. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.
