DANTOSERVE® SG
MICROBICIDE
INDUSTRIAL, PRESERVATIVE

KEEP OUT OF REACH OF CHILDREN
CAUTION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DANTOSERVE® SG preserves and aids in the control of bacteria and fungal in household products such as detergent products including liquid laundry detergents and liquid dishwashing detergents, fabric softeners, liquid soaps, and some cleansers for air fresheners, and paper-based surfacants. Safe storage, proper use, and proper application help to achieve the best results. DANTOSERVE® SG must be added to the formulation to be preserved at a rate of 0.01% to 1.00% (100 to 10,000 ppm) based on the total weight of the solution.

To ensure uniform distribution, slowly disperse DANTOSERVE® SG into product agitation. Mix thoroughly until a single phase unit is formed throughout the product.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
Preservatives Storage: Store under cool, dry conditions. Do not use original container for disposal. Store under appropriate conditions to maintain stability.

For additional information on waste handling, contact the Environmental Protection Agency (EPA). For further guidance, contact the U.S. Food and Drug Administration (FDA).

Personal Protective Equipment (PPE)

Wear personal protective equipment when using DANTOSERVE® SG as a preservative. In case of contact with skin or eyes, wash immediately with plenty of water. If contact with skin or eyes continues, consult a physician immediately.

Nutrition and Dietetics

No information is available on the effects of this product on nutrition and dietetics.

Toxicology Information

No information is available on the toxicology of this product.

Application Information

No information is available on the application of this product.

Use Restrictions

No information is available on the use restrictions of this product.

Environmental Hazards

This product is toxic to the environment and aquatic life and should not be discharged into waterways, surface waters, or treated groundwater. Do not open the container or add water to the mixture until the point of use. Do not dilute with other aqueous solutions. Do not mix with any other cleaning agents or preservatives. Use only as directed. If ingested, seek medical attention immediately. If inhaled, move to fresh air; if not, provide artificial respiration. If swallowed, induce vomiting by giving 1-2 tablespoons of water, syrup, or other fluid slowly. If not vomited, seek medical attention immediately.

For additional information or assistance, contact the manufacturer or the U.S. Food and Drug Administration (FDA) or the Environmental Protection Agency (EPA).
