Control of Rusts (*Puccinia* spp.) and Powdery Mildew (*Erysiphe graminis*) in Perennial Ryegrass, Fescues and Kentucky Bluegrass Grown for Seed

**ATTENTION**
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Laredo® EC fungicide before applying. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.
- Use of Laredo EC according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Laredo EC.

**Directions for Use**

Laredo EC is a systemic curative and protectant fungicide. For best results, apply on a regularly scheduled protectant spray schedule starting at the first sign of disease development and continuing until the threat of further disease development is past. Apply 8 to 12 fl oz (0.125 to 0.187 lb active) of Laredo EC in a minimum of 20 gallons of water per acre for ground application or in a minimum of 10 gallons of water per acre for aerial application. Begin applications in early spring or when disease symptoms are first noticeable and continue applications on a 14- to 21-day application schedule.

**Restrictions:**
- **Do not** apply Laredo EC within 1 year (365 days) of harvesting grass hay.
- **Do not** graze livestock in treated fields within 1 year (365 days) of applying Laredo EC.
- **Do not** apply more than 48 fl oz product (0.75 lb active) per acre per year.
- **Do not** enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.
- **Chemigation:** For use under this SLN label do not apply this product through any type of irrigation system.

**WSDA Container Disposal Guidance:** Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic...
pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm. Cleaned containers may also be disposed of in a sanitary landfill if permitted by the county. Burning is not a legal method of container disposal in Washington.

**Expiration date:** This label for Laredo EC expires and must not be distributed or used in accordance with this SLN registration after December 31, 2013.
