RESTRICTIONS
• Limited to 2 applications per crop cycle.
• Minimum of 7 days between applications.
• For use only in commercial nurseries.
• Outdoor use only. Use in greenhouses is prohibited.
• Restricted entry interval (REI) = 19 days.
• Retail sale of treated bulbs is prohibited for 19 days after application.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and wildlife. MSR Spray Concentrate should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may contact the WDSA Endangered Species Program web site at http://agr.wa.gov/PestFert/EnvResources/EndantSpecies.htm, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

WSDA Container Disposal Guidance: Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burying is not a legal method of container disposal in Washington.

IMPORTANT: This product is sold subject to the Conditions of Sale set forth on the container label.

This label for MRS Spray Concentrate expires and must not be distributed or used in accordance with this SLN registration after December 31, 2012.
