PRODUCT INFORMATION

Bronc Max E.D.T. water conditioning and deposition agent is specially formulated to be used with many postemergence type herbicides, which perform best when mixed with ammonium sulfate. In addition, Bronc Max E.D.T. increases the VMD (Volume Mean Diameter) of the spray droplets and the deposition on the target plant.

Bronc Max E.D.T. is filtered through a special process to remove impurities and other contaminates generally associated with dry or other liquid ammonium sulfate products. This lack of sedimentation reduces nozzle plugging, wear and corrosion of equipment.

Bronc Max E.D.T. contains humectants that retard crystal formation of active ingredients, allowing for better absorption into leaf surfaces.
