Galigan® 2E HERBICIDE
EPA REG. NO. 66222-28
WEED CONTROL IN
CARROTS GROWN FOR SEED
IN THE STATE OF WASHINGTON
EPA SLN NO. WA-030012

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

DIRECTIONS FOR USE

• It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

• This labeling must be in the possession of the user at the time of application.

• Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

Crop/Site: For use on carrots grown for seed

Weeds Controlled: Common groundsel (Senecio vulgaris), annual sowthistle (Sonchus oleraceus), yellow marsh cress (Rorippa islandica) and ladysthumb (Polygonum persicaria).

Application Rate and Timing: Apply Galigan 2E at rates of 16 to 32 ounces (0.25 to 0.50 lbs ai) per acre. Begin applications in early spring when carrots are 8 to 10 inches tall. For best results, apply when weeds are in the 2 to 4 leaf stage. A maximum of 32 ounces product may be applied per acre per season.

Method of Application: Galigan 2E should be thoroughly mixed with clean water at recommended concentrations and applied in a minimum of 20 gallons of water per acre. Use conventional ground spray equipment with flat fan nozzles (or equivalent) at 20 to 40psi. Galigan 2E may also be applied through sprinkler irrigation (solid set or portable lateral) systems. Refer to the EPA registered label for chemigation directions.

Restrictions/Precautions:

• Do not enter or allow worker entry during the restricted entry interval (REI) of 24 hours.

• Do not apply Galigan 2E by aerial application.

• This product is toxic to aquatic invertebrates and wildlife. Galigan 2E should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/natresources/EndangSpecies.aspx, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

• A 25 ft. vegetative buffer must be maintained between all areas treated with this product and lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries and commercial fish farm ponds.

• The application of Galigan 2E to carrots grown for seed has the potential to injure the crop. Injury to carrots grown for seed appears to be transient and benefits in weed control outweigh any slight amount of crop injury. The potential for crop injury may be reduced by using the lower rate, by not applying soon after or in combination with linuron, and by applying to larger size carrot plants.
• All carrot seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the WSDA immediately upon request. Conditioner disposal records shall consist of documentation of off-farm disposal, disposal at a controlled dumpsite, incinerator, composter or other equivalent disposal site and shall include the lot numbers, amount of material disposed of, the growers(s), and the date of disposal.

• No portion of the carrot seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.

• Carrot seed shall bear a tag or container label which forbids the use of the seed for human consumption or animal feed.

• Carrot seed may not be distributed for human consumption or animal feed.

WSDA Chemigation Guidance:
• Application off-site is prohibited. The chemigation application must be continuously observed whenever sensitive areas as defined in WAC 16-202-1001 through WAC 16-202-1024 (including but not limited to schools, parks, dwellings, occupied buildings or structures, public roadways, and waters of the state) are at risk of being exposed to drift, runoff, or overspray. In order to minimize the potential for application off-site, WSDA recommends that the product only be applied through low pressure irrigation systems (defined as 2 to 35 pounds/square inch measured at the nozzle) with a nozzle release height no higher than 3 feet above the target crop, and that end guns be disabled throughout the application.

• An inspection port or a direct access point is required, and it must be positioned immediately upstream of the irrigation mainline check valve and be of sufficient size to allow visual and manual inspection of the check valve and low pressure drain. The inspection port or access point must have a minimum diameter of four inches, unless an alternative access system is approved by WSDA (WAC 16-202-1012[1]).

• The chemigation application tank cannot be placed within 20 feet of the wellhead or other sensitive areas. Mixing or loading activities cannot occur within 20 feet of the wellhead or other sensitive areas (WAC 16-202-1008[1]).

• WSDA Chemigation Rules (WAC 16-202-1001 through WAC 16-202-1024), and information on USEPA Authorized Alternative Chemigation Safety Equipment, Distribution Uniformity and other chemigation topics are available on the WSDA website (http://agr.wa.gov/PestFert/ChemFert/default.aspx).

WSDA Container Disposal Guidance:
Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx. Cleaned containers may also be disposed of in a sanitary landfill if permitted by the county. Burning is not a legal method of container disposal in Washington.

MAKHTESHIM-AGAN Special Conditions and Disclaimer for use of Galigan 2E on carrots grown for seed

Makhteshim-Agan of North America intends that this Section 24(c) label be distributed only by the Columbia Basin Vegetable Seed Association only to end users and/or growers who agree in writing to the terms and conditions required by the Columbia Basin Vegetable Seed Association including a waiver and release from all liability and indemnification by the user and/or grower of
Makhteshim-Agan of North America, Columbia Basin Vegetable Seed Association and others for failure to perform and crop damage from the use of Galigan 2E on carrots grown for seed. If such terms and conditions are unacceptable, return Galigan 2E at once unopened.

This product when used on carrots grown for seed may lead to crop injury, loss, or damage. Makhteshim-Agan of North America recommends that the user and/or grower test this product in order to determine its suitability for such intended use. The Columbia Basin Vegetable Seed Association and Makhteshim-Agan of North America make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated with the use of this product. The decision to use or not to use the pesticide must be made by each individual Galigan 2E user and/or grower on the basis of possible crop injury from Galigan 2E, the severity of the weed infestation, the cost of alternative weed controls, and other factors. Makhteshim-Agan of North America intends that because of the risk of failure to perform or crop damage that all such use is at the user’s and/or grower’s risk, to the extent consistent with applicable law.

This Special Conditions and Disclaimer statement is required by Makhteshim-Agan of North America and is not required or enforced by the USEPA or the WSDA.

24(c) Registrant:
Makhteshim-Agan of North America
4515 Falls of Neuse Road, Suite 300
Raleigh, NC 27609

This label for Galigan 2E expires and must not be distributed or used in accordance with this SLN registration after December 31, 2014.
