DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ENTIRE LABEL BEFORE USING THIS PRODUCT. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

This product is for use on residential turf. IMPORTANT: For use on Bluegrass, Fescues, Rye, Bent, Bermuda, Bahia and Zoysia Lawns. Avoid application to St. Augustine or centipede lawns unless injury can be tolerated. Do not spray Carpet grass, Dichondra or desirable clovers. May cause temporary yellowing of some Bermudagrass turf. Do not exceed specified dosages for any area. Be particularly careful applying within the drip line of trees and other ornamental species. Avoid contact with exposed feeder roots of ornamentals and trees.

Do not apply more than 1.5 lb/acre per year. Do not apply more than 2 broadcast applications per year with a minimum retreatment interval of 21 days.

GENERAL APPLICATION RESTRICTIONS

Do not apply this product in a way that will contact any person, or pet, either directly or through drift. Keep people and pets out of the area during application.

Entry Restrictions: Do not allow people or pets to enter the treated area until sprays have dried.
LAWN WEED CONTROL
When used as directed kills broadleaf weeds in lawns - roots and all. Kills weeds - not lawn grasses.

ORNAMENTAL LAWNS AND TURF
Apply this product at the rate of 2 pints in 4 to 50 gallons of water per 10,000 square feet (3.2 fluid ounces in 2.5 gallons of water per 1,000 square feet) to control weeds growing in turf planted to Bluegrass, Fescue, Rye, Bent (excluding golf course greens and tees), Bahia, Bermuda and Zoysia.

FOR BEST RESULTS
Before You Apply:
Do not mow for 1 to 2 days before or after application.
If soil is dry, water before application.
To treat entire lawn (broadcast application): Use a tank sprayer or hose-end sprayer. Measure lawn. Calculate square feet by multiplying length times width. Spray evenly over measured area.
HOW TO APPLY
To spot treat individual lawn weeds: Use a tank sprayer and spray to wet weeds. To reduce spray drift, adjust sprayer nozzle to deliver a coarse spray.

WHEN TO APPLY
- Spray when weeds are actively growing.
- Spray when temperature is below 90°F.
- Spray when air is calm to avoid drift to vegetables, flowers, ornamental plants, trees, shrubs and other desirable plants.
- Do not apply to newly seeded grasses until well-established (they have been mowed 3 times).
- Rain or watering 1 hour after application will not wash away effectiveness.
- Reseed no sooner than 3 weeks after the application.
