It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Precautionary Statements

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed. Irritating to nose and throat. Do not get in eyes, on skin, or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Wear protective clothing and rubber gloves when handling this product. Avoid breathing dust and fumes. Wash thoroughly with soap and water after handling. Do not contaminate clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the National Contingency Plan and in strict accordance with the effluent limitations prescribed in the NPDES permit. Apply this product only as specified on this label.

CHEMICAL AND PHYSICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Use clean dry utensils. Do not add this product to any dispersing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Combustible mixtures may form with moisture or containing material such as metal or plastic. Do not use on or near chemical reactions and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not re-use container. If possible, isolate container in open or well ventilated area. Flood area with large volumes of water.

For use as a Disinfectant, Sanitizer, Bactericide, Fungicide, Algidicide, and for Control of Microbial Slimes in Industrial Processes and Water Systems such as: Recirculating Cooling Water Systems, Once-Through Cooling Water Systems, Wastewater Treatment Systems, Brine Pasterizer, Air Conditioners, Humidifiers, Evaporative Coolers, Paper and Pulpboard Process Water, and Water Features.

ACTIVE INGREDIENT(S):
1-Bromo-3-chloro-5, 5-dimethylpyridyldinitroso 96.0% OTHER INGREDIENTS 4.0%
TOTAL: 100.0%

KEEP OUT OF REACH OF CHILDREN

FIRST AID

If ingested:
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Get medical attention immediately.

If on skin:
Remove clothing immediately before washing. Wash thoroughly with soap and water. Get medical attention immediately.

If in eyes:
Rinse eyes immediately with plenty of water for 15-20 minutes. Get medical attention immediately.

If inhaled:
Call a poison control center or doctor for further advice.

If swallowed:
Give plenty of water if needed. Get medical attention immediately.

If not induced vomiting unless told to do so by the poison control center or doctor.

If given by mouth to an unconscious person:
Do not give anything by mouth to an unconscious person.

If breathed:
Move person to fresh air.

If not breathing, call 911 or an ambulance, then give artificial respiration, preferably the mouth-to-mouth method if possible.

If a person continues to breathe, call a poison control center or doctor for further advice.

HOT LINE NUMBER
Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. You may also contact 1-800-278-0330 or 1-800-BUCKMAN for emergency medical treatment.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Keep product dry and in a cool well-ventilated area away from heat or open flame. Store in original container.

PESTICIDE DISPOSAL: Pesticide wastes are acute hazards. Improper disposal of excess pesticide, spray mixtures, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: COMPLETE SACK: Completely empty bag into application equipment. Contact manufacturer about return of Super Sack. WASHED SACK: Dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, in a sanitary landfill or on a composting site. Do not reuse, re-disperse, or re-apply this product and cannot be reused, disposed of in the same manner.

PAIL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

FIBER DRUM: Completely empty by finshing and topping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of drum in a sanitary landfill or by incineration if allowed by State and local authorities. Do not reuse, re-disperse, or re-apply this product and cannot be reused, disposed of in the same manner.

EMERGENCY HANDLING: In case of contamination or decomposition do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfilled area.

Directions for Use

WHEN USED AS A DISINFECTING COOLING WATER SYSTEMS: When used as directed, this product effectively controls algal, bacterial, and fungal slime in commercial and industrial cooling towers, evaporative condensers, influent water systems, such as flow-through filters, cooling ponds, canals, and lagoons; heat exchange water systems; industrial water scrubbing systems; brewery pasteurizer, and industrial or commercial air conditioning systems. Stops growth of algae and bacteria in systems containing ponds, canals, and lagoons. Treatment cooling water with this product in the system intake or other critical areas, where mixing is uniform.

PREVENTATIVE COOLER: When used as directed, this product effectively controls bacterial, and fungal slime in evaporative condensers.

PASTEURIZER, CAN WARMER, CANNERY, RETORT WATER SYSTEMS: When used as directed, this product controls algal, bacterial, and fungal slime in evaporative condensers, pasteurizer, retort water, and retort water.

DOSAGE RATES.
Initial Dose: When the system is无可置疑ly fouled, add 0.2 to 0.6 pounds/1000 gallons (0.24 to 0.72 kilograms/10,000 liters) of water to the system. Repeat initial dosing until 1 to 3 parts per million (milligrams per liter) bromine residual is established for at least 4 hours.

Preventative Dose: When microbial control is evident, add 0.1 to 0.3 parts per million (0.12 to 0.36 kilograms/10,000 liters) of water to the system. Repeat as needed to maintain 1 to 3 parts per million (milligrams per liter) bromine residual for at least 4 hours.

COMMERCIAL AIR CONDITIONER AND DEHYDRIFIER BASINS OR DRAIN PAPERS: When used as directed, this product effectively controls microorganisms in areas where water collects.

DOSAGE RATES.
Place this product in the basin or drain papers close to the outlet drain. Use one or more tablets as necessary to maintain the cleanliness of the drain papers in 4000 square feet (369 square meters) of air conditioning space.

WASTEWATER TREATMENT SYSTEMS: When used as directed, this product effectively controls algae, bacterial, and fungal slime in wastewater treatment systems. Use in the disinfection of primary, secondary, and tertiary wastewater treatment systems.

DOSAGE RATES.
Add 0.1 to 0.6 pounds/1000 gallons (0.12 to 0.72 kilograms/10,000 liters) of water to treat to maintain a 0.5 to 5 parts per million (milligrams per liter) bromine residual at the injection point in the disinfection contact chamber. Adjust this product’s dosing to achieve the desired dose to achieve the desired hydrogen concentration at the exit of the contact chamber. Do not use treated wastewater to irrigate crops or for underground irrigation systems. Follow all government regulations for the proper disposal of treated effluent. Do not use treated wastewater to irrigate crops or for underground irrigation systems. Follow all government regulations for the proper disposal of treated effluent.

Specific Labeling

**Specimen Label**

Manufactured by: Buckman Laboratories, Inc. 1200 North Highway 7,Memphis, Tennessee 38120 (901) 278-0330 or 1-800-BUCKMAN EPA Est. No. 5185-M1-5 EPA Reg. No. 1448-40 Product Weight 50 lbs/pail Not contents are marked on the container.
