PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes or on skin or clothing. Avoid exposure (inhalation, ingestion or absorption through the skin). Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash separately before reuse.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without prior notification to the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Apply this pesticide only as specified on the label.

PHYSICAL AND CHEMICAL HAZARDS
CHEMTREAT CL-49 is not flammable. This product is strongly basic and an oxidizing agent. Avoid contact with organic materials such as alcohol and aldehydes, strong reducing agents, strong oxidizers, acids, and ammonia containing products. Avoid contact with common metals such as steel, aluminum, iron and copper. Use of incompatible materials can promote the exothermic decomposition of the product. In extreme cases, this could result in vigorous gas formation and over-pressurization of storage containers.

DIRECTIONS FOR USE
When used as directed, CHEMTREAT CL-49 effectively controls bacteria, fungi, algae and slime in commercial and industrial water systems. CHEMTREAT CL-49 can also be used to control biofilm deposits from pumps, pipework, heat exchangers, and filters associated with industrial water treatment systems. CHEMTREAT CL-49 may be added at system inlet water or other locations in the system at a point of maximum usage where the treated water will be circulated or mixed throughout the system. Badly fouled systems should be cleaned before treatment begins. The product may be applied to the system either continuously or intermittently (slug doses) or as needed to obtain the recommended total biocidal level.

ACTIVE INGREDIENTS
Sodium bromofluorinate and sodium chlorosulfinate...

KEEP OUT OF REACH OF CHILDREN
DANGER/Peligro
FIRST AID
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. If swallowed, do not induce vomiting. Give at least 12 oz of water for every 10 lb of body weight. If skin or clothing: Wash off clothing and skin with soap and water. If eye contact: Wash out for 15 minutes. If inhaled: Remove to fresh air. If skin irritation: Wash with soap and water. For first aid treatment: Use an antibiotic ointment or cream. For systemic toxicity: Give activated charcoal.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not re-use or refill this container. Triple rinse as follows: Empty remaining contents into application equipment or a mix tank or store vials for later use or disposal. Drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour vials into application equipment or mix tank or store vials for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
