CHEMTREAT CL-49
FOR USE AS A FONGICIDE, ALGICIDE, SMEDECIDE AND MICROBIOCIDE IN REcirculating COOLING AND PROCESS WATER SYSTEMS, HEAT TRANSFER SYSTEMS, AIR WASHERS, AND INDUSTRIAL SPRAYING SYSTEMS; CONTAINZERIZED PONDS AND DECORATIVE FOUNTAINS, INDUSTRIAL ONC-THROUGH COOLING WATER SYSTEMS, PULP AND PAPER MILLS, WASTEWATER SYSTEMS.

CONTROLS BIOFILM DEPOSITS FROM TANKS, FILTERS, HEAT EXCHANGERS, AND HEAT EXCHANGERS ASSOCIATED WITH INDUSTRIAL WATER TREATMENT SYSTEMS.

ACTIVE INGREDIENT:
Sodium Bromosulfinate
and sodium chlorozincolate

INERT INGREDIENTS: 22.0%

TOTAL: 100.0%

Total Halogen (calculated as bromine = approximately 15%) (calculated as chlorine = approximately 7%)

KEEP OUT OF REACH OF CHILDREN
DANGER/PELIGRO

FIRST AID
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or docto immediately for treatment advice. Have person stay a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: Probable mucosal damage may be caused by gastric lavage. See side panel for additional precautionary statements.

PULP AND PAPER MILLS
When used as directed, CHEMTREAT CL-49 effectively controls fungi, bacterial, and fungal slime in pulp and paper mill flush and recirculating cooling and process water systems, wastewater treatment systems, hydraulic and structural systems, and influent systems such as slurry transfer, pumps, and filters.

AIR WASHERS AND INDUSTRIAL SPRAYING SYSTEMS
Use only in industrial air washing systems that have met eliminating components. For control of microorganisms in industrial air washing systems, air scrubbing systems or air conditioning systems to a concentration of microorganisms that is determined with the use of an appropriate test kit.

CHEMTREAT CL-49 may be applied at the pond or fountain. Aeration in a solution that permits complete diffusion into the water at initial exposure time prior to reaching the pond or fountain. CHEMTREAT CL-49 should be used to maintain a total bromine level of 4-10 ppm in all ponds or fountains, as needed to maintain control.

INDUSTRIAL ONCE-THROUGH COOLING WATER SYSTEMS
When used as directed, CHEMTREAT CL-49 effectively controls bacteria, fungi, algae and slime in once-through and closed-cycle fresh and waste water systems. Apply CHEMTREAT CL-49 to the system according to the manufacturer's recommendation. See side panel for further information.

CHEMTREAT CL-49 should be used to maintain a total bromine level of 0.5-1.0 ppm in all ponds or fountains, as needed to maintain control.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage, disposal, or application. Store under cover.

STORAGE: AVOID freezing, excessive heat or exposure to light; normally direct sunlight may cause the product to lose effectiveness; recommended storage conditions at 50°F. Not for use in water systems to the State of California.

DISTRIBUTED BY:
CHEMTREAT, INC.
10404 E. Hickerson Road
Ashland, Virginia 23005
