PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Avoid eyes and skin contact. Avoid inhalation. Harmful if swallowed. Wash thoroughly with water and soap after use. Do not contaminate feed and food.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, aquatic invertebrates, and aquatic plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwater.

This product is highly toxic to bees exposed to direct treatment or to residues from treated areas. Do not apply when bees are actively foraging or are expected to be in the treated area.

NON-WARRANTY
Seller makes no warranty, expressed or implied, concerning the use of this product, except as indicated on the label. Buyer assumes all risk of use and handling of the material when such are used and handled in accordance with the directions given.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with the directions given.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. PROTECT STORAGE: Store product in original container, tightly closed, away from food, feed, and water. DISPOSE: Washings from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONDITIONER DISPOSAL: Nonhazardous remnants. Do not place or store this container. Completely empty contents into a unlined trash can. Do not re-use container. Wash and dry empty container until dry, clean and odorless.-store container away from children and pets.

OUTER BOX: Dispose of empty box in a sanitary landfill or by incineration, or, if allowed by state and local laws, by burning. If burned, may emit smoke.

GENERAL: Consult federal, state and local disposal authorities for approved procedures other than those given above. Approved procedures vary considerably for different types of containers.

DIRECTIONS FOR USE
GENERAL:
The primary function of Dusta-Cide 6 is to prevent unwanted pests from attacking and reproducing. In order for it to be an effective treatment, it must be uniformly mixed with the commodity, since control is achieved as the insects move about feeding. When properly applied Dusta-Cide 6 will fail in the control of the adults or larvae of selected pests.

To obtain maximum effectiveness it is best to fertilize the commodity seeds and then apply the surface-area treatment with a suitable application of Dusta-Cide 6.

Dusta-Cide 6 can be used as a dust or wettable powder application to the two significant commodities - rice, corn, sorghum, barley, and soybean.

PROCEDURE:
Dusting: 10 lbs per 1,000 bushels. Surface treatment: 5 lbs per 1,000 square feet.

APPLICATION PROCEDURES
DURING TRANSFER:
Calculate the quantity of Dusta-Cide 6 required. Whether it be hand or mechanical transfer, Dusta-Cide 6 should be uniformly and continuously on the commodity is transferred. At the end of transfer, process the surface by applying 5 lbs per 1,000 square feet.

SURFACE TREATMENT:
Surface treatment is designed to preset unsuitable conditions for a variety of insects, in that it is treated near the time of storage, as soon as possible after the commodity is harvested. Dusta-Cide 6 should be uniformly applied to the surface and mixed to a depth of approximately 0.005 inches.

NOTE:
A well-mixed aerial dust of Dusta-Cide 6 will be effective in controlling most insects. In other cases it will be necessary to remove any dusting present and mix the surface of the commodity before applying liquid formulations with a suitable insecticide. Any residue resulting should be removed as soon as possible.

MAX KILL
DUSTA-CIDE 6

AIDS IN CONTROL OF
Rice Weevil, Granary Weevil, Lesser Grain Borer, Saw-Toothed Grain Beetle, Cadelle, Black Carpet Beetle, Flat Grain Beetle, Rusty Grain Beetle, Red Flour Beetle, Confused Flour Beetle, Mediterranean Flour Moth, Indian Meal Moth, Anomalous Grain Moth

ACTIVE INGREDIENT:
Malathion (O,O-Dimethyl) O-Diphenyl phosphate deethyl phosphor monooximate

OTHER INGREDIENTS:
TOTAL

KEEP OUT OF REACH OF CHILDREN
CAUTION
FIRST AID

IF SWALLOWED
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

IF INHALED
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance. Then give artificial respiration, preferably by mouth to mouth if possible.
- Call a poison control center or doctor for further medical advice.

IF ON SKIN OR CLOTHING
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF IN EYES
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
