Drione® Insecticide

• FOR INDUSTRIAL/COMMERCIAL USE ONLY
• A DESCANT DUST
• PROVIDES QUICK CONTROL
• KILLS UP TO 6 MONTHS WHEN LEFT UNDISTURBED
• NON-STAINING AND RELATIVELY ODORLESS
• FOR USE IN RESIDENCES, INSTITUTIONS, FOOD PLANTS AND GRANARIES
• CONTROLS ANTS, COCKROACHES, SILVERFISH, BEETLES, FLEAS, LICE, BEES, AND AS STIPULATED IN THE USE DIRECTIONS, ON NUMEROUS STORED PRODUCT PESTS AND TO PROTECT AGAINST ENTANCE OF DRYWOOD TERMITES.

ACTIVE INGREDIENTS
Pyrethrins: 1.0%
- Piperonyl Butoxide, Technical: 10.0%
- Amorphous Silica Gel: 40.0%
** OTHER INGREDIENTS: 49.0%
100.0%
- Equivalent to 8% (butylcarbaryl) (8-propyldimethyl) ether and 2.0% related compounds.
** Contains Petroleum Distillate
EPA Reg No. 432-992
EPA Est. No. 432-TX-1

FIRST AID

Skin
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 to 20 minutes.
- Call a poison control center or doctor for treatment advice.

Yes
- Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER
[PYRETHROID]
the product container or label with you when calling a poison control center or doctor, or for treatment. You may also call 1-800-334-7577 for emergency medical treatment in-
for Physician: May pose an aspiration pneumonia hazard.

PRECAUTIONARY STATEMENTS
Hazards To Humans & Domestic Animals

TOXIC
if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or
mouth. Wash thoroughly with soap and water after handling. Containers larger than one pound
should be used or stored in food handling establishments.

Environmental Hazards
- May be toxic to fish. Do not apply directly to water. Do not contaminate water when disposing
- of manure, washings, or any other wastes.

DIRECTIONS FOR USE
- Follow directions on the label and according to good agricultural practices to minimize adverse impacts on beneficial insects, birds, and other wildlife.

STORAGE AND DISPOSAL
- Store in original sealed container in a cool, dry place inaccessible to children and pets.

STORAGE AND DISPOSAL (continued)

Disposal: If empty: Non-refillable container. Do not reuse or refill this container. Place in trash
or offer for recycling if available.
If partly filled: Call your local solid waste agency for disposal instructions. Never place unused
product down any indoor or outdoor drain.

APPLICATIONS WITHIN FOOD AREAS: For use in and around food processing plants and ware-
houses, bakeries, beverage plants, restaurants, supermarkets, meat and poultry processing plants,
hotels, motels, hospitals, and schools.

LIMITED TO CRACK AND CREVICE TREATMENT ONLY: Using a bulbous duster, apply a small
amount of material directly into cracks and crevices such as expansion joints between different
parts of construction or between equipment bases and the floor, wall voids, motorists,
junction boxes or switch boxes, conduits or hollow equipment legs where Cockroaches, Ants,
Silverfish, Spiders, Boxelder Bugs and Crickets hide. Care should be taken to avoid depositing
the product onto exposed surfaces or introducing the material into the air. Avoid contamination
of food or food processing surfaces.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS
OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.

NON-FOOD AREAS: For use in and around homes, institutions, hospitals, office buildings, hotels,
motels, theaters, schools, warehouses, truck trailers and railroad cars.

To control crawling insects such as Ants, Cockroaches, Silverfish, Firebrats, Spiders, Boxelder
Bugs, Ticks, Lice and Fleas in animal quarters, distribute Drione® at the rate of 2 oz/100 sq ft
of surface area. Apply a continuous visible film underneath and between stairs, refrigerators
and appliances. Treat on, around and behind moldings, skelving, baseboards, pipe openings, cracks,
crevices, and other areas where insects hide. For severe infestations, apply Drione behind cabinets
and walls, in crawlspaces and attics at the rate of 16 oz/1,000 sq ft of surface area. Repeat treat-
ment as necessary.

STORED PRODUCT PESTS: To aid in the control of Cadellies, Cheese Mites, Cigarette Beetles,
Confused Flour Beetles, Dark Mealworms, Drugstore Beetles, Grain Mites, Granary Weevils,
Red Flour Beetles, Rice Weevils, Sawtoothed Grain Beetles and Yellow Mealworms in mills,
elevators and granaries. Clean up waste materials, dust, dirt, and any other debris. Thoroughly
treat floors, walls and other surfaces in bins, storage and handling areas. Apply into cracks and
crevices and other difficult to reach areas where insects may hide.

BEES AND WASPS: It is generally advisable to treat Wasp and Bee nests in the evening when
insects are less active and have returned to the nest. Using hand or power duster or other suitable
means, with extension tubes if necessary, thoroughly dust nest and entrance and surrounding
areas where insects alight. Nests in wall voids can be located by listening with your ear against
the wall. Drill a hole in the area, blow dust in, and resell. For best results check nests carefully
one or two days after treatment to ensure complete kill, then remove and destroy nest to prevent
emergence of newly hatched insects. If removal is not feasible, retreat the nest if necessary. Care
should be taken when treating overhead nests so that neither the product nor the nest falls on
people standing below.

SEWER TREATMENTS: American and Oriental Cockroach infestations in sanitary sewers may be
treated with approximately 6 ounces of Drione per manhole. When treating sewers, one manhole
per 200 feet of line should be treated. Treatments are made by removing the manhole cover
and replacing with a disc of plywood bored to receive the usual flexible hose from portable or truck
mounted ventilating equipment. Six ounces of Drione is introduced into the ventilating air to
be dispersed quickly and thoroughly through the system.

BEDBUSS: Take bed apart. Dust into joints and channels. If hollow, such as square or round tube,
see that the interior of framework is well dusted. Mattresses should be dusted, especially tufts,
folds, and edges. Picture frame moldings and all cracks and crevices in the room should be treated.

DRYWOOD TERMITEs: To protect against entrance, using an electric or hand operated rotary
duster, distribute Drione through an entry, e.g. crawl hole into attic and crawl space of building,
at a rate of 1 lb/1,000 sq ft of floor area. All vents and blowers on the windward side should be
closed. All wood surfaces should be covered. In case of localized infestations probe to locate gal-
leries and drill holes to inject Drione into the galleries. If reasonably heavy infestation has already
developed, fumigation should be employed.

FLEAS: Surfaces of kennels should be dusted at the rate of one oz/50 sq ft. Heavily infested lawns,
basements, and crawl spaces should be dusted at the rate of 16 oz/1,000 sq ft. Repeat as nec-
cessary.

SOWBUGS, PILLBUGS, GROUND BEETLES, EARWIGS, MILLEPEDES, CENTIPEDES AND SCOR-
PIONS: Apply around doors and windows and other places where these pests may enter premises.
Treat baseboards, storage areas and other locations where these pests are found.

IMPORTANT: READ BEFORE USE
Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability
before using this product. If terms are not acceptable, return the unopened product container
at once. By using this product, user or buyer accepts the following conditions, disclaimer of war-
ranties and limitations of liability.
