AQUA-KONTROL CONCENTRATE
For Mosquitoes, Flies and Gnats

A Quick Knockdown, Low Odor, Non-Corrosive Synergized Synthetic Pyrethroid for the Control of Adult Mosquitoes, in Residential, Recreational and Other Areas. Also for Use Against Biting and Non-Biting Midge and Black Flies.

For use only by federal, state, tribal, or local governmental officials responsible for public health or vector control, or by persons certified in the appropriate category or otherwise authorized by the state or tribal lead pesticide regulatory agency to perform adult mosquito control applications, or by persons under their direct supervision.

ACTIVE INGREDIENTS:
*Permethrin .......................................................... 20.0%
**Piperonyl Butoxide .............................................. 20.0%

OTHER INGREDIENTS: ........................................... 80.0%

TOTAL ................................................................. 100.0%

*3-(2-chloroethyl)-3-(2-chlorovinyl) carbamic acid, or a mixture of its cis and trans isomers
**Butylcarbitol is a technical grade of di-n-octyl phthalate
Contains 1.75 pounds of Permethrin and 1.75 pounds of Piperonyl Butoxide per gallon.

KEEP OUT OF REACH OF CHILDREN
CAUTION
See Inside Attached Booklet For Additional Precautionary Statements

"PRECAUCION AL USUARIO: Si usted no lee ingles, no use este producto hasta que la etiqueta haya sido explicado ampliamente"

FIRST AID

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies, or pesticide concerns), you may call 1-800-222-1222, twenty-four (24) hours a day, seven (7) days per week.

Manufactured by: Univar Environmental Sciences
11300 Four Points Drive, Building 1 Suite 210, Austin, TX 78726

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Inhalation: Avoid contact with skin, eyes, or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Prolonged or repeated skin contact may cause allergic reactions in some individuals. Wear long-sleeved shirt and long pants, socks and shoes, and chemical-resistant gloves (such as barrier lamartex, nitrile rubber, neoprene rubber, or vinyl).

Personal Protective Equipment (PPE)

Some solutions that are chemical-resistant to this product are barrier lamartex, nitrile rubber greater or equal to 14 msi or neoprene rubber greater or equal to 14 msi. If you don't have more options, follow the instructions for category 1 on an EPA chemical-resistant category selection chart.

Mixers, loaders, applicators, and other handlers must wear: Long-sleeve shirt; Long pants; Shoes and socks; Chemical-resistant gloves for all handlers except for applications using motorized ground equipment, plots and faugiers; and Chemical-resistant apron for mixer/loaders, persons cleaning equipment, and persons exposed to the concentrate.

See Engineering Controls for additional requirements.

User Safety Requirements:

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Reuse and wash PPE separately from other laundry.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them.

User Safety Recommendations:

• Use leak-resistant containers and store them away from food, beverages, or other materials.
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Wash thoroughly and apply barrier cream or lotions.
• Prevents moisture from getting into the product.
• Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Engineering Controls

Plants must use an enclosed cockpit that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (29 CFR 1910.147). Human flagging is prohibited. Fungicide for aerial application is limited to use of the Global Positioning System (GPS) or mechanical flaggers.

ENVIROMENTAL HAZARDS

This pesticide is extremely toxic to aquatic organisms, including fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters, or surface waters. Applying this product in calm weather when wind is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticides off the treated area. Fusilade application equipment over the treated area will help avoid run-off to water sources or drainage systems.

This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift on blooming crops or weeds while bees are actively visiting the treatment area.

ENVIRONMENTAL HAZARDS FOR WIDE AREA MOSSUQUITO AERIAL APPLICATIONS

This pesticide is extremely toxic to aquatic organisms, including fish and aquatic invertebrates. Fungicide is not treated areas on deployment of spray equipment. If a body of water may be hazardous to fish and aquatic invertebrates.

When applying as a wide area mosquito adulticide, before making the first application, a operator must inspect the area with the state regulatory agency with primary responsibility for pesticide regulation to determine if other regulatory requirements must be met.

When applying as a wide area mosquito adulticide, do not apply over bodies of water, lakes, rivers, permanent streams, natural ponds, commercial fish ponds, swamps, mires or marshes, except when necessary to target areas where adult mosquitoes are present, and washdown conditions will facilitate movement of applied material away from the water in order to minimize incidental deposition into the water body.

PHYSICAL AND CHEMICAL HAZARDS

Not-flammable

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions:

• Apply this product only as specified on the label.
• Do not contaminate food or feed areas.
• Application of this product using hand-held cold or thermal fogging equipment is prohibited.
• This product is not for use in metered release misting devices.
• Do not apply as a broadcast or spot treatment to indoor surfaces at residential sites, including nurseries, day-care centers, schools, hospitals, and military bases.
• Except when applying for mosquito control, do not enter or allow others to enter treated areas until sprays have dried.
• Except when applying for mosquito control, do not enter or allow others to enter treated areas until sprays have dried.
• Application of this product is prohibited directly into sewers or drains, or to any area or gutter where drainage to storm sewers, storm drains, water bodies, or aquatic habitats can occur. Do not allow this product to enter any drain during or after application.
• Remove pets, birds, and cover fish aquariaums and ornamental fish ponds before spraying, and turn aquarium systems off prior to use.
• Except when applying for mosquito control, only protected handlers may be in the area during application.

Aerial application of this product is prohibited in the State of Florida unless specifically authorized by the Bureau of Entomology and Pest Control, Florida Department of Agriculture and Consumer Services.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standards for agricultural pesticides (40 CFR Part 190). The WPS applies when this product is used to produce agricultural plants on farms, farms, nurseries and greenhouses.

ENGINEERING CONTROLS

Keep unprotected persons out of treated areas until sprays have dried. Wear protective clothing when using or handling this product to help avoid exposure to eyes and skin. Eye protection, gloves, a long-sleeved shirt and long pants are recommended.

Allow pets to dry before allowing adults, children or pets on treated areas.

For all requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

CONDITIONS AND RATES TO USE FOR MOSQUITO CONTROL

AQUA-KONTROL CONCENTRATE may be used to control adult mosquitoes, flies and gnats in mosquito control programs including, residential, industrial, municipalities, parks, campgrounds, woodlands, athletic fields, golf courses, gardens, playground, recreational areas, waste areas and other places where mosquitoes occur. For best results, treat when insects are most active and conditions are conducive to keeping the fog close to the ground.

AQUA-KONTROL CONCENTRATE is designed to be either diluted with water or used undiluted, and applied as a U, U or Uer or Junior spray. AQUA-KONTROL CONCENTRATE stays fully in suspension and will not settle or separate under normal storage conditions. If, however, there are signs of separation, coarse or fine, it should be thoroughly mixed. AQUA-KONTROL CONCENTRATE does not contain aromatic or aliphatic petroleum distillates.

Do not mix this product with oil. Use only clean water. Do not exceed the maximum recommended rate of 50 g/a per acre.

Both ground and aerial applications should be made when meteorological conditions are conducive to keeping the spray cloud close to the ground, such as when an air temperature inversion is present. Applications during the cool hours of early morning or early afternoon are preferred. Air temperatures should be greater than 80°F when conducting all types of applications. Application in calm air conditions must be avoided. Apply when wind speed is greater than 2 mph. Do not apply when wind speed exceeds 10 mph. Applications cannot exceed the recommended rates.

2
For use by federal, state, tribal, or local government officials responsible for public health or vector control, or by persons certified in the appropriate category or otherwise authorized by the state or tribal lead pesticide regulatory agency to perform adult mosquito control applications, or by persons under their direct supervision.

Do not treat a site more than once in 3 days. Do not exceed 25 applications at 0.007 lbs. of permethrin per acre per application or 0.025 lbs. of permethrin per acre per season or 2.0 lbs. PBO per acre per year. When targeting Anopheles Taeniorhynchus and other difficult species, applications of PBO may be made up to 0.080 lbs. PBO per acre. More frequent treatments may be made to prevent or control a threat to public health or animal health determined by a state, tribal or local health or vector control agency on the basis of documented evidence of diseases causing insects in vector mosquitoes or the occurrence of mosquito-borne diseases in animal or human populations, or if specifically approved by the state or tribe during a natural disaster recovery effort.

AGUA-KONTROL CONCENTRATE can be applied over specific growing crops and range grasses prior to harvest for the control of adult mosquitoes and biting flies within or adjacent to these areas. Application can only be made where the following crops are present:

- Alfalfa
- Amanthus
- Apples
- Aridolote, goji
- Asparagus
- Avocado
- Broccoli
- Brussel Sprouts
- Cauliflower
- Celery
- Cherries
- Corn, field
- Corn, grain (field and pop)
- Corn, stover
- Cranberry, vegetable
- Cucurbits
- Peaches
- Pears
- Pepper bell
- Pitscho
- Potato
- Soybeans
- Spinach
- Tomatoes
- Vegetable, cucurbits
- Walmart
- Exposed Fertilizer

Garlic

in the treatment of corns, touludos, vesicular and confluent sores, acne, lice, poultry mange, and roost, cover any exposed drinking water, drinking fountains and animal feed before application. Do not contaminate non-approved sites with spray drift.

DROPLET SIZE CALIBRATION FOR GROUND-BASED APPLICATION EQUIPMENT

Ground-based application: Spray equipment must be adjusted so that the volume median diameter is less than 50 microns (0.019 < 0.08 microns) and that 99% of the spray is contained in droplets smaller than 50 microns (0.08 < 0.03 microns). Directness from the equipment manufacturer or vendor, pesticide registration or a test facility using a laser based measurement instrument must be used to adjust equipment to produce acceptable droplet size spectra. Application equipment must be tested at least annually to confirm that pressures at the nozzle and nozzle flow rates are properly calibrated.

NON-TELEPHIC AEROSOL FOGGER APPLICATION

AGUA-KONTROL CONCENTRATE UV Non-Telephic Aerosol Fogger Application:

To control mosquitoes, midges and blackflies, apply AGUA-KONTROL CONCENTRATE using any standard UV light generator capable of producing a non-thermal aerosol spray. Very low rates according to vegetation density and mosquito population. Use higher flow rates in heavy vegetation or when populations are high. An accurate flow control system must be used to ensure proper flow rate. AGUA-KONTROL CONCENTRATE may be applied by diluting with water and applying as low as 2.0 lbs. of water per acre as shown in the first column of the UV table shown below. That table represents some recommended application rates for various light generator applications. If an alternate flow rate is required, adjust the flow rate according to the droplet size and spectrum remains within label specifications. May be applied at truck speeds of 5 to 20 mph.

AS A BARRIER SPRAY USING A MISTER TYPE UNIT: For use in non-thermal equipment, apply AGUA-KONTROL CONCENTRATE with a mist blower adjusted to deliver droplets with a volume median diameter of 50 – 120um. Use undiluted or diluted to achieve an application rate of 0.00175/0.00175 # / acre. Use a 50:1 (2.5 mph) with whirl at a speed of 2 mph (1.25 knots). If using a different speed, swarm or dilution, do not exceed the maximum 1:10. When this product is applied as a barrier treatment, do not apply within 100 feet (30 meters) of lakes and streams.

OUTDOOR RESIDUAL MISTING SYSTEMS

When using this product indoors and outdoor misters must comply with the license, certification, or registration requirements of the state(s), tribe(s), local authority(ies) where they are installed.

Use Restrictions:

- Do not apply this pesticide when people, pets, and/or food are present.
- Do not use in an evaporative cooling system.
- Direct nozzles to spray towards the target area and away from bathing pools, water bodies, or heating and cooking areas.
- Do not set nozzles to direct mist near outside air condition systems or other home or office intakes.

If used in a system with a reservoir tank for the end use dilution, the system reservoir tank must be locked. Security attach the end use pesticide label and a dilution statement to the system reservoir tank in a weather protected area or plastic sleeve. The dilution statement must be affixed as follows: “This container holds 1 part Aqua-Kontrol Concentrate to 10 parts water.”

It is used in a direct injection system, the pesticide container must be locked. Securely attach the end use label to the pesticide container in a weather protected area or plastic sleeve.
if the system works on an automatic timer, set the timing for application when people, pets, and/or food are unlikely to be present.

If the system works when a person operates a remote activation device, then application of this pesticide when people, pets, and/or food are present is prohibited.

Contact the system manufacturer for guidance or assistance to ensure compliance with the following requirement:

"This product may only be used in systems that have been calibrated to apply no more than the maximum application rate of 0.25 grams (0.0005 lbs) permethrin and 6.36 grams (0.0005 lbs) ph 3806 cubic feet per day."**

**AERIAL APPLICATION INSTRUCTIONS**

The use of aircraft specially equipped and capable of applying LOW VOLUMES of AQUA-KONTROL CONCENTRATE may be necessary.

**DROPLET SIZE CALIBRATION FOR AERIAL APPLICATION EQUIPMENT**

**Aerial Application made at 300 above ground elevation:** Spray equipment must be adjusted so that the droplet mean diameter (produced in less than 10 minutes) (25.9 = 60 pm) and that 90% of the spray is contained in droplets smaller than 100 microns (Dv 0.9 = 100 pm). The effects of flight speed and, for non-rotary nozzles, nozzle angle on the droplet size spectrum must be considered. Directions from the equipment manufacturer or vendor, test facility using a wind tunnel and laser-based measurement instruments must be used to adjust equipment to produce acceptable droplet size spectra. Application equipment must be tested at least annually to confirm that pressure at the nozzle and nozzle flow rates are properly calibrated.

**Aerial Application made at 500 above ground elevation:** Spray equipment must be adjusted so that the droplet mean diameter produced is less than 100 microns (Dv 0.9 = 70 pm) and that 90% of the spray is contained in droplets smaller than 145 microns (Dv 0.9 = 145 pm). The effects of flight speed and, for non-rotary nozzles, nozzle angle on the droplet size spectrum must be considered. Directions from the equipment manufacturer or vendor, test facility using a wind tunnel and laser-based measurement instruments must be used to adjust equipment to produce acceptable droplet size spectra. Application equipment must be tested at least annually to confirm that pressure at the nozzle and nozzle flow rates are properly calibrated.

**Aerial Application made at altitudes ranging from 75 to 300 feet.** On-site and downwind of the application area, the following conditions must be met: Apply at a sufficient distance to allow the liquid to spread and not to contaminate the environment. Apply at a rate of 0.0075 to 0.007 lbs (a.i./acre) to achieve the appropriate droplet size. Flight speed and nozzle orientation must be considered in determining droplet size. Apply at a speed that does not exceed 1 mph. The spray boom should be mounted on the aircraft to minimize drift caused by wind or rotor wash. The minimum practical boom length should be used and must not exceed 75% of the wing span or 90% rotor diameter.

**STORAGE AND DISPOSAL**

Do not contaminate water, food by feed storage or disposal.

**Pesticide Storage and Spill Procedures:** Keep this product in its tightly closed original container when not in use. Store in a cool, dry (preferably locked) area that is designated for such insecticides and other inaccessible to children and animals. Avoid exposure to extreme temperatures. In case of spillage, seek out with absorbent material such as sand or fillers earth, sweep up and place in a labeled container and disposed of as follows:

**Pesticide Disposal:** Windows resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

**Container Handling:** Non-releasable Container: Metal or Plastic Container. Do not reuse or refill container. Triple rinse or pressure rinse container (or equivalent promptly after emptying. Offer for recycling if available and reconditioning if appropriate or purchase and dispose of at a sanitary landfill, or by other procedures approved by State and local authorities. Triple rinse as follows:

- **Containers 5 gallons or less:** Empty the remaining contents into application equipment and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recirc. Drain for 10 seconds. Pour contents into new tank or store for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Once cleaned, offer for recycling if available or reconditioning if appropriate or purchase and dispose of in a sanitary landfill or by other procedures approved by State and local authorities. Do not cut or weld metal containers.

- **Containers larger than 5 gallons:** Empty the remaining contents into application equipment. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip back and forth several times. Empty the residue into application equipment or a mix tank or steam reheat for later use or disposal. Repeat this procedure two more times. Once cleaned, offer for recycling if available or reconditioning if appropriate or purchase and dispose of in a sanitary landfill or by other procedures approved by State and local authorities.

**Pressure rinse as follows (all sizes):** Empty the remaining contents into application equipment or a mix tank or steam reheat for later use or disposal. Insert pressure rinse nozzle in the side of the container and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

**NOTICE:** Buyer and user assumes all risks and liability for use, storage and handling of this product not in accordance with the terms of this label.

**BUYER GUARANTEE LIMITED TO LABEL CLAIMS**

Univar Environmental Sciences

EPA Reg. No. 73748-1
EPA Establishment No. 53883-TX-002
AQUA-KONTROL CONCENTRATE
For Mosquitoes, Flies and Gnats

A Quick Knockdown, Long-Lasting, Non-Corrosive Synthesized Synthetic Pyrethrum for the Control of Adult Mosquitoes, in Residential, Recreational and Other Areas. Also use For Against Biting and Non-Biting Midges, Black Flies.

For use only by federal, state, tribal, or local government officials responsible for public health or vector control, or by persons certified in the appropriate category or otherwise authorized by the state or tribal lead pesticide regulatory agency to perform adult mosquito control applications, or by persons under their direct supervision.

ACTIVE INGREDIENTS:

- Permethrin: 20.0%
- Piperonyl Butoxide: 20.0%
- Other Ingredients: 60.0%

- 1-phenacyl-2-(2,2-dichlo-roethyl)benzene (2.2-dichloroethyl) cyclopentanecarboxylate: 35.0%
- 1-phenacyl-2-(2,2-dichloroethyl)benzene (2.2-dichloroethyl) cyclopentanecarboxylate: 35.0%
- Dicyclofipron (4- propyl)phenol: 1.0%

Contains 1.75 pounds of Permethrin and 1.75 pounds of Piperonyl Butoxide per gallon.

KEEP OUT OF REACH OF CHILDREN
CAUTION

See inside attached booklet for additional Precautionary Statements.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Prolonged or frequent skin contact may cause allergic reactions in some individuals. Wear long-sleeved shirt and long pants, socks and shoes, and chemical-resistant gloves (such as latex, nitrile, neoprene rubber, or viton). ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to aquatic organisms, including fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run-off into storm drains, drainage ditches, gullets, or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Failing to apply the correct application rate over the treated area will allow residual pesticide to drift to untargeted bodies of water or drainage systems. This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift on blooming crops or weeds while bees are actively visiting the treatment area.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage and Disposal Procedures: Keep product in its tightly closed original container when not in use. Store in a cool, dry, preferably locked area that is designated for such chemicals and is inaccessible to children and animals. Avoid exposure to extreme temperatures. In case of spillage, soak up with absorbent material, such as sawdust or fulvic earth, sweep up and place in a labeled container and dispose of as follows:

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Handling: Nonrefillable Container. Metal or Plastic Container. Do not reuse or refill container. Triple rinse or pressure rinse container, or equivalent, promptly after emptying. Offer for recycling if available or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities. Triple rinse as follows:

Containers 5 gallons or less: Empty the remaining contents into application equipment and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour residue into mixing tank or store residue for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Once cleaned, offer for recycling if available or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities. Do not cut or weld metal containers.

Containers larger than 5 gallons: Empty the remaining contents into application equipment. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Once cleaned, offer for recycling if available or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities.

Pressure rinse as follows (all sizes): Empty the remaining contents into application equipment or mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank and collect rinsate for later use or disposal. Insert pressure rasing nozzle in the side of the container and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.
